SUMMARY SECTION
SmartETFs Advertising & Marketing Technology

Investment Objective

SmartETFs Advertising & Marketing Technology ETF’s investment objective is long-term capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of SmartETFs Advertising & Marketing Technology ETF. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.

<table>
<thead>
<tr>
<th>Shareholder Fees (fees paid directly from your investment)</th>
<th>None</th>
</tr>
</thead>
<tbody>
<tr>
<td>Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investments)</td>
<td></td>
</tr>
<tr>
<td>Management Fees:</td>
<td>0.68%</td>
</tr>
<tr>
<td>Distribution and Service (12b-1) Fees:</td>
<td>None</td>
</tr>
<tr>
<td>Other Expenses:</td>
<td>6.83%</td>
</tr>
<tr>
<td><strong>Total Annual Fund Operating Expense:</strong></td>
<td>7.51%</td>
</tr>
<tr>
<td>Fee Waiver/Expense Reimbursement:¹</td>
<td>-6.83%</td>
</tr>
<tr>
<td>**Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement:**¹</td>
<td>0.68%</td>
</tr>
</tbody>
</table>

¹ The Adviser has contractually agreed to reduce its fees and/or pay ETF expenses (excluding acquired fund fees and expenses, interest, taxes, dividends on short positions and extraordinary expenses) in order to limit the Fund’s total annual operating expenses to 0.68% through June 30, 2026. This contractual arrangement may be terminated by the Board of the Fund at any time without penalty upon 60 days’ notice.

Example

This Example is intended to help you compare the cost of investing in SmartETFs Advertising & Marketing Technology ETF with the cost of investing in other investment companies. The Example assumes that you invest $10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. This Example does not include brokerage commissions that you may pay to buy and sell shares. Although your actual costs may be higher or lower, under these assumptions, your costs would be:

<table>
<thead>
<tr>
<th></th>
<th>1 Year</th>
<th>3 Years</th>

</thead>
<tbody>
<tr>
<td></td>
<td>$69</td>
<td>$218</td>
<td>$1,880</td>
<td>$5,685</td>
</tr>
</tbody>
</table>

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in the annual fund operating expenses or in the Example, may affect the Fund’s performance. During the Fund’s most recent fiscal year ended December 31, 2022, the Fund’s portfolio turnover rate was 22.10% of the average value of its portfolio.
Principal Investment Strategies

Under normal circumstances, the Fund will invest at least 80% of its net assets (plus any borrowings for investment purposes) in publicly-traded equity securities of domestic or foreign companies across multiple sectors that the Adviser considers to be Advertising or Marketing Technology companies, which are companies that have significant exposure to the development, production or deployment of advertising or marketing services, especially in ways that are related to digital media or in ways that make advertising or marketing activities more tailored or efficient in reaching a specific demographic, and which are defined below. Advertising and Marketing Technology are thematic concepts. The Fund is actively managed, meaning that the Adviser will select the Fund’s holdings based on its judgment and analysis of a company’s activities.

The Adviser believes that “Advertising” and “Marketing Technology” companies are companies that engage in businesses that fall within the following scope:

- **Advertising companies** are companies that engage in advertising-related activities, which means using communications to sell products or services. Advertising-related activities includes:
  - The placement, sale or publication of advertisements, including digital, print, broadcast and “out of home” media (advertising that reaches consumers while they are outside their home);
  - The development of advertising and public relations services, strategies and creative assets (including designing, creating or producing advertisements), and systems or platforms that deliver advertising (such as streaming services or other technology-based applications or platforms), as well as programmatic advertising platforms; or
  - The placement or distribution of advertisements through various platforms or exchanges, including on social media applications as well as through public relations programs or promotional activities and events.

Advertising companies could include companies that engage through traditional media (newspapers, magazines, radio or television) or through new media (internet, streaming, gaming, social media or other applications including music streaming), and could also include companies that are making advertising more efficient in delivering content (including educational content) to larger or more targeted groups of consumers.

The Adviser considers a company to be in the advertising business if the company has devoted more than 50% of its assets to, or derives more than 50% of its revenue, income or profits from, advertising-related activities.

- **Marketing Technology companies** are companies that use technology or technology solutions to deliver marketing services or make marketing activities more efficient. The products and services delivered by Marketing Technology companies could include:
  - Traditional or non-traditional media companies and marketing agencies that offer advertising clients the ability to use technology for advanced or tailored targeting of communications to customers or potential customers;
  - Customer relations, and customer relationship management platforms, including software for sales automation, customization and app integration;
  - Marketing and customer/consumer data, and analytical assessments of that data, including customer identification and tracking;
Marketing Technology companies could also include companies that provide products, platforms or services that allow marketers to assess or improve the results of their advertising or marketing activities by using technology, software (including automation programs), data and customer insights (including data and customer insights derived from non-marketing or advertising activities).

The Adviser considers a company to be in the Marketing Technology business if the company has devoted more than 50% of its assets to, or derives more than 50% of its revenue, income or profits from, marketing technology related activities; or if it derives more than 50% of its revenues, income or profits from, or devotes more than 50% of its assets to, producing or distributing technology-based products or services used by advertising and marketing companies.

At all times, the Fund will invest at least 15% of its assets in Advertising companies and at least 15% of its assets in Marketing Technology companies.

The Fund may invest up to 20% of its assets in companies that do not fall within these categorizations. All of the Fund’s investments will be related to Advertising or Marketing Technology. Some of the companies in which the Fund will invest will be companies that do not meet the 50% tests described above, but offer a product or service that improves advertising or marketing. The Fund treats these companies as being within this 20% basket.

The Fund will concentrate its investments (that is, invest more than 25% of its total assets) in Advertising and Marketing Technology companies (as defined above), and these companies may fall into the following industry groups: telecommunications services, media and entertainment, information technology services, software services and commercial and professional services. A downturn in companies in any of these industry groups would have a larger impact on the Fund than on a fund that does not concentrate in Advertising and Marketing Technology companies.

Equity securities may include common stocks, preferred stocks, securities convertible into common stocks, rights and warrants. The Fund’s allocations may vary depending on changing market conditions (including but not limited to, liquidity, volatility, and the number of companies meeting selection criteria). The Fund may invest in US companies and in companies economically tied to foreign countries, including, potentially, companies domiciled or traded in emerging markets, including China. For more information about how the Adviser determines that a company is economically tied to a foreign country, see “More About the Fund’s Investment Strategies and Risks” in this Prospectus. The Fund’s allocations among countries may vary depending on changing market conditions (including but not limited to, liquidity, volatility, and the number of companies meeting selection criteria), and there is no specific allocation of investments to US issuers or non-US issuers. The Fund’s currency is US Dollars, while some of its investments are denominated in foreign currencies.

Typically, the Fund will hold around 30 positions of approximately equal weight, but the portfolio may vary over time. Under normal market conditions, the Fund may have as few as 25 holdings or as many as 75 holdings. The Fund is actively managed, meaning the Adviser will select the Fund’s holdings based on its own research and evaluation process. In identifying investments that the Fund will buy or sell, the Adviser identifies companies with favorable characteristics from the identifiable universe of companies it has compiled, and performs research and
fundamental analysis to understand the company’s business model, valuation and potential for return. In determining whether a company is an Advertising or Marketing Technology company, the Adviser considers the company’s public statements about its activities, including regulatory filings (reflecting profits, revenues, EBITDA (earnings before interest, taxes, depreciation and amortization), cash flow and assets), as well as third-party industry assessments of products and services that the company delivers and the role of those products or services in the types of advertising-related or marketing-related activities described above. The Adviser then monitors potential or actual investments for performance and risk perspectives, as well as to quantify drivers of return and assess company performance versus expectations.

The Fund may invest in companies of any market capitalization size, but under normal market conditions, the Fund will invest in companies with a minimum market capitalization of $500 million. The Fund will invest in companies on a global basis, meaning that it will generally hold both domestic and foreign companies and may invest in companies in developed markets and emerging markets outside the United States, including companies economically tied to countries in the Asia Pacific region, primarily China and Japan, but potentially, also, Hong Kong or Australia. For more information about how the Adviser determines that a company is economically tied to a foreign country, see “More About the Fund’s Investment Strategies and Risks” in this Prospectus.

For temporary defensive purposes, any portion of the Fund’s total assets may be invested in cash and cash equivalents, including money market funds, to respond to adverse market, economic, political or other conditions. While the Fund is applying this temporary defensive strategy, it may be unable to achieve its investment objective.

The Fund is designed for investors who seek long-term capital appreciation through focused investment in equity securities of companies, wherever located, that are engaged in advertising and marketing activities that are enhanced by technology.

Additional information on Principal Investment Strategies can be found in the prospectus. Also see Additional Investment Strategies and Risks in the Statement of Additional Information.

Principal Risks

You can lose money by investing in shares of SmartETFs Advertising & Marketing Technology ETF, and investing in shares of this Fund may be more risky than investing in a fund that only invests in U.S. securities due to increased volatility of foreign markets. Risks associated with an investment in the Fund can increase during times of market volatility. There can be no assurance that the Fund will achieve its investment objective.

The Fund is subject to the following risks, which could affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return or the Fund’s ability to meet its investment objective. These risks are also described in the “Principal Risks” and “Risks of Investing in Our Fund” sections of this prospectus and in the Fund’s Statement of Additional Information. You can lose money by investing in Shares of this Fund.

Risks of Investing in Funds Investing in the Marketing Technology Sector

The following risks apply to investments in Advertising and Marketing Technology companies:

- **Advertising and Marketing Technology Risk.** While there are some well-established Advertising and Marketing Technology companies, technology is advancing rapidly and Advertising and Marketing Technology companies are subject to intense competition. The barriers to entry into some of these businesses are relatively low and there are a number of smaller competitors in the field that have the ability to disrupt these businesses. Some of the technology is unproven and subject to cybersecurity threats. Changes in data protection standards and regulation could also affect these companies. Both Advertising and Marketing Technology applications may converge in the future with transaction activity, such as banking or payments, which may be heavily regulated. These factors may mean more rapid software or technological obsolescence as compared to traditional technology companies, and
that the business models for some Advertising or Marketing Technology companies may change or these companies may become defunct rapidly. These risks could adversely affect the value of companies in which the Fund invests.

- **Communications Services Sector Risk.** The Fund will invest in companies that are closely aligned to communications services, and these companies may be more vulnerable to product development cycles including obsolescence than other companies that are not as reliant upon digital and technological advancements and social media trends. Communications services companies can face rapid development and deployment of competitive innovations and products, some of which may be designed to “disrupt” established communication channels. These companies may also face competition, enhanced research and development costs (including platform access costs), risks of government regulation, as well as data security and privacy concerns. Domestic and international demand for advertising and marketing technology can change rapidly and without notice. These companies may also face increased risks of security breaches which may be aimed at enterprise data or customer/consumer data, the theft of which could expose a company to business losses as well as fines or other monetary consequences. These risks apply to the communications services sector as a whole and to individual companies within this sector.

- **Information Technology Sector Risk.** The Fund will invest in companies in the information technology sector, and these companies may be more sensitive to product development cycles, obsolescence, consumer tastes and trends and government interventions such as regulation and taxation. These companies may face obstacles in development and deployment of software, including limitations or threats of limitations by governments and regulators. Companies in the information technology sector face potential obsolescence due to rapid technology evolution, new product introductions, and changes in consumer tastes and trends, which can be impacted by social and political developments. Information technology companies could be adversely impacted if there is a loss of access to patented intellectual property necessary to operate their products. The Fund could lose money if a company in its portfolio is adversely affected by one of these risks.

- **Industry Concentration Risk.** The Fund concentrates in securities of issuers that are Advertising and Marketing Technology companies, as determined by the Adviser. Some of these companies fall into industry groups as identified by general industry classification systems. To the extent the Fund’s investments fall within these industry groups, the Fund may be more susceptible to loss due to adverse outcomes affecting that industry group than a fund that does not have the same investment exposure. The Fund invests in securities of companies that could be within the following industry groups: media and entertainment, software services and commercial/professional services industries. A downturn in companies in these industry groups would have a larger impact on the Fund than on a fund that does not focus its investments in companies involved in a specific business segment.

  - **Media & Entertainment Industry Risk.** Companies in the media and entertainment industry are susceptible to risks due to competition, especially in product formation and delivery, but also due to new technologies, product obsolescence or saturation, cyclical development, revenue and income streams, changes in consumer tastes, potential for increases in regulation and taxation and the potential for significant volatility due to changes in consumers discretionary income.

  - **Software Services Industry Risk.** Companies that develop and implement software used in advertising and market can face risks associated with low barriers to entry, competition, especially in software development, deployment and delivery, and also due to product obsolescence or saturation, changes in regulation especially with respect to consumer or customer data, and technology risk.

  - **Commercial/Professional Services Industry Risk.** Companies that provide commercial or professional services can face risks associated with decline in the markets for their services which
may be accelerated during global economic crises. These companies may face competition for
talent and face risks associated with technology applications that rely upon new skills sets for
deployment and operations, as well as workforce reductions or replenishment due to information
technology applications that use artificial intelligence and machine learning software.

- **Technology Risk.** Companies in the Fund’s portfolio and firms that support the products or services
  used by or delivered by Advertising or Marketing Technology firms, such as software, grids and
  networks, may be unproven, susceptible to obsolescence or subject to future regulation in countries or
  locations of deployment. Technologies may also lack scalability, are subject to competition and rapid
  changes in technology standards or development, and may be incompatible with future developments.
  Technologies also involve intellectual property components that are regulated or protected differently
  in various countries, and which is subject to risk of theft, misappropriation or vandalism. These
  technologies may also be at increased risk of failure or attack because they are designed to interact with
  other non-proprietary technologies and applications across one or more external networks. Companies
  producing technology or software upon which Advertising or Marketing Technology or networks rely
  may decide to discontinue support for the technology or software or restrict its deployment into major
  markets. Software or technology involved including, networks, grids, infrastructure or services related
to marketing technology could be adversely affected by network events or outages (local or global).
  These risks may cause the securities of companies making these products to be worth less than at the
time of purchase. This risk applies to the sector as a whole and to individual securities within the sector.

- **Cybersecurity Risk.** Technologies created or deployed for Advertising or Marketing Technology may
  be subject to greater cybersecurity risk than other companies because they are generally designed to
  interact with data about or from consumers, which may be desirable targets or which may become more
  heavily regulated. Technology programs and networks may be subject to an increased risk of attack or
  infiltration and may be more susceptible to “network” attacks or outages and to theft of data. A
cybersecurity event affecting an Advertising or Marketing Technology company could cause results in
claims for loss or injury in multiple jurisdictions.

- **Product Risk.** Companies creating products and technologies for Advertising or Marketing
  Technology face considerable competition. There is no guarantee that companies that successfully
  create a product will obtain product adoption, or that a product will not become obsolete quickly.
  Companies in this area may have research and development expenses that are significantly higher than
  companies in other parts of the technology sector, which could make their securities less desirable.

- **Product Regulation Risk.** Advertising and Marketing Technology companies may be subject to
  multiple levels of regulation including local regulations and operating restrictions. They could be or
  become subject to domestic or foreign regulatory regimes governing consumer privacy, data storage or
  transfer, or automation. Limitations on applications for Advertising or Marketing Technology could
  adversely affect the value of companies in which the Fund invests.

- **Equity Securities Risk.** The Fund invests in publicly-traded equity securities, and their value may
  fluctuate, sometimes rapidly and unpredictably, which means a security may be worth more or less than
  when it was purchased. These fluctuations can be based on a variety of factors including a company’s
  financial condition as well as macro-economic factors such as interest rates, inflation rates, global
  market conditions, and non-economic factors such as market perceptions and social or political events.

- **Market Risk.** General market conditions can affect the value of the Fund’s securities holdings. Market
  risk applies to individual securities, a particular sector or the entire economy. Recently, global financial
  markets have experienced a period of extreme stress which has resulted in unusual and extreme
  volatility in the equity markets and in the prices of individual securities. In some cases, the prices of
  securities issued by individual companies have been negatively impacted even though there may be
  little or no apparent degradation in the financial conditions or prospects of that company. Global events,
financial market shocks or interest rate events could cause equity securities generally to decline in value, including if fixed income securities become more favorable. These market conditions add significantly to the risk of short term volatility of the Fund.

- **Global Risks.** The Fund invests in companies in multiple countries, and companies in which the Fund invests may experience differing outcomes with respect to safety and security, economic uncertainties, natural and environmental conditions, health conditions (including pandemics such as Covid-19) and/or systemic market dislocations (including market dislocations due to events outside a company’s country or region, including supply chain events). The global interconnectivity of industries and companies, especially with respect to goods, can be negatively impacted by events occurring beyond a company’s principal geographic location. These events can contribute to volatility, valuation and liquidity issues, and can affect specific companies, countries, regions and global markets.

  - **Pandemic Risk.** In 2020, markets globally were impacted by the Covid-19 pandemic, which is ongoing. This pandemic adversely affected industries, including supply chains, as well as general financial conditions, and has resulted in shutdowns and economic stimulus packages. Total economic effects of Covid-19 cannot be predicted. Covid-19 may continue in the foreseeable future and could adversely affect companies in the Fund’s portfolio, including by affecting their willingness or ability to pay dividends, which could negatively impact stock prices as well as yield.

  - **Capital Controls and Sanctions Risk.** In 2022, a number of countries imposed capital controls and economic and other sanctions in response to Russia’s invasion of Ukraine. The range of sanctions and their impact continues to evolve but has included asset seizures, restrictions on the transfer or exchange of currency, restrictions on asset transfers, exclusions from international banking systems, export limitations and limitations on listing shares of companies that are economically tied to Russia and Belarus, including depositary receipts on shares of affected companies. Sanctions programs have been imposed by individual countries, but also on a coordinated basis. The duration of sanctions programs and capital controls in response to the invasion of Ukraine cannot be predicted with any certainty. Capital controls and/or sanctions could adversely impact a Fund’s ability to buy, sell or otherwise transfer securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for Fund shares, and otherwise cause the Fund to decline in value.

**Risks Associated with Investments in Companies outside the United States**

  - **Investing in Non US Companies.** Investing in companies outside the U.S., including in countries in Europe and Asia, involves different and additional political, social, economic, legal and regulatory risks, based on the size of their securities markets, competition for investments, interest rates, global or foreign trade activities (restrictions and tariffs or threats of changes to restrictions or tariffs), and changes in the global economy, such as “Brexit”, the withdrawal of the United Kingdom from the European Union (EU), as well as changes due to global or coordinated sanctions activities. Impacts of Brexit are likely to be higher on companies with significant contacts with the United Kingdom, including companies in Europe. Non-US companies, whether in developed or emerging markets, may be more sensitive to these factors, which can increase volatility, reduce liquidity and negatively affect economic growth. The Fund’s ability to access foreign securities markets can be limited, which can affect availability, liquidity and pricing of foreign securities.

    - **Sensitivity to global events.** Non US securities may be more sensitive to changes in global economic activity, including interest rates as well as trading activity, including trade restrictions, tariffs, or threats of changes to restrictions or tariffs. These companies may be more sensitive to global economic transitions and stresses, such as Brexit, central bank or government interventions (commonly involving interest rates but also stimulus and sanctions). Investing in non-US securities can also expose the Fund to risks associated with the potential imposition of economic or other
sanctions against a particular country, or businesses or industries, including trade restrictions or tariffs (or threats thereof).

- **European Securities.** The Fund may invest in companies in Europe and the United Kingdom. Companies in countries in the European Union and the UK may be more sensitive to changes as a result of Brexit. These changes could include changes in how goods, technology or services are delivered or received between the European Union countries and the United Kingdom.

- **Legal, Accounting, Audit and Disclosure may vary.** Foreign countries have different legal, accounting, auditing and financial disclosure systems, which may make information about companies more difficult to understand, and less information may be available. Under foreign legal systems, different standards may apply for foreign governments to take over assets, restrict the ability to exchange currency or restrict the delivery of securities. Some foreign companies may be subject to special restrictions in U.S. markets due to non-compliance with U.S. audit inspection standards.

**Securities of Companies in Asia.** The Fund may invest in securities of companies in Asia, including China and Japan. Investments in securities of Chinese companies can be impacted by currency and exchange rate fluctuations, in addition to price volatility, illiquidity and changes in China’s regulatory, monetary and socioeconomic policies, and limitations on access to Chinese issuers.

- Asia Pacific stock markets may experience volatility and instability, and these risks can apply to entire economies, particular sectors and particular securities. Asia Pacific stocks could rise or fall with changes in economic or political circumstances in specific countries, may fall out of favor with investors, and currencies of countries in the Asia Pacific region may decline in comparison to the U.S. dollar. Stocks economically tied to the Asia Pacific region may be more sensitive to economic, political, social or legal changes in countries in the Asia Pacific region, which could adversely affect the Fund’s investments. The Fund may be exposed to Asia Pacific risk in connection with its investments in companies economically tied to China and Japan, as well as Hong Kong and Australia.

- **China.** China’s government exercises significant control over its capital markets and currency markets, including its securities markets. China is also an emerging market. The Fund’s investments may be affected by currency and exchange rate fluctuations, price volatility, illiquidity and trading restrictions, which can differ between China’s stock exchanges and stock exchanges that list securities of companies economically tied to China. Changes in the regulatory, monetary or socioeconomic policies in China, and limitations on access to China issuers (including limitations on access through variable interest entities (VIEs)), could adversely affect the Fund’s investments in China. Foreign investors, such as the Fund, may face different risks than domestic investors when investing in companies in China, especially with respect to lack of transparency, fraud, volatility, corporate incentives, macro-economic shocks, national security and changes in US-China policy. China’s policies can also impact securities of companies economically tied to Hong Kong and Taiwan. See “Additional Risks of Investing in our Funds” for specific risks of investing in companies economically tied to China.

- **Japan Risks.** Investments in Japanese companies may be negatively impacted by economic, political and social instability. Historically, Japan’s economy has been adversely affected by governmental interventions and economic protectionism. Japan is a small island state with limited access to natural resources and relies on imports for its commodity and materials inputs.

**Currency and Currency Exchange Risks.** The Fund’s currency is US Dollars, while some of its investments are denominated in foreign currencies. Foreign currencies may fluctuate against the US Dollar and some foreign currencies are more volatile, especially during times of economic stress, and foreign
countries may limit trading or repatriation of currencies. The Fund’s NAV could be affected by a change in foreign currency exchange rates. The Fund may incur costs associated with exchanging dollars into foreign currencies, and vice versa, for investing in foreign securities. The value of Fund shares could decline if the foreign currency of a market in which the Fund invests declines against the US Dollar.

- **China Currency Risk.** The Fund’s investments in Chinese issuers are subject to risks associated with China’s currency, which is subject to economic objectives of China’s government including devaluation. China has only comparatively recently moved from a pegged currency to a managed float. China’s currency, the Renminbi Yuan, is not completely freely tradable and may not at all times reflect economic fundamentals of China’s economy. The value of the Renminbi Yuan is subject to changes based on the economic objectives of the Chinese government, including devaluation in order to improve the competitiveness of Chinese goods in an effort to improve the Chinese balance of trade.

- **Other Currency Risk.** Currencies of some countries in the Asia Pacific region are subject to greater volatility as compared to the US dollar. Currency volatility is relative and can be periodic. For some countries, their currency may not reflect entirely the fundamental components of a country’s economy. For other countries, such as Australia (Australia Dollar), currency volatility is relatively low over longer terms. Some currencies trade only in local markets and may be more volatile than other currencies. The Fund could pay more if it had to acquire a foreign currency when the amplitude of its volatility is high as measured against the US Dollar.

Foreign Securities Market Risks. Foreign securities markets generally have lower trading volumes than U.S. markets, which means it may be more difficult for the Fund to buy or sell foreign securities. Additionally, trading on foreign securities markets may involve longer settlement periods and higher transaction costs. Some foreign securities markets are closed to trading for extended periods (foreseeable and unplanned), which could make the Fund’s holdings in those markets illiquid or hard to value. Government oversight of foreign stock exchanges and brokerage industries may be less stringent than in the United States. Some foreign securities markets restrict access by non-domestic investors. The Fund’s investments in securities traded on foreign markets could make this Fund more risky than a fund that only invests in securities traded on US exchanges.

Emerging Markets Risks. The Fund may invest in companies in emerging markets, including China. Emerging market countries may generally have less established economies, smaller capital markets and greater social, economic, regulatory or political risks. These factors could contribute to increased volatility, liquidity risks and valuation risks. These risks apply to direct holdings in foreign companies and to holdings in depository receipts for foreign companies.

Expropriation Risk. Investments in foreign countries are subject to expropriation risk, and the risk that foreign governments act to limit investment in foreign securities, through exchange controls, currency restrictions and taxation. There can be limits on the Fund’s ability to pursue and collect a legal judgment against a foreign government if an expropriation event occurs.

Other Principal Risks

- **Management Risk.** The Fund’s strategy may not achieve its investment objective; the portfolio managers’ qualitative judgments about portfolio companies or their securities may be incorrect or the Adviser might not properly implement the strategy.

- **Capitalization Risk.** The Fund invests in companies with a range of capitalizations, including small cap (under US$1 billion), medium cap (under US$5 billion) and large cap (US$10 billion or more). Small cap and medium cap companies may be more susceptible to financial downturns, have limited product lines, may be illiquid or experience volatility and may have limited financial resources. Large cap companies may
have frequent price changes based on general economic conditions and may be adversely affected by
declines among lines of business, and may be less agile in responding to market and product challenges.
Investing in small-cap and medium-cap companies may make the Fund more risky than a fund that only
invests in securities of larger capitalization companies.

**Liquidity Risk.** The Fund invests in securities, which may become illiquid, and there is liquidity risk
associated with the Fund’s own shares. Securities in which the Fund invests could become illiquid, which
means that the securities cannot be sold within seven days under current market conditions without
significantly affecting the price at which the investment is carried on the Fund’s books. Investments that
become illiquid may be more difficult to value. The Fund may be more sensitive to this risk because it
invests in non-US securities. Some of the foreign markets in which the Fund invests may be closed for
national holidays or other reasons, which may cause some holdings to be illiquid. Illiquidity in portfolio
securities could cause the Fund’s shares to trade at a premium or discount. The Fund has adopted a liquidity
risk management program to manage liquidity risk of its underlying portfolio.

**Fund Cybersecurity Risk.** Cybersecurity risk applies to the Fund, its service providers and the companies
in which the Fund invests. Cybersecurity risk includes breaches, intentional or unintended, that may impact
a company’s ability to operate, and could include data corruption, theft or loss, improper access to
proprietary information, or interference with technology operations. Companies could suffer losses due to
cybersecurity events, including fines, penalties, reputational injuries, as well as financial losses and legal
and compliance expenses. Cybersecurity risks of the Fund include risks applicable to the Fund’s service
providers. While the Fund and its service providers have established cybersecurity defenses, there is no
guarantee that these defenses will be effective.

### Risks of Investing in ETFs

- **Shares May Trade At Prices Other Than NAV.** “ETF Shares” are the Fund’s individual exchange-
traded shares, which are listed for trading on the NYSE Arca. Shares are bought and sold in the
secondary market at a market price. The Fund’s NAV is calculated once per day, at the end of the day.
The market price of an ETF Share on the exchange could be higher than the NAV (premium), or lower
than the NAV (discount).

  - **Market Price could vary from NAV.** The market price of an ETF Share on the exchange can
change throughout the day and may differ from the Fund’s NAV per share, which is calculated only
once per day, at the end of the day.

  - **Market Price could vary from NAV due to foreign holdings.** The Fund will hold shares of non-
U.S. securities traded in local markets that close at a different time than the NYSE Arca. During
the time when the NYSE Arca is open but after the applicable local market has closed, the price of
a foreign security that is held by the Fund and included in the Fund’s NAV will be the most recent
closing price in that security’s local market, updated for currency changes, until that local market
opens again. In that case, the prices used in calculating the Fund’s NAV may be based on closing
prices of securities traded in non-U.S. markets that have not been updated, except for currency
changes. When all or a portion of the Fund’s portfolio consists of securities traded in a market that
is closed when the market for the Fund’s shares is open, there could be differences between the
value of ETF shares and the value of the Fund’s underlying portfolio. This could lead to differences
between the market price of the ETF Shares and the underlying value of the Fund shares. These
differences can be magnified during times of significant market activity and could contribute to the
ETF Shares trading at a premium or discount.

  - **Costs of buying, selling or holding Fund Shares.** Purchases and sales of ETF Shares on the
exchange through a broker may incur a brokerage charge or commission, frequently a fixed amount;
this may be a significant proportional cost for investors transacting in small numbers of shares. The
difference between the price investors are willing to pay for ETF Shares (the “bid” price) and the price at which investors are willing to sell ETF Shares (the “ask” price) is called the “spread.” The spread with respect to ETF Shares varies over time based on the Fund’s trading volume and market liquidity, and is generally lower (or “narrower”) if the Fund has a lot of trading volume and market liquidity and higher (or “wider”) if the Fund has little trading volume and market liquidity. When the spread widens, or when premiums or discounts become larger than usual, particularly in times of market stress, investors may pay significantly more or receive significantly less than the underlying value of the Fund shares when they buy or sell ETF Shares in the secondary market. Because of the costs of buying and selling shares of the Fund, frequent trading may reduce investment returns. You could lose money if you sell your shares at a point when the market price is below the Fund’s NAV.

Information about the Fund’s spread. The Fund’s website will contain information about each Fund’s per share NAV, closing market price, premiums and discounts, and the median bid/ask spread. If a Fund’s premium or discount exceeds 2% for more than 7 consecutive trading days, the website will also disclose the factors that the investment adviser reasonably believes materially contribute to this trading premium or discount.

- **Cash Redemption Risk.** The Fund may be required to sell portfolio securities if it is required to pay cash in redemption of Creation Units to Authorized Participants. Generally, the Fund will effectuate redemptions in kind. For some portfolio holdings traded in specific foreign markets that do not permit in-kind transfers, the Fund will need to sell securities and deliver cash to redeeming Authorized Participants. There is a risk that the Fund could lose money if it had to sell its securities in times of overall market turmoil or when the Fund’s portfolio securities have declined in value, or if the securities become illiquid. Selling securities could generate capital gains, and cause the Fund to incur brokerage expenses and could result in tax consequences.

- **Redemption Risk.** ETF Shares are not individually redeemable. The Fund only redeems ETF Shares in Creation Units, which are large blocks of shares, from Authorized Participants. If you want to liquidate some or all of your investment in shares of the Fund, you would have to sell them on the secondary market at prevailing market prices, which may be lower than NAV.

- **Absence of Active Trading Market Risk.** Although ETF Shares will be listed on the NYSE Arca exchange, there is no guarantee that an active trading market for Fund shares will exist at all times. In times of market stress, markets can suffer erratic or unpredictable trading activity, extraordinary volatility or wide bid/ask spreads, which could cause some market makers and Authorized Participants to reduce their market activity or “step away” from making a market in ETF Shares, and market makers and Authorized Participants are not obligated to place or execute purchase and redemption orders. This could cause the Fund’s market price to deviate, materially, from the NAV, and reduce the effectiveness of the Fund arbitrage process (that is, arbitrage will be less effective at keeping the market price of ETF Shares aligned closely with the value of its underlying portfolio). Trading in ETF Shares on the NYSE Arca exchange may be halted if individual or market-wide “circuit breakers” are activated (circuit breakers halt trading for a specific period of time when the price of a particular security or overall market prices decline by a pre-determined percentage). Trading of ETF Shares also could be halted if (1) the shares are delisted from the NYSE Arca exchange without first being listed on another exchange or (2) NYSE Arca exchange officials determine that halting is appropriate in the interest of a fair and orderly market or to protect investors. Any absence of an active trading market for ETF Shares could lead to a heightened risk that there will be a difference between the market price of an ETF Share and the underlying value of the ETF Share.

- **Authorized Participant Risk.** Only a limited number of financial institutions that enter into an authorized participant agreement with the Fund may engage in creation or redemption transactions. If the Fund’s Authorized Participants decide not to create or redeem shares, shares may trade at a premium or discount to the Fund’s net asset value. This risk could be heightened because the Fund will invest in non-U.S.
securities, which may be traded outside a collateralized settlement system. In such a case, Authorized
Participants may be required to post collateral for some trades on an agency basis (that is, on behalf of other
market participants), which only a limited number of Authorized Participants may be willing to do. This
risk could also be heightened because the Fund uses a focused investment strategy. If Authorized
Participants do not proceed with creation and redemption orders for shares, the Fund’s share price could
trade at a discount to NAV and could face trading halts or de-listing.

For more information on the risks of investing in this Fund, please see the Principal Risks and Additional Risks of
Investing in our Funds in the Prospectus. You may also refer to the section Risk Factors and Special Considerations
in the Statement of Additional Information.

Performance

The bar chart and table below provide some indication of the risks of investing in the SmartETFs Advertising &
Marketing Technology ETF by showing how the fund’s performance has varied from year to year and by showing
how the average annual total returns of the Fund compare with the average annual total returns of a broad-based
market index. Unlike the Fund’s returns, the index returns do not reflect any deductions for fees, expenses or taxes.
For additional information on these indices, please see Index Descriptions in the prospectus. Updated performance
information is available from the Fund’s website, www.smartetfs.com. Past performance does not necessarily
indicate how the Fund will perform in future periods.

The annual returns bar chart demonstrates the risks of investing in the SmartETFs Advertising & Marketing
Technology ETF by showing how the Fund’s performance has varied from year to year. The table below also
demonstrates these risks by showing how the Fund’s average annual returns compare with those of a broad-based
securities market index. Unlike the Fund’s returns, the index returns do not reflect any deductions for fees, expenses
or taxes. For additional information on these indices, please see Index Descriptions in the prospectus. Past

\(^{(1)}\) After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In certain cases, the figure representing “Return After Taxes on Distributions and Sale of Fund Shares” may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor.

### Investment Adviser

Guinness Atkinson™ Asset Management, Inc. serves as the Fund’s investment adviser. For more information on the Investment Adviser, please see Management of the Fund in the prospectus and the Investment Adviser in the Statement of Additional Information. All security analysis and selection is provided by the Investment Adviser.

### Investment Sub-Adviser

Penserra Capital Management, LLC (“Penserra”) serves as a sub-adviser to provide limited services to the Investment Adviser as needed in connection with various functions related to portfolio management, including, but not limited to, investing cash inflows, implementing investment strategy, researching and reviewing investment strategy, and overseeing members of their portfolio management team with more limited responsibilities.

### Portfolio Managers

Sagar Thanki is the portfolio manager of the Fund since inception. Mr. Thanki has been associated with the Adviser since 2017. Dustin Lewellyn, Ernesto Tong and Anand Desai are the portfolio managers of the sub-adviser responsible for the Fund. Mr. Lewellyn has been with Penserra since 2012, and Messrs. Tong and Desai have been with Penserra since 2015. Together, these individuals are jointly and primarily responsible for the day-to-day management of the Fund’s portfolio.

For additional information, please see Portfolio Management in the prospectus and Portfolio Manager in the Statement of Additional Information.

### Purchase and Sale of Fund Shares

SmartETFs Advertising & Marketing Technology ETF is traded on the NYSE Arca exchange. Individual Fund shares may only be bought and sold in the secondary market (the exchange) through a broker or dealer at a market price. If you wish to purchase or sell Fund shares, you should contact your broker. You may incur a brokerage fee when purchasing or selling Fund shares. Because Fund shares trade on an exchange at a market price rather than at the net asset value, Fund shares may trade at a price greater than net asset value (premium) or less than net asset value (discount). You may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Fund shares (bid) and the lowest price a seller is willing to accept for Fund shares (ask) when buying or selling shares in the secondary market (the “bid-ask spread”).
Information about the Fund’s net asset value, market price, premiums and discounts, and bid-asks spreads are available on the Fund’s website at www.smartetfs.com.

Only certain large investors that have contractually agreed to be, and have been designated as, Authorized Participants are able to purchase and redeem large blocks of ETF Shares directly with the Fund. Purchase and redemption activity conducted by Authorized Participants directly with the Fund will be done in increments of 10,000 share Creation Units. A Transaction Fee of $350 per Creation Unit transaction is charged to Authorized Participants who create or redeem shares in Creation Units. The Fund will issue or redeem Creation Units in return for a basket of assets that the Fund specifies each day and are effected at the net asset value (“NAV”) next determined after the receipt of an order in proper form. The value of the minimum initial or subsequent investment by an Authorized Participant varies with the value of the basket of assets specified by the Fund each day. ETF Shares may only be purchased or redeemed in Creation Units by submitting an order to the Fund’s transfer agent. More information about the purchase and sale of ETF Shares in Creation Units can be found in the Fund’s Statement of Additional Information under “Purchase and Redemption of Shares in Creation Units”.

Tax Information

The Fund intends to make distributions that will be taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Withdrawals from such tax-deferred arrangements may be taxable at the time of withdrawal. For additional information, please see Distributions and Taxes in the prospectus and Tax Matters in the Statement of Additional Information.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Adviser and its related companies may pay the intermediary for services related to the sale of Fund shares, which include participation in activities designed to inform intermediaries about the Fund, as well as marketing, education and training initiatives concerning the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary or your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
SUMMARY SECTION

SmartETFs Asia Pacific Dividend Builder ETF

Investment Objective

SmartETFs Asia Pacific Dividend Builder ETF’s investment objective is to provide investors with dividend income and long-term capital growth.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of SmartETFs Asia Pacific Dividend Builder ETF. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.

<table>
<thead>
<tr>
<th>Shareholder Fees (fees paid directly from your investment)</th>
<th>None</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Annual Fund Operating Expenses</strong> (expenses that you pay each year as a percentage of the value of your investments)</td>
<td></td>
</tr>
<tr>
<td>Management Fees:</td>
<td>0.75%</td>
</tr>
<tr>
<td>Distribution and Service (12b-1) Fees:</td>
<td>None</td>

</tbody>
</table>

¹ The Adviser has contractually agreed to reduce its fees and/or pay ETF expenses (excluding acquired fund fees and expenses, interest, taxes, dividends on short positions and extraordinary expenses) in order to limit the Fund’s total annual fund operating expenses to 0.78% through June 30, 2026. This contractual arrangement may be terminated by the Board of the Fund at any time without penalty upon 60 days’ notice.

Example

This Example is intended to help you compare the cost of investing in SmartETFs Asia Pacific Dividend Builder ETF with the cost of investing in other investment companies. The Example assumes that you invest $10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. This Example does not include brokerage commissions that you may pay to buy and sell shares. Although your actual costs may be higher or lower, under these assumptions, your costs would be:

<table>
<thead>
<tr>
<th></th>
<th>1 Year</th>
<th>3 Years</th>
<th>5 Years</th>
<th>10 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>$10,000</td>
<td>$80</td>
<td>$249</td>
<td>$1,368</td>
<td>$4,172</td>
</tr>
</tbody>
</table>

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in the annual fund operating expenses or in the Example, affect the Fund’s performance. During the Fund’s most recent fiscal year ended December 31, 2022, the Fund’s portfolio turnover rate was 7.27% of the average value of its portfolio.
Principal Investment Strategies

The SmartETFs Asia Pacific Dividend Builder ETF invests at least 80% of its net assets (plus any borrowings for investment purposes) in publicly-traded, dividend-producing equity securities of companies that are tied economically to countries in the Asia Pacific region (as defined later in this Prospectus). Equity securities may include common stocks, preferred stocks, securities convertible into common stocks, rights and warrants. In the Adviser’s view, investing in dividend-paying stocks permits investors to gain access to the more established companies in the region. In the Adviser’s view, “dividend builder” refers to a dividend-paying company which the Adviser believes will experience increasing dividends over time. The Adviser seeks to invest in companies that have returned a real cash flow (cash flow adjusted for inflation) on investment of at least 8% for each of the last eight years, and, in the opinion of the Adviser, are likely to grow their dividend over time; however, this is one of several criteria used by the Adviser and it is possible that not all investments may meet this criterion.

Under normal market conditions the Asia Pacific Dividend Builder ETF will invest in companies economically tied to at least four different countries in the Asia Pacific region, which may be developed or emerging markets and which may include Australia, China, Hong Kong, Singapore, and Taiwan. For more information about how the Adviser determines that a company is economically tied to a foreign country or the Asia Pacific region, see section “More About Each Fund’s Investment Strategies and Risks” in this Prospectus. The Fund’s allocations among countries in the Asia Pacific region may vary depending on changing market conditions (including but not limited to, liquidity, volatility, and the number of companies meeting selection criteria). The Fund will invest in companies in emerging market countries, including China. The Fund’s currency is US Dollars, while some of its investments are denominated in foreign currencies.

The Fund is actively managed, meaning the Adviser will select the Fund’s holdings based on its own research and evaluation process. In determining whether to buy or sell a portfolio position, the Adviser uses proprietary and independent research and applies traditional fundamental analysis to assess a company’s business and business prospects, market capitalization, the valuation of the company, its dividend history, its ratio of debt to equity, and its potential for consistent, real (after inflation) dividend growth while maintaining company value. While the Fund does not concentrate its investments in any one industry, from time to time, based on changing market conditions and the number of companies meeting selection criteria, the Fund may make significant investments in certain industries.

The Fund may invest up to 20% of its portfolio in securities of companies that are outside of the Asia Pacific region. These companies will generally be in the developed markets, including in the US and the UK.

Typically, the Fund will hold around 35 positions of approximately equal weight, but the portfolio may vary over time. Under normal market conditions, the Fund may have as few as 25 holdings, or as many as 75 holdings. The Fund may invest in companies of any market capitalization size, but under normal market conditions, the Fund will invest in companies with a minimum market capitalization of $500 million. Additional information on Principal Investment Strategies can be found in the prospectus. Also see Additional Investment Strategies and Risks in the Statement of Additional Information.

For temporary defensive purposes, any portion of the Fund’s total assets may be invested in cash and cash equivalents, including money market funds, to respond to adverse market, economic, political or other conditions, which could adversely affect the Fund’s ability to achieve its investment objective. While the Fund is applying this temporary defensive strategy, it may be unable to achieve its investment objective.

The Fund is designed for investors who seek dividend income and long-term capital appreciation through focused investment in dividend-producing stocks of companies economically tied to the Asia Pacific region.
Principal Risks

You can lose money by investing in shares of SmartETFs Asia Pacific Dividend Builder ETF and investing in shares of this Fund may be more risky than investing in a fund that only invests in U.S. securities due to increased volatility of foreign markets. Risks associated with an investment in the Fund can increase during times of market volatility. There can be no assurance that the Fund will achieve its investment objective.

The Fund is subject to the following risks, which could affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return or the Fund’s ability to meet its investment objective. These risks are also described in the “Principal Risks” and “Risks of Investing in Our Fund” sections of this prospectus and in the Fund’s Statement of Additional Information. You can lose money by investing in shares of this Fund.

- **Dividend Paying Securities Risk.** The Fund invests in securities that pay dividends. There is no guarantee that the securities held by the Fund will declare or pay dividends in the future, or that dividends will remain at current levels or increase.

- **Equity Securities Risk.** The Fund invests in publicly-traded equity securities, and their value may fluctuate, sometimes rapidly and unpredictably, which means a security may be worth more or less than when it was purchased. These fluctuations can be based on a variety of factors including a company’s financial condition as well as macro-economic factors such as interest rates, inflation rates, global market conditions, and non-economic factors such as market perceptions and social or political events.

- **Market Risk.** General market conditions can affect the value of the Fund’s securities holdings. Market risk applies to individual securities, a particular sector or the entire economy. Recently, global financial markets have experienced a period of extreme stress which has resulted in unusual and extreme volatility in the equity markets and in the prices of individual securities. In some cases, the prices of securities issued by individual companies have been negatively impacted even though there may be little or no apparent degradation in the financial conditions or prospects of that company. Global events, financial market shocks or interest rate events could cause equity securities generally to decline in value, including if fixed income securities become more favorable. These market conditions add significantly to the risk of short term volatility of the Fund.

- **Global Risks.** The Fund invests in companies in multiple countries within the Asia Pacific region, and companies in which the Fund invests may experience differing outcomes with respect to safety and security, economic uncertainties, natural and environmental conditions, health conditions (including pandemics such as Covid-19) and/or systemic market dislocations (including market dislocations due to events outside a company’s country or region, including supply chain events). The global interconnectivity of industries and companies, especially with respect to goods, can be negatively impacted by events occurring beyond a company’s principal geographic location. These events can contribute to volatility, valuation and liquidity issues, and can affect specific companies, countries, regions and global markets.

  - **Pandemic Risk.** In 2020, markets globally were impacted by the Covid-19 pandemic, which is ongoing. This pandemic adversely affected industries, including supply chains, as well as general financial conditions, and has resulted in restrictions on commercial activity (shutdowns), interruptions in labor and supply markets, economic stimulus packages and other governmental interventions, and reallocation of market resources. Total economic effects of Covid-19 cannot be predicted. Covid-19 may continue in the foreseeable future and could adversely affect companies in the Fund’s portfolio, including by affecting their operating capabilities or their willingness or ability to pay dividends, which could negatively impact stock prices as well as yield.
Risks of Investing in Asia Pacific Securities:

- Asia Pacific stock markets may experience volatility and instability, and these risks can apply to entire economies, particular sectors and particular securities. Asia Pacific stocks could rise or fall with changes in economic or political circumstances in specific countries, may fall out of favor with investors, and currencies of countries in the Asia Pacific region may decline in comparison to the U.S. dollar. Stocks economically tied to the Asia Pacific region may be more sensitive to economic, political, social or legal changes in countries in the Asia Pacific region, which could adversely affect the Fund’s investments.

  - **Australia.** Australia’s economy is more dependent than others on exports, especially in commodities, and key trading relationships with the US, China, Japan, Singapore, the UK and other European countries. Reduction in demand for commodities and services could adversely affect companies in Australia.

  - **China.** China’s government exercises significant control over its capital markets and currency markets, including its securities markets. China is also an emerging market. The Fund’s investments may be affected by currency and exchange rate fluctuations, price volatility, illiquidity and trading restrictions, which can differ between China’s stock exchanges and stock exchanges that list securities of companies economically tied to China. Changes in the regulatory, monetary or socioeconomic policies in China, and limitations on access to China issuers (including limitations on access through variable interest entities (VIEs)), could adversely affect the Fund’s investments in China. Foreign investors, such as the Fund, may face different risks than domestic investors when investing in companies in China, especially with respect to lack of transparency, fraud, volatility, corporate incentives, macro-economic shocks, national security and changes in US-China policy. China’s policies can also impact securities of companies economically tied to Hong Kong and Taiwan. See “Additional Risks of Investing in our Funds” for specific risks of investing in companies economically tied to China.

  - **Hong Kong.** Hong Kong companies could be adversely affected by changes in Hong Kong’s relationship with China, of which Hong Kong is a special administrative district. Recent changes in the political and legal structure in Hong Kong (but not the economic structure) could adversely affect companies in Hong Kong. Global reaction to China’s actions with respect to Hong Kong could also adversely affect the Fund’s investments in companies economically tied to Hong Kong. See “Additional Risks of Investing in our Funds” for specific risks of investing in companies economically tied to Hong Kong.

  - **Singapore.** Singapore’s economy relies heavily on exports and trade relationships with other countries. Singapore companies could be adversely affected by changes in its relationships with other countries in the Asia-Pacific region, as well as economic or political developments in other Asian nations that are key trading partners of Singapore.

  - **Taiwan.** Taiwan’s economy is more sensitive than others to changes in exports and global trading, and to tensions in Taiwan’s relationship with China. Tensions between Taiwan and China could materially adversely affect companies in Taiwan.

Risks Associated with Investments in Companies outside the United States.

- **Investing in Non US Companies.** Investing in companies outside the U.S., including in countries in Europe and Asia, involves different and additional political, social, economic, legal and regulatory risks, based on the size of their securities markets, competition for investments, interest rates, global or foreign trade activities (restrictions and tariffs or threats of changes to restrictions or tariffs), and changes in the global economy, such as “Brexit”, the withdrawal of the United Kingdom from the European Union (EU), as well as changes due to global or coordinated sanctions activities. Impacts of Brexit are likely to be higher on
companies with significant contacts with the United Kingdom, including companies in Europe. Non-US companies, whether in developed or emerging markets, may be more sensitive to these factors, which can increase volatility, reduce liquidity and negatively affect economic growth. The Fund’s ability to access foreign securities markets can be limited, which can affect availability, liquidity and pricing of foreign securities.

- **Sensitivity to global events.** Non US securities may be more sensitive to changes in global economic activity, including interest rates as well as trading activity, including trade restrictions, tariffs, or threats of changes to restrictions or tariffs. These companies may be more sensitive to global economic transitions and stresses, such as Brexit, central bank or government interventions (commonly involving interest rates but also stimulus and sanctions). Investing in non-US securities can also expose the Fund to risks associated with the potential imposition of economic or other sanctions against a particular country, or businesses or industries, including trade restrictions or tariffs (or threats thereof).

- **Legal, Accounting, Audit and Disclosure may vary.** Foreign countries have different legal, accounting, auditing and financial disclosure systems, which may make information about companies more difficult to understand, and less information may be available. Under foreign legal systems, different standards may apply for foreign governments to take over assets, restrict the ability to exchange currency or restrict the delivery of securities. Some foreign companies may be subject to special restrictions in U.S. markets due to non-compliance with U.S. audit inspection standards.

- **Currency and Currency Exchange Risks.** The Fund’s currency is US Dollars, while some of its investments are denominated in foreign currencies. Foreign currencies may fluctuate against the US Dollar and some foreign currencies are more volatile, especially during times of economic stress, and foreign countries may limit trading or repatriation of currencies. The Fund’s NAV could be affected by a change in foreign currency exchange rates. The Fund may incur costs associated with exchanging dollars into foreign currencies, and vice versa, for investing in foreign securities. The value of Fund shares could decline if the foreign currency of a market in which the Fund invests declines against the US Dollar.

  - **China Currency Risk.** The Fund’s investments in Chinese issuers are subject to risks associated with China’s currency, which is subject to economic objectives of China’s government including devaluation. China has only comparatively recently moved from a pegged currency to a managed float. China’s currency, the Renminbi Yuan, is not completely freely tradable and may not at all times reflect economic fundamentals of China’s economy. The value of the Renminbi Yuan is subject to changes based on the economic objectives of the Chinese government, including devaluation in order to improve the competitiveness of Chinese goods in an effort to improve the Chinese balance of trade.

  - **Other Currency Risk.** Currencies of some countries in the Asia Pacific region are subject to greater volatility as compared to the US dollar. Currency volatility is relative and can be periodic. For some countries, their currency may not reflect entirely the fundamental components of a country’s economy. For other countries, such as Australia (Australia Dollar), currency volatility is relatively low over longer terms. Some currencies, such as South Korea (Won), Taiwan (New Taiwan Dollar), Singapore (Singapore Dollar) and India (Rupee), trade only in local markets and may be more volatile than other currencies. The Fund could pay more if it had to acquire a foreign currency when the amplitude of its volatility is high as measured against the US Dollar.

- **Foreign Securities Market Risks.** Foreign securities markets generally have lower trading volumes than U.S. markets, which means it may be more difficult for the Fund to buy or sell foreign securities. Additionally, trading on foreign securities markets may involve longer settlement periods and higher transaction costs. Some foreign securities markets are closed to trading for extended periods (foreseeable and unplanned), which could make the Fund’s holdings in those markets illiquid or hard to value.
Government oversight of foreign stock exchanges and brokerage industries may be less stringent than in the United States. Some foreign securities markets restrict access by non-domestic investors. The Fund’s investments in securities traded on foreign markets could make this Fund more risky than a fund that only invests in securities traded on US exchanges.

- **Emerging Markets Risks.** The Fund may invest in companies in emerging markets, including China. Emerging market countries may generally have less established economies, smaller capital markets and greater social, economic, regulatory or political risks. These factors could contribute to increased volatility, liquidity risks and valuation risks. These risks apply to direct holdings in foreign companies and to holdings in depository receipts for foreign companies.

- **Expropriation Risk.** Investments in foreign countries are subject to expropriation risk, and the risk that foreign governments act to limit investment in foreign securities, through exchange controls, currency restrictions and taxation. There can be limits on the Fund’s ability to pursue and collect a legal judgment against a foreign government if an expropriation event occurs.

**Other Principal Risks**

- **Management Risk.** The Fund’s strategy may not achieve its investment objective; the portfolio managers’ qualitative judgments about portfolio companies or their securities may be incorrect or the Adviser might not properly implement the strategy.

- **Capitalization Risk.** The Fund invests in companies with a range of capitalizations, including small cap (under US$1 billion), medium cap (under US$5 billion) and large cap (US$10 billion or more). Small cap and medium cap companies may be more susceptible to financial downturns, have limited product lines, may be illiquid or experience volatility and may have limited financial resources. Large cap companies may have frequent price changes based on general economic conditions and may be adversely affected by declines among lines of business, and may be less agile in responding to market and product challenges. Investing in small cap and medium cap companies may make the Fund more risky than a fund that only invests in securities of larger capitalization companies.

- **Liquidity Risk.** The Fund invests in securities, which may become illiquid, and there is liquidity risk associated with the Fund’s own shares. Securities in which the Fund invests could become illiquid, which means that the securities cannot be sold within seven days under current market conditions without significantly affecting the price at which the investment is carried on the Fund’s books. Investments that become illiquid may be more difficult to value. The Fund may be more sensitive to this risk because it invests in non-US securities. Some of the foreign markets in which the Fund invests may be closed for national holidays or other reasons, which may cause some holdings to be illiquid. Illiquidity in portfolio securities could cause the Fund’s shares to trade at a premium or discount. The Fund has adopted a liquidity risk management program to manage liquidity risk of its underlying portfolio.

- **Fund Cybersecurity Risk.** Cybersecurity risk applies to the Fund, its service providers and the companies in which the Fund invests. Cybersecurity risk includes breaches, intentional or unintended, that may impact a company’s ability to operate, and could include data corruption, theft or loss, improper access to proprietary information, or interference with technology operations. Companies could suffer losses due to cybersecurity events, including fines, penalties, reputational injuries, as well as financial losses and legal and compliance expenses. Cybersecurity risks of the Fund include risks applicable to the Fund’s service providers. While the Fund and its service providers have established cybersecurity defenses, there is no guarantee that these defenses will be effective.
Risks of Investing in ETFs

- **Shares May Trade At Prices Other Than NAV.** “ETF Shares” are the Fund’s individual exchange-traded shares, which are listed for trading on the NYSE Arca. Shares are bought and sold in the secondary market at a market price. The Fund’s NAV is calculated once per day, at the end of the day. The market price of a Share on the exchange could be higher than the NAV (premium), or lower than the NAV (discount).

  - *Market Price could vary from NAV.* The market price of an ETF Share on the exchange can change throughout the day and may differ from the Fund’s NAV per share, which is calculated only once per day, at the end of the day.

  - *Market Price could vary from NAV due to foreign holdings.* The Fund will hold shares of non-U.S. securities traded in local markets that close at a different time than the NYSE Arca. During the time when the NYSE Arca is open but after the applicable local market has closed, the price of a foreign security that is held by the Fund and included in the Fund’s NAV will be the most recent closing price in that security’s local market, updated for currency changes, until that local market opens again. In that case, the prices used in calculating the Fund’s NAV may be based on closing prices of securities traded in non-U.S. markets that have not been updated, except for currency changes. When all or a portion of the Fund’s portfolio consists of securities traded in a market that is closed when the market for the Fund’s shares is open, there could be differences between the value of ETF shares and the value of the Fund’s underlying portfolio. This could lead to differences between the market price of the ETF Shares and the underlying value of the Fund shares. These differences can be magnified during times of significant market activity and could contribute to the ETF Shares trading at a premium or discount.

  - *Costs of buying, selling or holding Fund Shares.* Purchases and sales of ETF Shares on the exchange through a broker may incur a brokerage charge or commission, frequently a fixed amount; this may be a significant proportional cost for investors transacting in small numbers of shares. The difference between the price investors are willing to pay for ETF Shares (the “bid” price) and the price at which investors are willing to sell ETF Shares (the “ask” price) is called the “spread.” The spread with respect to ETF Shares varies over time based on the Fund’s trading volume and market liquidity, and is generally lower (or “narrower”) if the Fund has a lot of trading volume and market liquidity and higher (or “wider”) if the Fund has little trading volume and market liquidity. When the spread widens, or when premiums or discounts become larger than usual, particularly in times of market stress, investors may pay significantly more or receive significantly less than the underlying value of the Fund shares when they buy or sell ETF Shares in the secondary market. Because of the costs of buying and selling shares of the Fund, frequent trading may reduce investment returns. You could lose money if you sell your shares at a point when the market price is below the Fund’s NAV.

  - *Information about the Fund’s spread.* The Fund’s website will contain information about each Fund’s per share NAV, closing market price, premiums and discounts, and the median bid/ask spread. If a Fund’s premium or discount exceeds 2% for more than 7 consecutive trading days, the website will also disclose the factors that the investment adviser reasonably believes materially contribute to this trading premium or discount.

- **Cash Redemption Risk.** The Fund may be required to sell portfolio securities if it is required to pay cash in redemption of Creation Units to Authorized Participants. Generally, the Fund will effectuate redemptions in kind. For some portfolio holdings traded in specific foreign markets that do not permit in-kind transfers, the Fund will need to sell securities and deliver cash to redeeming Authorized Participants. There is a risk that the Fund could lose money if it had to sell its securities in times of overall market turmoil or when the Fund’s portfolio securities have declined in value, or if the securities become illiquid. Selling securities
could generate capital gains and cause the Fund to incur brokerage expenses, and could result in tax consequences.

- **Redemption Risk.** ETF Shares are not individually redeemable. The Fund only redeems ETF Shares in Creation Units, which are large blocks of shares, from Authorized Participants. If you want to liquidate some or all of your investment in shares of the Fund, you would have to sell them on the secondary market at prevailing market prices, which may be lower than NAV.

- **Absence of Active Trading Market Risk.** Although Fund Shares will be listed on the NYSE Arca exchange, there is no guarantee that an active trading market for Fund shares will exist at all times. In times of market stress, markets can suffer erratic or unpredictable trading activity, extraordinary volatility or wide bid/ask spreads, which could cause some market makers and Authorized Participants to reduce their market activity or “step away” from making a market in ETF Shares, and market makers and Authorized Participants are not obligated to place or execute purchase and redemption orders. This could cause the Fund’s market price to deviate, materially, from the NAV, and reduce the effectiveness of the ETF arbitrage process (that is, arbitrage will be less effective at keeping the market price of ETF Shares aligned closely with the value of its underlying portfolio). Trading in ETF Shares on the NYSE Arca exchange may be halted if individual or market-wide “circuit breakers” are activated (circuit breakers halt trading for a specific period of time when the price of a particular security or overall market prices decline by a pre-determined percentage). Trading of ETF Shares also could be halted if (1) the shares are delisted from the NYSE Arca exchange without first being listed on another exchange or (2) NYSE Arca exchange officials determine that halting is appropriate in the interest of a fair and orderly market or to protect investors. Any absence of an active trading market for ETF Shares could lead to a heightened risk that there will be a difference between the market price of an ETF Share and the underlying value of the ETF Share.

- **Authorized Participant Risk.** Only a limited number of financial institutions that enter into an authorized participant agreement with the Fund may engage in creation or redemption transactions. If the Fund’s Authorized Participants decide not to create or redeem shares, shares may trade at a premium or discount to the Fund’s net asset value. This risk could be heightened because the Fund will invest in non-U.S. securities, which may be traded outside a collateralized settlement system. In such a case, Authorized Participants may be required to post collateral for some trades on an agency basis (that is, on behalf of other market participants), which only a limited number of Authorized Participants may be willing to do. This risk could also be heightened because the Fund uses a focused investment strategy. If Authorized Participants do not proceed with creation and redemption orders for shares, the Fund’s share price could trade at a discount to NAV and could face trading halts or de-listing.

For more information on the risks of investing in this Fund, please see the Principal Risks and Additional Risks of Investing in Our Funds in the prospectus. You may also refer to the section Risk Factors and Special Considerations in the Statement of Additional Information.

**Performance**

The following performance information indicates some of the risks of investing in the SmartETFs Asia Pacific Dividend Builder ETF.

The SmartETFs Asia Pacific Dividend Builder ETF acquired the assets and liabilities of the predecessor mutual fund, the Guinness Atkinson Asia Pacific Dividend Builder Fund, on March 26, 2021. As a result of the transaction, the Fund adopted the accounting and performance history of its predecessor mutual fund, the Guinness Atkinson Asia Pacific Dividend Builder Fund. The information shown below is for the predecessor mutual fund. The Fund’s total net operating expense ratio is lower than the net operating expense ratio of the predecessor mutual fund. Returns in the bar chart and table for the predecessor fund have not been adjusted.
The annual returns bar chart demonstrates the risks of investing in the SmartETFs Asia Pacific Dividend Builder ETF by showing how the predecessor mutual fund’s performance has varied from year to year. The table also demonstrates these risks by showing how the predecessor mutual fund’s average annual returns compare with those of a broad-based index. Unlike the predecessor mutual fund’s returns, the index returns do not reflect any deductions for fees, expenses or taxes. For additional information on these indices, please see Index Descriptions in the prospectus. Past performance, before or after taxes, is not indicative of future performance. Updated performance information is available from the Fund’s website, www.smartetfs.com.

The year-to-date return for the Fund as of March 31, 2023, was 3.93%.

During the period shown in the bar chart, the best performance for the predecessor mutual fund for a quarter was 20.34% (for the quarter ended December 31, 2020). The worst performance was -21.11% (for the quarter ended March 31, 2020).

(1) This table shows returns for the predecessor mutual fund. After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their mutual fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In certain cases, the figure representing “Return After Taxes on Distributions and Sale of Fund Shares” may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor.
Investment Adviser

Guinness AtkinsonTM Asset Management, Inc. serves as the Fund’s investment adviser. For more information on the Investment Adviser, please see Management of the Funds in the prospectus and The Investment Adviser in the Statement of Additional Information. All security analysis and selection is provided by the Investment Adviser.

Portfolio Managers

Edmund Harriss and Mark Hammonds are the co-managers of the Fund and are jointly and primarily responsible for the day-to-day management of the Fund’s portfolio. Mr. Harris has been a portfolio manager since inception of the Fund’s predecessor mutual fund in March 2006, and Mr. Hammonds has been the co-portfolio manager of the Fund’s predecessor mutual fund since May 2017.

For additional information, please see Portfolio Management in the prospectus and Portfolio Managers in the Statement of Additional Information.

Purchase and Sale of Fund Shares

SmartETFs Asia Pacific Dividend Builder ETF is traded on the NYSE Arca exchange. Individual Fund shares may only be bought and sold in the secondary market (the exchange) through a broker or dealer at a market price. If you wish to purchase or sell Fund shares, you should contact your broker. You may incur a brokerage fee when purchasing or selling Fund shares. Because Fund shares trade on an exchange at a market price rather than at the net asset value, Fund shares may trade at a price greater than net asset value (premium) or less than net asset value (discount). You may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Fund shares (bid) and the lowest price a seller is willing to accept for Fund shares (ask) when buying or selling shares in the secondary market (the “bid-ask spread”).

Information about the Fund’s net asset value, market price, premiums and discounts, and bid-asks spreads are available on the Fund’s website at www.smartetfs.com.

Only certain large investors that have contractually agreed to be, and have been designated as, Authorized Participants are able to purchase and redeem large blocks of ETF shares directly with the Fund. Purchase and redemption activity conducted by Authorized Participants directly with the Fund will be done in increments of 25,000 share Creation Units. A Transaction Fee of $965 per Creation Unit transaction is charged to Authorized Participants who create or redeem shares in Creation Units, regardless of the number of Creation Units purchased or redeemed by the Authorized Participant on a business day. The Fund will issue or redeem Creation Units in return for a basket of assets that the Fund specifies each day and are effected at the net asset value (“NAV”) next determined after the receipt of an order in proper form. The value of the minimum initial or subsequent investment by an Authorized Participant varies with the value of the basket of assets specified by the Fund each day. ETF Shares may only be purchased or redeemed in Creation Units by submitting an order to the Fund’s transfer agent. More information about the purchase and sale of ETF Shares in Creation Units can be found in the Fund’s Statement of Additional Information under “Purchase and Redemption of Shares in Creation Units”.

Tax Information

The Fund intends to make distributions that will be taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Withdrawals from such tax-deferred arrangements may be taxable at the time of withdrawal. For additional information, please see Distributions and Taxes in the prospectus and Tax Matters in the Statement of Additional Information.
Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Adviser and its related companies may pay the intermediary for services related to the sale of Fund shares, which include participation in activities designed to inform intermediaries about the Fund, as well as marketing, education and training initiatives concerning the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary or your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
**SUMMARY SECTION**

**SmartETFs Dividend Builder ETF**

Investment Objective

SmartETFs Dividend Builder ETF seeks a moderate level of current income and consistent dividend growth at a rate that exceeds inflation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of SmartETFs Dividend Builder ETF. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.

<table>
<thead>
<tr>
<th>Shareholder Fees (fees paid directly from your investment)</th>
<th>None</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Annual Fund Operating Expenses</strong> (expenses that you pay each year as a percentage of the value of your investments)</td>
<td></td>

</tbody>
</table>

¹ The Adviser has contractually agreed to reduce its fees and/or pay Fund expenses (excluding acquired fund fees and expenses, interest, taxes, dividends on short positions and extraordinary expenses) in order to limit the Fund’s total annual operating expenses to 0.65% through June 30, 2026. This contractual arrangement may be terminated by the Board of the Fund at any time without penalty upon 60 days’ notice.

Example

This Example is intended to help you compare the cost of investing in SmartETFs Dividend Builder ETF with the cost of investing in other investment companies. The Example assumes that you invest $10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. This Example does not include brokerage commissions that you may pay to buy and sell shares. Although your actual costs may be higher or lower, under these assumptions, your costs would be:

<table>

<td>$66</td>
<td>$208</td>
<td>$496</td>
<td>$1,316</td>
</tr>
</tbody>
</table>

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when SmartETFs Dividend Builder ETF shares are held in a taxable account. These costs, which are not reflected in the annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year ended December 31, 2022, the Fund’s portfolio turnover rate was 20.66% of the average value of its portfolio.
Principal Investment Strategies

The SmartETFs Dividend Builder ETF will invest at least 80% of its net assets (plus any borrowings for investment purposes) in publicly-traded equity securities in dividend-paying companies that the Adviser believes have the ability to consistently increase their dividend payments over the medium term (three to five years). Equity Securities may include common stocks, preferred stocks, securities convertible into common stocks, rights and warrants. The Adviser uses fundamental analysis to assess a company’s ability to maintain consistent, real (after inflation) dividend growth. One key measure of a company’s ability to achieve consistent, real dividend growth is its consistency in generating returns on capital, which is a measure of income produced by a company when compared to capital invested in the company’s operations. In the Adviser’s view, “dividend builder” refers to a dividend-paying company which the Adviser believes will experience increasing dividends over time. The Adviser seeks to invest in companies that have returned a real cash flow (cash flow adjusted for inflation) on investment of at least 10% for each of the last 10 years and, in the opinion of the Adviser, are likely to grow their dividend over time; however, this is one of several criteria used by the Adviser and it is possible that not all investments may meet this criterion. The Fund will not change this strategy unless it gives shareholders at least 60 days’ notice.

The Fund is actively managed, meaning that the Adviser will select the Fund’s holdings based on its judgment and analysis of a company’s activities. In determining whether to buy or sell a portfolio position, the Adviser uses proprietary and independent research and applies traditional fundamental analysis to assess a company’s business and business prospects, market capitalization, the valuation of the company, its dividend history, its ratio of debt to equity and its potential for share price appreciation or return and for consistent, real (after inflation) dividend growth while maintaining company value.

Typically, the Fund will hold around 35 positions of approximately equal weight, but the portfolio may vary over time. Under normal market conditions, the Fund may have as few as 25 holdings, or may hold securities in 75 or more companies. The Fund may invest in companies of any capitalization size.

The Fund will invest in companies on a global basis, meaning that it will generally hold both domestic and foreign companies, and may invest in companies economically tied to developed markets and emerging markets outside of the United States, including companies economically tied to countries in Europe, including France, Germany, Netherlands, Switzerland, the United Kingdom, and countries in Asia, including China, Australia, South Korea and Japan. The Fund’s allocations may vary depending on changing market conditions (including but not limited to, liquidity, volatility, and the number of companies meeting selection criteria) and there is no specific allocation of investments to US issuers or non-US issuers. The Fund’s currency is US Dollars, while some of its investments are denominated in foreign currencies. Additional information on Principal Investment Strategies can be found in the prospectus. For more information about how the Adviser determines that a company is economically tied a foreign country, see “More About the Fund’s Investment Strategies and Risks” in this Prospectus. Also see Additional Investment Strategies and Risks in the Statement of Additional Information.

For temporary defensive purposes, any portion of the Fund’s total assets may be invested in cash and cash equivalents, including money market funds, to respond to adverse market, economic, political or other conditions. While the Fund is applying this temporary defensive strategy, it may be unable to achieve its investment objective.

The Fund is designed for investors who seek a moderate level of current income and investments in dividend paying companies that have the ability to increase their dividends consistently over time.

Principal Risks

You can lose money by investing in shares of SmartETFs Dividend Builder ETF and investing in shares of this Fund may be more risky than investing in a fund that only invests in U.S. securities due to increased volatility of foreign markets. There can be no assurance that the Fund will achieve its investment objective. Risks associated with an investment in the Fund can increase during times of market volatility.
The Fund is subject to the following risks, which could affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return or the Fund’s ability to meet its investment objective. These risks are also described in the “Principal Risks” and “Risks of Investing in Our Fund” sections of this prospectus and in the Fund’s Statement of Additional Information. You can lose money by investing in shares of this Fund.

- **Dividend Paying Securities Risk.** The Fund invests in securities that pay dividends. There is no guarantee that the securities held by the Fund will declare or pay dividends in the future, or that dividends will remain at current levels or increase.

- **Equity Securities Risk.** The Fund invests in publicly-traded equity securities, and their value may fluctuate, sometimes rapidly and unpredictably, which means a security may become worth more or less than when it was purchased. These fluctuations can be based on a variety of factors including a company’s financial condition as well as macro-economic factors such as interest rates, inflation rates, global market conditions, and non-economic factors such as market perceptions and social or political events.

- **Market Risk.** General market conditions can affect the value of the Fund’s securities holdings. Market risk applies to individual securities, a particular sector or the entire economy. Recently, global financial markets have experienced a period of extreme stress which has resulted in unusual and extreme volatility in the equity markets and in the prices of individual securities. In some cases, the prices of securities issued by individual companies have been negatively impacted even though there may be little or no apparent degradation in the financial conditions or prospects of that company. Global events, financial market shocks or interest rate events could cause equity securities generally to decline in value, including if fixed income securities become more favorable. These market conditions add significantly to the risk of short term volatility of the Fund.

- **Global Risks.** The Fund invests in companies in multiple countries within the Asia Pacific region, and companies in which the Fund invests may experience differing outcomes with respect to safety and security, economic uncertainties, natural and environmental conditions, health conditions (including pandemics such as Covid-19) and/or systemic market dislocations (including market dislocations due to events outside a company’s country or region, including supply chain events). The global interconnectivity of industries and companies, especially with respect to goods, can be negatively impacted by events occurring beyond a company’s principal geographic location. These events can contribute to volatility, valuation and liquidity issues, and can affect specific companies, countries, regions and global markets.

  - **Pandemic Risk.** In 2020, markets globally were impacted by the Covid-19 pandemic, which is ongoing. This pandemic adversely affected industries, including supply chains, as well as general financial conditions, and has resulted in restrictions on commercial activity (shutdowns), interruptions in labor and supply markets, economic stimulus packages and other governmental interventions, and reallocation of market resources. Total economic effects of Covid-19 cannot be predicted. Covid-19 may continue in the foreseeable future and could adversely affect companies in the Fund’s portfolio, including by affecting their operating capabilities or their willingness or ability to pay dividends, which could negatively impact stock prices as well as yield.

**Risks Associated with Investments in Companies outside the United States.**

- **Investing in Non US Companies.** Investing in companies outside the U.S., including in countries in Europe and Asia, involves different and additional political, social, economic, legal and regulatory risks, based on the size of their securities markets, competition for investments, interest rates, global or foreign trade activities (restrictions or tariffs or threats of changes to restrictions or tariffs), and changes in the global economy, such as “Brexit”, the withdrawal of the United Kingdom from the European Union (EU), as well as changes due to global or coordinated sanctions activities. Impacts of Brexit are likely to be higher on companies with significant contacts with the United Kingdom, including companies in Europe. Non-US companies, whether in developed or emerging markets, may be more sensitive to these factors, which can
increase volatility, reduce liquidity and negatively affect economic growth. The Fund’s ability to access foreign securities markets can be limited, which can affect availability, liquidity and pricing of foreign securities.

- **Sensitivity to global events.** Non US securities may be more sensitive to changes in global economic activity, including interest rates as well as trading activity, including trade restrictions, tariffs, or threats of changes to restrictions or tariffs. These companies may be more sensitive to global economic transitions and stresses, such as Brexit, central bank or government interventions (commonly involving interest rates but also stimulus and sanctions). Investing in non-US securities can also expose the Fund to risks associated with the potential imposition of economic or other sanctions against a particular country, or businesses or industries, including trade restrictions or tariffs (or threats thereof).

- **European Securities.** The Fund may invest in companies in France, Germany, Netherlands, Switzerland, and the United Kingdom. Companies in countries in the European Union and the UK may be more sensitive to changes as a result of Brexit, the withdrawal of the United Kingdom from the European Union. These changes could include changes in how goods, technology or services are delivered or received between the European Union countries and the United Kingdom.

- **Securities of Companies in Asia.** The Fund may invest in securities of companies in Asia, including China and Taiwan. Investments in securities of Chinese companies can be impacted by currency and exchange rate fluctuations, in addition to price volatility, illiquidity and changes in China’s regulatory, monetary and socioeconomic policies, and limitations on access to Chinese issuers. Countries in Asia may be more dependent on global trade relationships; interruptions in global trade could adversely affect securities of companies in Asia.

  - Asia Pacific stock markets may experience volatility and instability, and these risks can apply to entire economies, particular sectors and particular securities. Asia Pacific stocks could rise or fall with changes in economic or political circumstances in specific countries, may fall out of favor with investors, and currencies of countries in the Asia Pacific region may decline in comparison to the U.S. dollar. Stocks economically tied to the Asia Pacific region may be more sensitive to economic, political, social or legal changes in countries in the Asia Pacific region, which could adversely affect a Fund’s investments.

- **Legal, Accounting, Audit and Disclosure may vary.** Foreign countries have different legal, accounting, auditing and financial disclosure systems, which may make information about companies more difficult to understand, and less information may be available. Under foreign legal systems, different standards may apply for foreign governments to take over assets, restrict the ability to exchange currency or restrict the delivery of securities. Some foreign companies may be subject to special restrictions in U.S. markets due to non-compliance with U.S. audit inspection standards.

- **Currency and Currency Exchange Risks.** The Fund’s currency is US Dollars, while some of its investments are denominated in foreign currencies. Foreign currencies may fluctuate against the US Dollar and some foreign currencies are more volatile, especially during times of economic stress, and foreign countries may limit trading or repatriation of currencies. The Fund’s NAV could be affected by a change in foreign currency exchange rates. The Fund may incur costs associated with exchanging dollars into foreign currencies, and vice versa, for investing in foreign securities. The value of Fund shares could decline if the foreign currency of a market in which the Fund declines against the US Dollar.

- **Foreign Securities Market Risks.** Foreign securities markets generally have lower trading volumes than U.S. markets, which means it may be more difficult for the Fund to buy or sell foreign securities. Additionally, trading on foreign securities markets may involve longer settlement periods and higher
transaction costs. Some foreign securities markets are closed to trading for extended periods (foreseeable and unplanned), which could make the Fund’s holdings in those markets illiquid or hard to value. Government oversight of foreign stock exchanges and brokerage industries may be less stringent than in the United States. Some foreign securities markets restrict access by non-domestic investors. The Fund’s investments in securities traded on foreign markets could make this Fund more risky than a fund that only invests in securities traded on US exchanges.

□ Emerging Markets Risks. The Fund may invest in companies in emerging markets, including China. Emerging market countries generally may have less established economies, smaller capital markets and greater social, economic, regulatory or political risks. These factors could contribute to increased volatility, liquidity risks and valuation risks. These risks apply to direct holdings in foreign companies and to holdings in depository receipts for foreign companies. The Fund’s investments in foreign issuers and depository receipts could make these holdings riskier than holdings in domestic companies.

□ Expropriation Risk. Investments in foreign countries are subject to expropriation risk, and the risk that foreign governments act to limit investment in foreign securities, through exchange controls, currency restrictions and taxation. There can be limits on the Fund’s ability to pursue and collect a legal judgment against a foreign government if an expropriation event occurs.

Other Principal Risks

□ Management Risk. The Fund’s strategy may not achieve its investment objective; the portfolio managers’ qualitative judgments about portfolio companies or their securities may be incorrect or the Adviser might not properly implement the strategy.

□ Capitalization Risk. The Fund invests in companies with a range of capitalizations, including small cap (under US$1 billion), medium cap (under US$5 billion) and large cap (US$10 billion or more). Small cap and medium cap companies may be more susceptible to financial downturns, have limited product lines, may be illiquid or experience volatility and may have limited financial resources. Large cap companies may have frequent price changes based on general economic conditions and may be adversely affected by declines among lines of business, and may be less agile in responding to market and product challenges. Investing in small cap and medium cap companies may make the Fund more risky than a fund that only invests in securities of larger capitalization companies.

□ Liquidity Risk. The Funds invest in securities, which may become illiquid, and there is liquidity risk associated with the Fund’s own shares. Securities in which the Fund invests could become illiquid, which means that the securities cannot be sold within seven days under current market conditions without significantly affecting the price at which the investment is carried on the Fund’s books. Investments that become illiquid may be more difficult to value. The Fund may be more sensitive to this risk because it invests in non-US securities. Some of the foreign markets in which the Fund invests may be closed for national holidays or other reasons, which may cause some holdings to be illiquid. Illiquidity in portfolio securities could cause the Fund’s shares to trade at a premium or discount. The Fund has adopted a liquidity risk management program to manage liquidity risk of its underlying portfolio.

□ Fund Cybersecurity Risk. Cybersecurity risk applies to the Fund, its service providers and the companies in which the Fund invests. Cybersecurity risk includes breaches, intentional or unintended, that may impact a company’s ability to operate, and could include data corruption, theft or loss, improper access to proprietary information, or interference with technology operations. Companies could suffer losses due to cybersecurity events, including fines, penalties, reputational injuries, as well as financial losses and legal and compliance expenses. Cybersecurity risks of the Fund include risks applicable to the Fund’s service providers. While the Fund and its service providers have established cybersecurity defenses, there is no guarantee that these defenses will be effective.
Risks of Investing in ETFs

- **Shares May Trade At Prices Other Than NAV.** “ETF Shares” are the Fund’s individual exchange-traded shares, which are listed for trading on the NYSE Arca. Shares are bought and sold in the secondary market at a market price. The Fund’s NAV is calculated once per day, at the end of the day. The market price of a Share on the exchange could be higher than the NAV (premium), or lower than the NAV (discount).

  - *Market Price could vary from NAV.* The market price of an ETF Share on the exchange can change throughout the day and may differ from the Fund’s NAV per share, which is calculated only once per day, at the end of the day.

  - *Market Price could vary from NAV due to foreign holdings.* The market price of an ETF Share on the exchange may differ from the NAV. The Fund will hold shares of non-U.S. securities traded in local markets that close at a different time than the NYSE Arca. During the time when the NYSE Arca is open but after the applicable local market has closed, the price of a foreign security that is held by the Fund and included in the Fund’s NAV will be the most recent closing price in that security’s local market, updated for currency changes, until that local market opens again. In that case, the prices used in calculating the Fund’s NAV may be based on closing prices of securities traded in non-U.S. markets that have not been updated, except for currency changes. When all or a portion of the Fund’s portfolio consists of securities traded in a market that is closed when the market for the Fund’s shares is open, there could be differences between the value of ETF Shares and the value of the Fund’s underlying portfolio. This could lead to differences between market price of ETF Shares and the underlying value of the Fund shares. These differences can be magnified during times of significant market activity and could contribute to ETF Shares trading at a premium or discount.

  - *Costs of buying, selling or holding Fund Shares.* Purchases and sales of ETF Shares on the exchange through a broker may incur a brokerage charge or commission, frequently a fixed amount; this may be a significant proportional cost for investors transacting in small numbers of shares. The difference between the price investors are willing to pay for ETF Shares (the “bid” price) and the price at which investors are willing to sell ETF Shares (the “ask” price) is called the “spread.” The spread with respect to the Fund’s shares varies over time based on the Fund’s trading volume and market liquidity, and is generally lower (or “narrower”) if the Fund has a lot of trading volume and market liquidity and higher (or “wider”) if the Fund has little trading volume and market liquidity. Because of the costs of buying and selling shares of the Fund, frequent trading may reduce investment returns. You could lose money if you sell your shares at a point when the market price is below the Fund’s NAV.

  - *Information about the Fund’s spread.* The Fund’s website will contain information about each Fund’s per share NAV, closing market price, premiums and discounts, and the median bid/ask spread. If a Fund’s premium or discount exceeds 2% for more than 7 consecutive trading days, the website will also disclose the factors that the investment adviser reasonably believes materially contribute to this trading premium or discount.

- **Cash Redemption Risk.** The Fund may be required to sell portfolio securities if it is required to pay cash in redemption of Creation Units to Authorized Participants. Generally, the Fund will effectuate redemptions in kind. For some portfolio holdings traded in specific foreign markets that do not permit in-kind transfers, the Fund will need to sell securities and deliver cash to redeeming Authorized Participants. There is a risk that the Fund could lose money if it had to sell its securities in times of overall market turmoil or when the Fund’s portfolio securities have declined in value, or if the securities become illiquid. Selling securities could generate capital gains and cause the Fund to incur brokerage expenses, and could result in tax consequences.
Redemption Risk. ETF Shares are not individually redeemable. The Fund only redeems ETF Shares in Creation Units, which are large blocks of shares, from Authorized Participants. If you want to liquidate some or all of your investment in shares of the Fund, you would have to sell them on the secondary market at prevailing market prices, which may be lower than NAV.

Absence of Active Trading Market Risk. Although Fund Shares will be listed on the NYSE Arca exchange, there is no guarantee that an active trading market for Fund Shares will exist at all times. In times of market stress, markets can suffer erratic or unpredictable trading activity, extraordinary volatility or wide bid/ask spreads, which could cause some market makers and Authorized Participants to reduce their market activity or “step away” from making a market in ETF Shares, and market makers and Authorized Participants are not obligated to place or execute purchase and redemption orders. This could cause the Fund’s market price to deviate, materially, from the NAV, and reduce the effectiveness of the ETF arbitrage process (that is, arbitrage will be less effective at keeping the market price of the ETF Shares aligned closely with the value of its underlying portfolio). Trading in ETF Shares on the NYSE Arca exchange may be halted if individual or market-wide “circuit breakers” are activated (circuit breakers halt trading for a specific period of time when the price of a particular security or overall market prices decline by a predetermined percentage). Trading of the ETF Shares also could be halted if (1) the shares are delisted from the NYSE Arca exchange without first being listed on another exchange or (2) NYSE Arca exchange officials determine that halting is appropriate in the interest of a fair and orderly market or to protect investors. Any absence of an active trading market for ETF Shares could lead to a heightened risk that there will be a difference between the market price of an ETF Share and the underlying value of the ETF Share.

Authorized Participant Risk. Only a limited number of financial institutions that enter into an authorized participant agreement with the Funds may engage in creation or redemption transactions. If the Fund’s Authorized Participants decide not to create or redeem shares, ETF Shares may trade at a premium or discount to the Fund’s net asset value. This risk could be heightened because the Fund will invest in non-U.S. securities, which may be traded outside a collateralized settlement system. In such a case, Authorized Participants may be required to post collateral for some trades on an agency basis (that is, on behalf of other market participants), which only a limited number of Authorized Participants may be willing to do. This risk could also be heightened because the Fund uses a focused investment strategy. If Authorized Participants do not proceed with creation and redemption orders for shares, the Fund’s share price could trade at a discount to NAV and could face trading halts or de-listing.

For more information on the risks of investing in this Fund, please see the Principal Risks and Additional Risks of Investing in Our Funds in the prospectus. You may also refer to the section Risk Factors and Special Considerations in the Statement of Additional Information.

Performance

The following performance information indicates some of the risks of investing in the SmartETFs Dividend Builder ETF.

The SmartETFs Dividend Builder ETF acquired the assets and liabilities of the predecessor mutual fund, the Guinness Atkinson Dividend Builder Fund, on March 26, 2021. As a result of the transaction, the Fund adopted the accounting and performance history of its predecessor mutual fund, the Guinness Atkinson Dividend Builder Fund. The information shown below is for the predecessor mutual fund. The Fund’s total net operating expense ratio is lower than the net operating expense ratio of the predecessor mutual fund. Returns in the bar chart and table for the predecessor fund have not been adjusted.

The annual returns bar chart demonstrates the risks of investing in the SmartETFs Dividend Builder ETF by showing how the predecessor mutual fund’s performance has varied from year to year. The table also demonstrates these risks by showing how the predecessor mutual fund’s average annual returns compare with those of two broad-based
indices. Unlike the predecessor mutual fund’s returns, these index returns do not reflect any deductions for fees, expenses or taxes. For additional information on these indices, please see Index Descriptions in the prospectus. Past performance, before or after taxes, is not indicative of future performance. Updated performance information is available from the Fund’s website www.smartetfs.com.

The year-to-date return for the Fund as of March 31, 2023, was 5.82%.

During the period shown in the bar chart, the best performance for a quarter was 15.33% (for the quarter ended June 30, 2020). The worst performance was -18.55% (for the quarter ended March 31, 2020).

(1) After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In certain cases, the figure representing “Return After Taxes on Distributions and Sale of Fund Shares” may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor.
Investment Adviser

Guinness Atkinson Asset Management, Inc. serves as the Fund’s investment adviser. For more information on the Investment Adviser, please see Management of the Funds in the prospectus and The Investment Adviser in the Statement of Additional Information.

Portfolio Managers

Dr. Ian Mortimer and Matthew Page are the co-managers of the Fund since inception and are jointly and primarily responsible for the day-to-day management of the Fund’s portfolio. Dr. Mortimer and Mr. Page have been co-managers of the Fund’s predecessor mutual fund since 2012.

For additional information, please see Portfolio Management in the prospectus and Portfolio Managers in the Statement of Additional Information.

Purchase and Sale of Fund Shares

SmartETFs Dividend Builder ETF is traded on the NYSE Arca exchange. Individual Fund shares may only be bought and sold in the secondary market (the exchange) through a broker or dealer at a market price. If you wish to purchase or sell Fund shares, you should contact your broker. You may incur a brokerage fee when purchasing or selling Fund shares. Because Fund shares trade on an exchange at a market price rather than at the net asset value, Fund shares may trade at a price greater than net asset value (premium) or less than net asset value (discount). You may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Fund shares (bid) and the lowest price a seller is willing to accept for Fund shares (ask) when buying or selling shares in the secondary market (the “bid-ask spread”).

Information about the Fund’s net asset value, market price, premiums and discounts, and bid-asks spreads are available on the Fund’s website at www.smartetfs.com.

Only certain large investors that have contractually agreed to be, and have been designated as, Authorized Participants are able to purchase and redeem large blocks of ETF shares directly with the Fund. Purchase and redemption activity conducted by Authorized Participants directly with the Fund will be done in increments of 20,000 share Creation Units. A Transaction Fee of $405 per Creation Unit transaction is charged to Authorized Participants who create or redeem shares in Creation Units, regardless of the number of Creation Units purchased or redeemed by the Authorized Participant on a business day. The Fund will issue or redeem Creation Units in return for a basket of assets that the Fund specifies each day and are effected at the net asset value (“NAV”) next determined after the receipt of an order in proper form. The value of the minimum initial or subsequent investment by an Authorized Participant varies with the value of the basket of assets specified by the Fund each day. Fund shares may only be purchased or redeemed in Creation Units by submitting an order to the Fund’s transfer agent. More information about the purchase and sale of ETF Shares in Creation Units can be found in the Fund’s Statement of Additional Information under “Purchase and Redemption of Shares in Creation Units”.

Tax Information

The Fund intends to make distributions that will be taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Withdrawals from such tax-deferred arrangements may be taxable at the time of withdrawal. For additional information, please see Distributions and Taxes in the prospectus and Tax Matters in the Statement of Additional Information.
Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Adviser and its related companies may pay the intermediary for services related to the sale of Fund shares, which include participation in activities designed to inform intermediaries about the Fund, as well as marketing, education and training initiatives concerning the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary or your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
SUMMARY SECTION

SmartETFs Smart Transportation & Technology ETF

Investment Objective

SmartETFs Smart Transportation & Technology ETF’s investment objective is long-term capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of SmartETFs Smart Transportation & Technology ETF. You may also pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.

<table>
<thead>
<tr>
<th>Shareholder Fees (fees paid directly from your investment)</th>
<th>None</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Annual Fund Operating Expenses</strong> (expenses that you pay each year as a percentage of the value of your investments)</td>
<td></td>
</tr>
<tr>
<td>Management Fees:</td>
<td>0.68%</td>
</tr>
<tr>
<td>Distribution and Service (12b-1) Fees:</td>
<td>None</td>
</tr>
<tr>
<td>Other Expenses:</td>
<td>0.24%</td>
</tr>
<tr>
<td><strong>Total Annual Fund Operating Expense:</strong></td>
<td>0.92%</td>
</tr>
<tr>

</tr>
</tbody>
</table>

1 The Adviser has contractually agreed to reduce its fees and/or pay Fund expenses (excluding Acquired Fund Fees and Expenses, interest, taxes, dividends on short positions and extraordinary expenses) in order to limit the Fund’s Total Annual Operating Expenses to 0.68% through June 30, 2026.

Example

This Example is intended to help you compare the cost of investing in SmartETFs Smart Transportation & Technology ETF with the cost of investing in other investment companies. The Example assumes that you invest $10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. This Example does not include brokerage commissions that you may pay to buy and sell shares. Although your actual costs may be higher or lower, under these assumptions, your costs would be:

<table>
<thead>
<tr>
<th>Years</th>
<th>Total Expenses</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Year</td>
<td>$69</td>
</tr>
<tr>
<td>3 Years</td>
<td>$218</td>

<tr>
<td>5 Years</td>
<td>$435</td>
</tr>
<tr>
<td>10 Years</td>
<td>$1,061</td>
</tr>
</tbody>
</table>

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in the annual fund operating expenses or in the Example, may affect the Fund’s performance. During the Fund’s most recent fiscal year ended December 31, 2022, the Fund’s portfolio turnover rate was 4.84% of the average value of its portfolio.
Principal Investment Strategies

The SmartETFs Smart Transportation & Technology ETF invests in publicly-traded equity securities of domestic or foreign companies that are involved in the development and production of products or services for Smart Transportation, including safer, cleaner or connected vehicles and Smart Transportation companies providing “transportation as a service.” The Fund will also invest in Technology companies, including Technology companies whose products or services are used in transportation. Under normal circumstances, the Fund will invest at least 80% of its net assets (plus any borrowings for investment purposes) in Smart Transportation companies and Technology companies, each of which is defined below. The Fund is actively managed, meaning the Adviser will select the Fund’s holdings.

The Adviser defines “Smart Transportation” to mean the integration of modern technologies and business practices as applied to transportation, resulting in safer, cleaner, or connected transportation, and smart transportation “as a service”. Importantly, the Adviser believes that Smart Transportation is a thematic concept rather than an industry sector. The Fund will invest in Smart Transportation companies, which are companies that are in the business of designing, producing, manufacturing or distributing products or services that involve at least one of the following elements:

- **Safer**, which means safety enhancements derived from the inclusion of a level of autonomy in transportation. Companies that meet this definition of safer are designing, producing, manufacturing or distributing vehicles (or vehicle components or systems) that are objectively on the path towards autonomy, meaning they incorporate, at a minimum, Level 1 autonomy technology. For this purpose, the Adviser uses the definition of Level 1 Autonomy published by SAE International or Partners for Automated Vehicle Education, which is, in short, technologies designed to assume a portion of driving authority. Companies that meet this definition could also be providing products and services used in the manufacture or development of safer vehicles (which could be autonomous, electric or hybrid vehicles).

- **Cleaner**, which means vehicles, vehicle components or systems that increase efficiency or reduce emissions from vehicles; this would include vehicles that are “light hybrid” or “fully electric” and systems like thermal management systems and more efficient vehicle fuel technologies, such as batteries and alternative fuels or fuel cells.

- **Connected**, which means vehicles that use connectivity or communication in their operations, either internally with devices or programs in the same vehicle, or externally, from one vehicle to another vehicle (V2V) or from a vehicle to infrastructure (V2I). The infrastructure receiving communications from a connected vehicle could include traffic information or control devices, emergency response platforms, global positioning systems, speed or radar information collectors; and components or systems used by these vehicles could include sensors, cameras, semi-conductors as well as products like interactive advanced driver assistance systems (ADAS), cooperative intelligent transportation systems and connected vehicle data networks. This could also include companies that supply software and systems to develop and test autonomous driving capability.

- **Smart Transportation as a Service**, which means the more efficient delivery of transportation to individuals that is achieved through application-based hailing or sharing of cars, scooters or other vehicles (whether movement is by ground or air). These services generally employ a variety of technologies including global positioning satellite (GPS) technology, connectivity and software applications.

At all times, the Fund will invest at least 15% of its assets in companies that are in the business of making Smart Transportation products or services. The Adviser considers a company to be “in the business of” making a Smart Transportation product or service if the company has devoted more than 50% of its assets to, or derives more than 50% of its revenue, income or profits from, the design, manufacture, production and/or distribution of a
Smart Transportation product or service (including components or parts) as defined above, meaning Safer, Cleaner, or Connected, or Smart Transportation as a Service.

The Fund will also invest in Technology companies. The Adviser defines Technology companies as companies that are in the business of developing, advancing and using technology to improve processes, applications or outcomes or create innovations, which could occur through hardware and related components or equipment, or software or services. This includes companies that deliver products or services in the following industries: information technology, such as software, services, hardware, semi-conductors and equipment; electronic equipment and instruments; computers or their components, hardware, storage or peripherals; telecommunications equipment or services (voice, data or wireless); internet commerce and information (including networks and connected payment systems); data processing (including management and retention); and imagery (including digitization, mapping and interfacing applications).

At all times, the Fund will invest at least 15% of its assets in Technology companies whose products or services are used in transportation. For purposes of this investment minimum, the Adviser considers these companies to be technology companies that:

- Provide technology including products, services, and materials used in the transportation industry to achieve safer, cleaner, or connected transportation, or smart transportation as a service. This includes companies that make hardware (including semi-conductors), software for use in vehicles using at least Level 1 autonomy technology, data companies, sensor manufacturers (radar, lidar, cameras and other technologies), companies that provide software and mapping products or services related to vehicle connectivity or autonomy, battery and alternative fuel manufacturers or suppliers and producers of components and materials (including lithium) used in batteries and alternative fuels; or
- Offer for sale or otherwise distribute Smart Transportation vehicles (autonomous, electric or hybrid); or
- Have demonstrated a commitment to autonomous vehicle development by having obtained certification by at least one government entity related to their autonomous driving research program; or
- Develop transportation as a service applications, including urban air mobility services, and have obtained certification by government entities related to their transportation service program.

In determining whether to buy or sell a portfolio position, the Adviser uses proprietary and independent research and applies traditional fundamental analysis to assess a company’s business and business prospects, the valuation of the company and its potential for share price appreciation or return.

Equity securities may include common stocks, preferred stocks, securities convertible into common stocks, rights and warrants. The Fund’s allocations may vary depending on changing market conditions (including but not limited to, liquidity, volatility, and the number of companies meeting selection criteria). The Fund may invest in US companies and in companies economically tied to foreign countries, including, potentially, companies domiciled or traded in emerging markets, including China. For more information about how the Adviser determines that a company is economically tied to a foreign country, see “More About the Fund’s Investment Strategies and Risks” in this Prospectus. The Fund’s allocations among countries may vary depending on changing market conditions (including but not limited to, liquidity, volatility, and the number of companies meeting selection criteria), and there is no specific allocation of investments to US issuers or non-US issuers. The Fund’s currency is US Dollars, while some of its investments are denominated in foreign currencies.

Typically, the Fund will hold around 35 positions of approximately equal weight, but the portfolio may vary over time. Under normal market conditions, the Fund may have as few as 25 holdings or as many as 75 holdings. The Fund is actively managed, meaning the Adviser will select the Fund’s holdings based on its own research and evaluation process. In identifying investments that the Fund will buy or sell, the Adviser identifies companies with favorable characteristics from the identifiable universe of companies it has compiled, and performs research and
fundamental analysis to understand the company’s business model, valuation and potential for return. In determining whether a company is a Smart Transportation or Technology company, the Adviser considers the company’s public statements about its activities, including regulatory filings (reflecting profits, revenues, EBITDA (earnings before interest, taxes, depreciation and amortization), cash flow and assets), as well as third-party industry assessments of products and services that the company delivers and the role of those products or services in smart transportation or technology. The Adviser monitors potential or actual investments for performance and risk perspectives, as well as to quantify drivers of return and assess company performance versus expectations.

The Fund may invest in companies of any market capitalization size, but under normal market conditions, the Fund will invest in companies with a minimum market capitalization of $500 million. The Fund will invest in companies on a global basis, meaning that it will generally hold both domestic and foreign companies, and may invest in companies in developed markets and emerging markets outside of the United States, including companies economically tied to countries in the Asia Pacific region, including China, South Korea and Japan. For more information about how the Adviser determines that a company is economically tied to a foreign country, see “More About the Fund’s Investment Strategies and Risks” in this Prospectus.

For temporary defensive purposes, any portion of the Fund’s total assets may be invested in cash and cash equivalents, including money market funds, to respond to adverse market, economic, political or other conditions, which could adversely affect the Fund’s ability to achieve its investment objective. While the Fund is applying this temporary defensive strategy, it may be unable to achieve its investment objective.

The Fund is designed for investors who seek long-term capital appreciation through focused investments in equity securities of companies, wherever located, that are engaged in smart transportation and related technologies.

Additional information on Principal Investment Strategies can be found in the prospectus. Also see Additional Investment Strategies and Risks in the Statement of Additional Information.

Principal Risks

You can lose money investing in shares of SmartETFs Smart Transportation & Technology ETF, and investing in shares of this Fund may be more risky than investing in a fund that only invests in U.S. securities due to increased volatility of foreign markets. Risks associated with an investment in the Fund can increase during times of market volatility. There is no guarantee that the Fund will achieve its investment objective.

The Fund is subject to the following risks, which could affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return or the Fund’s ability to meet its investment objective. These risks are also described in the “Principal Risks” and “Risks of Investing in Our Fund” sections of this prospectus and in the Fund’s Statement of Additional Information. You can lose money by investing in Shares of this Fund.

Risks of Investing in Funds Investing in the Autonomous Vehicle and Electric Vehicle Sector

The following risks apply to investments in autonomous and/or electric vehicles and companies that support these technologies and products:

- **Autonomous/Electric Vehicle Risk.** Autonomous and/or electric vehicles are a relatively new development in transportation markets. They could fail to “catch on” with consumers in a meaningful way and could suffer technical problems, supply or demand shortfalls, or be supplanted by other technologies. Vehicles, applications, hardware, software or services could become obsolete before they are fully embraced or deployed, or may use technologies, systems and software that are unproven, defective, malfunctioning, and are subject to cybersecurity threats; any of these factors could cause them to become obsolete more rapidly than traditional technologies and software. Autonomous and/or electric vehicles may rely on fuel sources that are more sensitive to commodities market activity than traditional vehicle fuels and could be adversely affected by underlying commodity market activity.
Some autonomous and/or electric vehicle projects may rely on government subsidies that could be reduced or eliminated. These risks could adversely affect the value of companies in which the Fund invests.

- **Technology Risk.** The technologies used by autonomous and electric vehicles and their support systems, such as software, grids, networks, fuel and batteries, may be unproven, susceptible to obsolescence or subject to future regulation in countries or locations of deployment. Technologies may also lack scalability, are subject to competition and rapid changes in technology standards or development, and may be incompatible with future developments. Technologies also involve intellectual property components that are regulated or protected differently in various countries, and which are subject to risk of theft, misappropriation or vandalism. These technologies may also be at increased risk of failure or attack because they are designed to interact with other non-proprietary technologies and applications across one or more external networks. Companies producing technology or software upon which autonomous and/or electric vehicles or networks rely may decide to discontinue support for the technology or software or restrict its deployment into major markets. Software or technology involved in autonomous and/or electric vehicles, networks, grids, infrastructure or services related to autonomous and/or electric vehicles could be adversely affected by network events or outages (local or global). These risks may cause the securities of companies making these products to be worth less than at the time of purchase. This risk applies to the sector as a whole and to individual securities within the sector.

- **Cybersecurity Risk.** Technologies created or deployed for Smart Transportation, including for vehicles or drive systems as well as for networks and intelligent roadways, may be subject to greater cybersecurity risk than other companies. Technology programs and networks may be subject to an increased risk of attack or infiltration and may be more susceptible to “network” attacks or outages and to theft or alteration of data. Some programs may be designed to interact with data about or from customers or products, and data and/or its transmission could become regulated in multiple jurisdictions. A cybersecurity event in a technology or program used by a Smart Transportation network or product could be exacerbated, and companies could be subject to claims for loss or injury in multiple jurisdictions.

- **Product Risk.** Companies creating products and technologies for autonomous or electric transportation, for passenger, commercial or freight usage, face considerable competition. There is no guarantee that companies that successfully create a product will obtain product adoption, or that a product will not become obsolete quickly. Companies in this area may have research and development expenses that are significantly higher than companies in other parts of the transportation sector, which could make their securities less desirable.

- **Product Regulation Risk.** Autonomous vehicles and their networks may be subject to multiple levels of regulation including local regulations and operating restrictions. They could be or become subject to a variety of domestic or foreign regulatory regimes governing “artificial intelligence”, which have not yet been fully developed or adopted. Regulatory changes governing privacy, data collection or storage, transfer or automation could also adversely affect smart transportation products or systems. Limitations on applications for autonomous or electric vehicles could adversely affect the value of companies in which the Fund invests.

- **Equity Securities Risk.** The Fund invests in publicly-traded equity securities, and their value may fluctuate, sometimes rapidly and unpredictably, which means a security may be worth more or less than when it was purchased. These fluctuations can be based on a variety of factors including a company’s financial condition as well as macro-economic factors such as interest rates, inflation rates, global market conditions, and non-economic factors such as market perceptions and social or political events.
• **Market Risk.** General market conditions can affect the value of the Fund’s securities holdings. Market risk applies to individual securities, a particular sector or the entire economy. Recently, global financial markets have experienced a period of extreme stress which has resulted in unusual and extreme volatility in the equity markets and in the prices of individual securities. In some cases, the prices of securities issued by individual companies have been negatively impacted even though there may be little or no apparent degradation in the financial conditions or prospects of that company. Global events, financial market shocks or interest rate events could cause equity securities generally to decline in value, including if fixed income securities become more favorable. These market conditions add significantly to the risk of short term volatility of the Fund.

• **Global Risks.** The Fund invests in companies in multiple countries, and companies in which the Fund invests may experience differing outcomes with respect to safety and security, economic uncertainties, natural and environmental conditions, health conditions (including pandemics such as Covid-19) and/or systemic market dislocations (including market dislocations due to events outside a company’s country or region, including supply chain events). The global interconnectivity of industries and companies, especially with respect to goods, can be negatively impacted by events occurring beyond a company’s principal geographic location. These events can contribute to volatility, valuation and liquidity issues, and can affect specific companies, countries, regions and global markets.

  o **Pandemic Risk.** In 2020, markets globally were impacted by the Covid-19 pandemic, which is ongoing. This pandemic adversely affected industries, including supply chains, as well as general financial conditions, and has resulted in restrictions on commercial activity (shutdowns), interruptions in labor and supply markets, economic stimulus packages and other governmental interventions, and reallocation of market resources. Total economic effects of Covid-19 cannot be predicted. Covid-19 may continue in the foreseeable future and could adversely affect companies in the Fund’s portfolio, including by affecting their operating capabilities or their willingness or ability to pay dividends, which could negatively impact stock prices as well as yield.

  o **Capital Controls and Sanctions Risk.** In 2022, a number of countries imposed capital controls and economic and other sanctions in response to Russia’s invasion of Ukraine. The range of sanctions and their impact continues to evolve but has included asset seizures, restrictions on the transfer or exchange of currency, restrictions on asset transfers, exclusions from international banking systems, export limitations and limitations on listing shares of companies that are economically tied to Russia and Belarus, including depositary receipts on shares of affected companies. Sanctions programs have been imposed by individual countries, but also on a coordinated basis. The duration of sanctions programs and capital controls in response to the invasion of Ukraine cannot be predicted with any certainty. Capital controls and/or sanctions could adversely impact a Fund’s ability to buy, sell or otherwise transfer securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for Fund shares, and otherwise cause the Fund to decline in value.

**Risks Associated with Investments in Companies outside the United States**

• **Investing in Non US Companies.** Investing in companies outside the U.S., including in countries in Europe and Asia, involves different and additional political, social, economic, legal and regulatory risks, based on the size of their securities markets, competition for investments, interest rates, global or foreign trade activities (restrictions and tariffs or threats of changes to restrictions or tariffs), and changes in the global economy, such as “Brexit”, the withdrawal of the United Kingdom from the European Union (EU), as well as changes due to global or coordinated sanctions activities. Impacts of Brexit are likely to be higher on companies with significant contacts with the United Kingdom, including companies in Europe. Non-US companies, whether in developed or emerging markets, may be more sensitive to these factors, which can increase volatility, reduce liquidity and negatively affect economic growth. The Fund’s ability to access
foreign securities markets can be limited, which can affect availability, liquidity and pricing of foreign securities.

- **Sensitivity to global events.** Non US securities may be more sensitive to changes in global economic activity, including interest rates as well as trading activity, including trade restrictions, tariffs, or threats of changes to restrictions or tariffs. These companies may be more sensitive to global economic transitions and stresses, such as Brexit, central bank or government interventions (commonly involving interest rates but also stimulus and sanctions). Investing in non-US securities can also expose the Fund to risks associated with the potential imposition of economic or other sanctions against a particular country, or businesses or industries, including trade restrictions or tariffs (or threats thereof).

- **European Securities.** The Fund may invest in companies in Europe and the United Kingdom. Companies in countries in the European Union and the UK may be more sensitive to changes as a result of Brexit, the withdrawal of the United Kingdom from the European Union. These changes could include changes in how goods, technology or services are delivered or received between the European Union countries and the United Kingdom.

  - **Germany.** German companies are subject to risks specific to Germany, and companies in Germany may be adversely impacted by events occurring in other parts of the EU, including withdrawal or financial events. Germany’s economy is closely tied to key trading partner relationships with counties inside and outside the EU. Reductions in global consumption of German goods or services, changes in key trading partner economies, or changes in domestic regulation of labor, manufacturing or energy in Germany, could negatively affect Germany’s economy, which could have a negative effect on the Fund’s investments.

  - **Legal, Accounting, Audit and Disclosure may vary.** Foreign countries have different legal, accounting, auditing and financial disclosure systems, which may make information about companies more difficult to understand, and less information may be available. Under foreign legal systems, different standards may apply for foreign governments to take over assets, restrict the ability to exchange currency or restrict the delivery of securities. Some foreign companies may be subject to special restrictions in U.S. markets due to non-compliance with U.S. audit inspection standards.

- **Securities of Companies in Asia.** The Fund may invest in securities of companies in Asia, including China and South Korea. Investments in securities of Chinese companies can be impacted by currency and exchange rate fluctuations, in addition to price volatility, illiquidity and changes in China’s regulatory, monetary and socioeconomic policies, and limitations on access to Chinese issuers.

  - **Asia Pacific stock markets may experience volatility and instability, and these risks can apply to entire economies, particular sectors and particular securities. Asia Pacific stocks could rise or fall with changes in economic or political circumstances in specific countries, may fall out of favor with investors, and currencies of countries in the Asia Pacific region may decline in comparison to the U.S. dollar. Stocks economically tied to the Asia Pacific region may be more sensitive to economic, political, social or legal changes in countries in the Asia Pacific region, which could adversely affect the Fund’s investments. The Fund may be exposed to Asia Pacific risk in connection with its investments in companies economically tied to China and Japan, as well as Hong Kong and Australia.

  - **China.** China’s government exercises significant control over its capital markets and currency markets, including its securities markets. China is also an emerging market. The Fund’s investments may be affected by currency and exchange rate fluctuations, price volatility, illiquidity
and trading restrictions, which can differ between China’s stock exchanges and stock exchanges that list securities of companies economically tied to China. Changes in the regulatory, monetary or socioeconomic policies in China, and limitations on access to China issuers (including limitations on access through variable interest entities (VIEs)), could adversely affect the Fund’s investments in China. Foreign investors, such as the Fund, may face different risks than domestic investors when investing in companies in China, especially with respect to lack of transparency, fraud, volatility, corporate incentives, macro-economic shocks, national security and changes in US-China policy. China’s policies can also impact securities of companies economically tied to Hong Kong and Taiwan. See “Additional Risks of Investing in our Funds” for specific risks of investing in companies economically tied to China.

- **South Korea Risks.** South Korea’s economy is sensitive to changes in international trade, and could be adversely affected if there is a downturn in export markets globally. Substantial political tensions exist between North Korea and South Korea. South Korea’s economy and South Korean companies could be adversely affected by increases in tension between North Korea and South Korea.

- **Currency and Currency Exchange Risks.** The Fund’s currency is US Dollars, while some of its investments are denominated in foreign currencies. Foreign currencies may fluctuate against the US Dollar and some foreign currencies are more volatile, especially during times of economic stress, and foreign countries may limit trading or repatriation of currencies. The Fund’s NAV could be affected by a change in foreign currency exchange rates. The Fund may incur costs associated with exchanging dollars into foreign currencies, and vice versa, for investing in foreign securities. The value of Fund shares could decline if the foreign currency of a market in which the Fund invests declines against the US Dollar.

- **China Currency Risk.** The Fund’s investments in Chinese issuers are subject to risks associated with China’s currency, which is subject to economic objectives of China’s government including devaluation. China has only comparatively recently moved from a pegged currency to a managed float. China’s currency, the Renminbi Yuan, is not completely freely tradable and may not at all times reflect economic fundamentals of China’s economy. The value of the Renminbi Yuan is subject to changes based on the economic objectives of the Chinese government, including devaluation in order to improve the competitiveness of Chinese goods in an effort to improve the Chinese balance of trade.

- **Other Currency Risk.** Currencies of some countries in the Asia Pacific region are subject to greater volatility as compared to the US dollar. Currency volatility is relative and can be periodic. For some countries, their currency may not reflect entirely the fundamental components of a country’s economy. For other countries, such as Australia (Australia Dollar), currency volatility is relatively low over longer terms. Some currencies, such as the South Korean Won, trade only in local markets and may be more volatile than other currencies. The Fund could pay more if it had to acquire a foreign currency when the amplitude of its volatility is high as measured against the US Dollar.

- **Foreign Securities Market Risks.** Foreign securities markets generally have lower trading volumes than U.S. markets, which means it may be more difficult for the Fund to buy or sell foreign securities. Additionally, trading on foreign securities markets may involve longer settlement periods and higher transaction costs. Some foreign securities markets are closed to trading for extended periods (foreseeable and unplanned), which could make the Fund’s holdings in those markets illiquid or hard to value. Government oversight of foreign stock exchanges and brokerage industries may be less stringent than in the United States. Some foreign securities markets restrict access by non-domestic investors. The Fund’s investments in securities traded on foreign markets could make this Fund more risky than a fund that only invests in securities traded on US exchanges.

- **Emerging Markets Risks.** The Fund may invest in companies in emerging markets, including China. Emerging market countries may generally have less established economies, smaller capital markets and
greater social, economic, regulatory or political risks. These factors could contribute to increased volatility, liquidity risks and valuation risks. These risks apply to direct holdings in foreign companies and to holdings in depository receipts for foreign companies.

- **Expropriation Risk.** Investments in foreign countries are subject to expropriation risk, and the risk that foreign governments act to limit investment in foreign securities, through exchange controls, currency restrictions and taxation. There can be limits on the Fund’s ability to pursue and collect a legal judgment against a foreign government if an expropriation event occurs.

**Other Principal Risks**

- **Management Risk.** The Fund’s strategy may not achieve its investment objective; the portfolio managers’ qualitative judgments about portfolio companies or their securities may be incorrect or the Adviser might not properly implement the strategy.

- **Capitalization Risk.** The Fund invests in companies with a range of capitalizations, including small cap (under US $1 billion), medium cap (under US $5 billion) and large cap (US $10 billion or more). Small cap and medium cap companies may be more susceptible to financial downturns, have limited product lines, may be illiquid or experience volatility and may have limited financial resources. Large cap companies may have frequent price changes based on general economic conditions and may be adversely affected by declines among lines of business, and may be less agile in responding to market and product challenges. Investing in small-cap and medium-cap companies may make the Fund more risky than a fund that only invests in securities of larger capitalization companies.

- **Liquidity Risk.** The Fund invests in securities, which may become illiquid, and there is liquidity risk associated with the Fund’s own shares. Securities in which the Fund invests could become illiquid, which means that the securities cannot be sold within seven days under current market conditions without significantly affecting the price at which the investment is carried on the Fund’s books. Investments that become illiquid may be more difficult to value. The Fund may be more sensitive to this risk because it invests in non-US securities. Some of the foreign markets in which the Fund invests may be closed for national holidays or other reasons, which may cause some holdings to be illiquid. Illiquidity in portfolio securities could cause the Fund’s shares to trade at a premium or discount. The Fund has adopted a liquidity risk management program to manage liquidity risk of its underlying portfolio.

- **Fund Cybersecurity Risk.** Cybersecurity risk applies to the Fund, its service providers and the companies in which the Fund invests. Cybersecurity risk includes breaches, intentional or unintended, that may impact a company’s ability to operate, and could include data corruption, theft or loss, improper access to proprietary information, or interference with technology operations. Companies could suffer losses due to cybersecurity events, including fines, penalties, reputational injuries, as well as financial losses and legal and compliance expenses. Cybersecurity risks of the Fund include risks applicable to the Fund’s service providers. While the Fund and its service providers have established cybersecurity defenses, there is no guarantee that these defenses will be effective.

**Risks of Investing in ETFs**

- **Shares May Trade At Prices Other Than NAV.** “ETF Shares” are the Fund’s individual exchange-traded shares, which are listed for trading on the NYSE Arca. Shares are bought and sold in the secondary market at a market price. The Fund’s NAV is calculated once per day, at the end of the day. The market price of an ETF Share on the exchange could be higher than the NAV (premium), or lower than the NAV (discount).
• **Market Price could vary from NAV.** The market price of an ETF Share on the exchange can change throughout the day and may differ from the Fund’s NAV per share, which is calculated only once per day, at the end of the day.

• **Market Price could vary from NAV due to foreign holdings.** The Fund will hold shares of non-U.S. securities traded in local markets that close at a different time than the NYSE Arca. During the time when the NYSE Arca is open but after the applicable local market has closed, the price of a foreign security that is held by the Fund and included in the Fund’s NAV will be the most recent closing price in that security’s local market, updated for currency changes, until that local market opens again. In that case, the prices used in calculating the Fund’s NAV may be based on closing prices of securities traded in non-U.S. markets that have not been updated, except for currency changes. When all or a portion of the Fund’s portfolio consists of securities traded in a market that is closed when the market for the Fund’s shares is open, there could be differences between the value of ETF shares and the value of the Fund’s underlying portfolio. This could lead to differences between the market price of the ETF Shares and the underlying value of the Fund shares. These differences can be magnified during times of significant market activity and could contribute to the ETF Shares trading at a premium or discount.

• **Costs of buying, selling or holding Fund Shares.** Purchases and sales of ETF Shares on the exchange through a broker may incur a brokerage charge or commission, frequently a fixed amount; this may be a significant proportional cost for investors transacting in small numbers of shares. The difference between the price investors are willing to pay for ETF Shares (the “bid” price) and the price at which investors are willing to sell ETF Shares (the “ask” price) is called the “spread.” The spread with respect to ETF Shares varies over time based on the Fund’s trading volume and market liquidity, and is generally lower (or “narrower”) if the Fund has a lot of trading volume and market liquidity and higher (or “wider”) if the Fund has little trading volume and market liquidity. When the spread widens, or when premiums or discounts become larger than usual, particularly in times of market stress, investors may pay significantly more or receive significantly less than the underlying value of the Fund shares when they buy or sell ETF Shares in the secondary market. Because of the costs of buying and selling shares of the Fund, frequent trading may reduce investment returns. You could lose money if you sell your shares at a point when the market price is below the Fund’s NAV.

• **Information about the Fund’s spread.** The Fund’s website will contain information about each Fund’s per share NAV, closing market price, premiums and discounts, and the median bid/ask spread. If a Fund’s premium or discount exceeds 2% for more than 7 consecutive trading days, the website will also disclose the factors that the investment adviser reasonably believes materially contribute to this trading premium or discount.

• **Cash Redemption Risk.** The Fund may be required to sell portfolio securities if it is required to pay cash in redemption of Creation Units to Authorized Participants. Generally, the Fund will effectuate redemptions in kind. For some portfolio holdings traded in specific foreign markets that do not permit in-kind transfers, the Fund will need to sell securities and deliver cash to redeeming Authorized Participants. There is a risk that the Fund could lose money if it had to sell its securities in times of overall market turmoil or when the Fund’s portfolio securities have declined in value, or if the securities become illiquid. Selling securities could generate capital gains, and cause the Fund to incur brokerage expenses and could result in tax consequences.

• **Redemption Risk.** ETF Shares are not individually redeemable. The Fund only redeems ETF Shares in Creation Units, which are large blocks of shares, from Authorized Participants. If you want to liquidate some or all of your investment in shares of the Fund, you would have to sell them on the secondary market at prevailing market prices, which may be lower than NAV.
• **Absence of Active Trading Market Risk.** Although ETF Shares will be listed on the NYSE Arca exchange, there is no guarantee that an active trading market for Fund shares will exist at all times. In times of market stress, markets can suffer erratic or unpredictable trading activity, extraordinary volatility or wide bid/ask spreads, which could cause some market makers and Authorized Participants to reduce their market activity or “step away” from making a market in ETF Shares, and market makers and Authorized Participants are not obligated to place or execute purchase and redemption orders. This could cause the Fund’s market price to deviate, materially, from the NAV, and reduce the effectiveness of the Fund arbitrage process (that is, arbitrage will be less effective at keeping the market price of ETF Shares aligned closely with the value of its underlying portfolio). Trading in ETF Shares on the NYSE Arca exchange may be halted if individual or market-wide “circuit breakers” are activated (circuit breakers halt trading for a specific period of time when the price of a particular security or overall market prices decline by a pre-determined percentage). Trading of ETF Shares also could be halted if (1) the shares are delisted from the NYSE Arca exchange without first being listed on another exchange or (2) NYSE Arca exchange officials determine that halting is appropriate in the interest of a fair and orderly market or to protect investors. Any absence of an active trading market for ETF Shares could lead to a heightened risk that there will be a difference between the market price of an ETF Share and the underlying value of the ETF Share.

• **Authorized Participant Risk.** Only a limited number of financial institutions that enter into an authorized participant agreement with the Fund may engage in creation or redemption transactions. If the Fund’s Authorized Participants decide not to create or redeem shares, shares may trade at a premium or discount to the Fund’s net asset value. This risk could be heightened because the Fund will invest in non-U.S. securities, which may be traded outside a collateralized settlement system. In such a case, Authorized Participants may be required to post collateral for some trades on an agency basis (that is, on behalf of other market participants), which only a limited number of Authorized Participants may be willing to do. This risk could also be heightened because the Fund uses a focused investment strategy. If Authorized Participants do not proceed with creation and redemption orders for shares, the Fund’s share price could trade at a discount to NAV and could face trading halts or de-listing.

For more information on the risks of investing in SmartETFs Smart Transportation & Technology ETF, you may also refer to the section Risk Factors and Special Considerations in the Statement of Additional Information.

**Performance**

The bar chart and table below provide some indication of the risks of investing in the SmartETFs Smart Transportation & Technology ETF by showing how the fund’s performance has varied from year to year and by showing how the average annual total returns of the Fund compare with the average annual total returns of a broad-based market index. Unlike the Fund’s returns, the index returns do not reflect any deductions for fees, expenses or taxes. For additional information on these indices, please see Index Descriptions in the prospectus. Updated performance information is available from the Fund’s website, www.smartetfs.com. Past performance, before or after taxes, is not indicative of future performance.

The annual returns bar chart demonstrates the risks of investing in the SmartETFs Smart Transportation & Technology ETF by showing how the Fund’s performance has varied from year to year. The table below also demonstrates these risks by showing how the Fund’s average annual returns compare with those of a broad-based securities market index. Unlike the Fund’s returns, the index returns do not reflect any deductions for fees, expenses or taxes. For additional information on these indices, please see Index Descriptions in the prospectus. (1) After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In certain cases, the figure representing “Return After Taxes on Distributions and Sale of Fund Shares” may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor.

Investment Adviser

Guinness Atkinson™ Asset Management, Inc. serves as the Fund’s investment adviser. For more information on the Investment Adviser, please see Management of the Fund in the prospectus and the Investment Adviser in the Statement of Additional Information. All security analysis and selection is provided by the Investment Adviser.
**Investment Sub-Adviser**

Penserra Capital Management, LLC (“Penserra”) serves as a sub-adviser to provide limited services to the Investment Adviser as needed in connection with various functions related to portfolio management, including, but not limited to, investing cash inflows, implementing investment strategy, researching and reviewing investment strategy, and overseeing members of their portfolio management team with more limited responsibilities.

**Portfolio Managers**

Will Riley and Jonathan Waghorn are the co-managers of the Fund since inception and are jointly and primarily responsible for the day-to-day management of the Fund’s portfolio. Mr. Riley has been associated with the Investment Adviser since 2007, and Mr. Waghorn has been associated with the Investment Adviser since 2013. Dustin Lewellyn, Ernesto Tong and Anand Desai are the portfolio managers of the Sub-adviser responsible for the Fund. Mr. Lewellyn has been with Penserra since 2012, and Messrs. Tong and Desai have been with Penserra since 2015. Together, these individuals are jointly and primarily responsible for the day-to-day management of the Fund’s portfolio.

For additional information, please see Portfolio Management in the prospectus and Portfolio Manager in the Statement of Additional Information.

**Purchase and Sale of Fund Shares**

SmartETFs Smart Transportation & Technology ETF is traded on the NYSE Arca exchange. Individual Fund shares may only be bought and sold in the secondary market (on the exchange) through a broker or dealer at a market price. If you wish to purchase or sell Fund shares, you should contact your broker. You may incur a brokerage fee when purchasing or selling Fund shares. Because Fund shares trade on an exchange at a market price rather than at the net asset value, Fund shares may trade at a price greater than net asset value (premium) or less than net asset value (discount). You may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Fund shares (bid) and the lowest price a seller is willing to accept for Fund shares (ask) when buying or selling shares in the secondary market (the “bid-ask spread”).

Information about the Fund’s net asset value, market price, premiums and discounts, and bid-asks spreads are available on the Fund’s website at www.smartetfs.com.

Only certain large investors that have contractually agreed to be, and have been designated as, Authorized Participants are able to purchase and redeem large blocks of ETF Shares directly with the Fund. Purchase and redemption activity conducted by Authorized Participants directly with the Fund will be done in increments of 25,000 share Creation Units. A Transaction Fee of $350 per Creation Unit transaction is charged to Authorized Participants who create or redeem shares in Creation Units. The Fund will issue or redeem Creation Units in return for a basket of assets that the Fund specifies each day and are effected at the net asset value (“NAV”) next determined after the receipt of an order in proper form. The value of the minimum initial or subsequent investment by an Authorized Participant varies with the value of the basket of assets specified by the Fund each day. ETF Shares may only be purchased or redeemed in Creation Units by submitting an order to the Fund’s transfer agent. More information about the purchase and sale of ETF Shares in Creation Units can be found in the Fund’s Statement of Additional Information under “Purchase and Redemption of Shares in Creation Units”.

**Tax Information**

The Fund intends to make distributions that will be taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Withdrawals from such tax-deferred arrangements may be taxable at the time of withdrawal. For additional information, please see Distributions and Taxes in the prospectus and Tax Matters in the Statement of Additional Information.
Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Adviser and its related companies may pay the intermediary for services related to the sale of Fund shares, which include participation in activities designed to inform intermediaries about the Fund, as well as marketing, education and training initiatives concerning the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary or your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
SUMMARY SECTION
SmartETFs Sustainable Energy II ETF

Investment Objective

SmartETFs Sustainable Energy II ETF’s investment objective is long-term capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of SmartETFs Sustainable Energy II ETF. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.

<table>
<thead>
<tr>
<th>Shareholder Fees (fees paid directly from your investment)</th>
<th>None</th>
</tr>
</thead>
<tbody>
<tr>
<td>Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investments)</td>
<td></td>
</tr>
<tr>
<td>Management Fees:</td>
<td>0.79%</td>
</tr>
<tr>
<td>Distribution and Service (12b-1) Fees:</td>
<td>None</td>

</tbody>
</table>

¹ The Adviser has contractually agreed to reduce its fees and/or pay ETF expenses (excluding acquired fund fees and expenses, interest, taxes, dividends on short positions and extraordinary expenses) in order to limit the Fund’s total annual operating expenses to 0.79% through June 30, 2026. This contractual arrangement may be terminated by the Board of the Fund at any time without penalty upon 60 days’ notice.

Example

This Example is intended to help you compare the cost of investing in SmartETFs Sustainable Energy II ETF with the cost of investing in other investment companies. The Example assumes that you invest $10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. This example does not include brokerage commissions that you may pay to buy and sell shares. Although your actual costs may be higher or lower, under these assumptions, your costs would be:

<table>
<thead>
<tr>
<th>1 Year</th>

<th>5 Years</th>
<th>10 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>$81</td>
<td>$252</td>
<td>$1,010</td>
<td>$3,020</td>
</tr>
</tbody>
</table>

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in the annual fund operating expenses or in the Example, may affect the Fund’s performance. During the Fund’s most recent fiscal year ended December 31, 2022, the Fund’s portfolio turnover rate was 19.02% of the average value of its portfolio.
Principal Investment Strategies

The Sustainable Energy II ETF invests, under normal market conditions, at least 80% of its net assets (plus any borrowings for investment purposes) in publicly-traded equity securities of sustainable energy companies (both U.S. and non-U.S.). The Fund will invest in companies that the Adviser considers to be “Sustainable Energy” companies, which are companies that, in the Adviser’s view, generate, produce or provide alternative or renewable sources of energy (as compared to more traditional sources of energy that can be environmentally depletive, such as fossil fuels like oil or coal or other hydrocarbon-based fuels), or that produce, generate, transport, or deliver energy or energy applications in a way that makes alternative or renewable energy more efficient or accessible or reduces the use of environmentally depletive energy resources. The Fund expects to invest in:

- energy companies that generate power through solar, wind, hydroelectric, tidal wave, geothermal, biomass or biofuels;
- companies that provide the equipment and technologies that enable these types of energy to be tapped, used, stored or transported, and
- companies that create, facilitate or improve technologies that conserve or enable more efficient use of energy.

The Fund will not change this policy unless it gives shareholders at least 60 days’ notice.

In determining whether to buy or sell a portfolio position, the Adviser uses proprietary and independent research and applies traditional fundamental analysis to assess a company’s business and business prospects, market capitalization, the valuation of the company, its dividend history, its ratio of debt to equity, as well as how the company’s business relates to sustainable characteristics like growth or development of alternative or renewable energy. The Adviser conducts an independent assessment of each portfolio company’s business. The Adviser categorizes the universe of companies it deems to be Sustainable Energy companies into four key areas related to the specific aspects of the energy business. Currently, these key areas are:

- **Generation:** companies involved in generating sustainable energy or companies working to transition from hydrocarbon-based fuels
- **Installation:** companies involved in manufacturing equipment for generation and consumption of sustainable energy
- **Displacement:** companies involved in the displacement or improved efficient usage of existing hydrocarbon-based energy
- **Electrification:** companies effectuating the switching from hydrocarbon-based fuel demand towards electricity or other renewal energy sources, especially for transportation

The Fund’s holdings in each key area may vary and the Fund may invest in Sustainable Energy companies that do not fall within these key areas. The Fund will not invest in companies that derive the majority of their revenues or profits from fossil fuel extraction or coal. Currently, the Adviser considers portfolio companies’ alignment with four of the United Nations Sustainable Development Goals: Goal 7: Affordable and Clean Energy; Goal 9: Industry, Innovation and Infrastructure; Goal 11: Sustainable Cities and Communities; and Goal 13: Climate Action. The Adviser may change these considerations at any time without notice to shareholders.

Equity securities may include common stocks, preferred stocks, securities convertible into common stocks, rights and warrants. The Fund is actively managed and the Fund’s allocations may vary depending on changing market conditions (including but not limited to, liquidity, volatility, and the number of companies meeting selection criteria). The Fund may invest in US companies and in companies economically tied to foreign countries, including, potentially, companies domiciled or traded in emerging markets, including China. For more information about how the Adviser determines that a company is economically tied to a foreign country, see “More About the Fund’s Investment Strategies and Risks” in this Prospectus. The Fund’s allocations among countries may vary depending on changing market conditions (including but not limited to, liquidity, volatility, and the number of companies
meeting selection criteria). The Fund’s currency is US Dollars, while some of its investments are denominated in foreign currencies.

The Fund will normally hold around 30 positions of approximately equal weight, but the portfolio may vary over time, and under normal market conditions, the Fund may have as few as 25 holdings, or may hold securities in 75 or more companies. The Fund may invest in companies of any market capitalization size, but under normal market conditions, the Fund will invest in companies with a minimum market capitalization of $500 million. Additional information on Principal Investment Strategies can be found in the prospectus. Also see Additional Investment Strategies and Risks in the Statement of Additional Information.

For temporary defensive purposes, any portion of the Fund’s total assets may be invested in cash and cash equivalents, including money market funds, to respond to adverse market, economic, political or other conditions. While the Fund is applying this temporary defensive strategy, it may be unable to achieve its investment objective.

The Fund is designed for investors who seek long-term capital appreciation through focused investment in equity securities of energy companies, wherever located, that are engaged in Sustainable Energy businesses.

**Principal Risks**

You can lose money by investing in shares of SmartETFs Sustainable Energy II ETF, and investing in shares of this Fund may be more risky than investing in a fund that only invests in U.S. securities due to increased volatility of foreign markets. Risks associated with an investment in the Fund can increase during times of market volatility. There can be no assurance that the Fund will achieve its investment objective. Risks associated with investments in the Fund can increase during times of market volatility.

The Fund is subject to the following risks, which could affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return or the Fund’s ability to meet its investment objective. These risks are also described in the “Principal Risks” and “Risks of Investing in Our Fund” sections of this prospectus and in the Fund’s Statement of Additional Information. You can lose money by investing in Shares of this Fund.

- **Industry Risks.** Prices of energy, whether traditional or sustainable, may fluctuate or decline due to many factors, including international political or economic developments, real or perceived, demand for energy and sustainable energy, production and distribution policies of OPEC (Organization of Petroleum Exporting Countries) and other oil-producing countries, energy conservation projects, changes in governmental regulations affecting companies in the energy business or related lines of business, including Sustainable Energy companies, changes in technology affecting Sustainable Energy, and changes in tax regulations relating to energy. Energy prices are also affected by limitations or incentives affecting particular energy sources. A decline in energy prices would likely have a negative effect on securities held by the Fund. The Fund’s focus on sustainable energy businesses exposes the Fund to greater market risk and potential monetary losses than if the Fund’s assets were diversified among various industries or sectors.

- **Equity Securities Risk.** The Fund invests in publicly-traded equity securities, and their value may fluctuate, sometimes rapidly and unpredictably, which means a security may be worth more or less than when it was purchased. These fluctuations can be based on a variety of factors including a company’s financial condition as well as macro-economic factors such as interest rates, inflation rates, global market conditions, and non-economic factors such as market perceptions and social or political events.

- **Market Risk.** General market conditions can affect the value of the Fund’s securities holdings. Market risk applies to individual securities, a particular sector or the entire economy. Recently, global financial markets have experienced a period of extreme stress which has resulted in unusual and extreme volatility in the equity markets and in the prices of individual securities. In some cases, the prices of securities issued by individual companies have been negatively impacted even though there may be
little or no apparent degradation in the financial conditions or prospects of that company. Global events, financial market shocks or interest rate events could cause equity securities generally to decline in value, including if fixed income securities become more favorable. These market conditions add significantly to the risk of short term volatility of the Fund.

- **Global Risks.** The Fund invests in companies in multiple countries, and companies in which the Fund invests may experience differing outcomes with respect to safety and security, economic uncertainties, natural and environmental conditions, health conditions (including pandemics such as Covid-19) and/or systemic market dislocations (including market dislocations due to events outside a company’s country or region, including supply chain events). The global interconnectivity of industries and companies, especially with respect to goods, can be negatively impacted by events occurring beyond a company’s principal geographic location. These events can contribute to volatility, valuation and liquidity issues, and can affect specific companies, countries, regions and global markets.

  - **Pandemic Risk.** In 2020, markets globally were impacted by the Covid-19 pandemic, which is ongoing. This pandemic adversely affected industries, including supply chains, as well as general financial conditions, and has resulted in restrictions on commercial activity (shutdowns), interruptions in labor and supply markets, economic stimulus packages and other governmental interventions, and reallocation of market resources. Total economic effects of Covid-19 cannot be predicted. Covid-19 may continue in the foreseeable future and could adversely affect companies in the Fund’s portfolio, including by affecting their operating capabilities or their willingness or ability to pay dividends, which could negatively impact stock prices as well as yield.

  - **Capital Controls and Sanctions Risk.** In 2022, a number of countries imposed capital controls and economic and other sanctions in response to Russia’s invasion of Ukraine. The range of sanctions and their impact continues to evolve but has included asset seizures, restrictions on the transfer or exchange of currency, restrictions on asset transfers, exclusions from international banking systems, export limitations and limitations on listing shares of companies that are economically tied to Russia and Belarus, including depositary receipts on shares of affected companies. Sanctions programs have been imposed by individual countries, but also on a coordinated basis. The duration of sanctions programs and capital controls in response to the invasion of Ukraine cannot be predicted with any certainty. Capital controls and/or sanctions could adversely impact a Fund’s ability to buy, sell or otherwise transfer securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for Fund shares, and otherwise cause the Fund to decline in value.

**Risks Associated with Investments in Companies outside the United States**

- **Investing in Non US Companies.** Investing in companies outside the U.S., including in countries in Europe and Asia, involves different and additional political, social, economic, legal and regulatory risks, based on the size of their securities markets, competition for investments, interest rates, global or foreign trade activities (restrictions and tariffs or threats of changes to restrictions or tariffs), and changes in the global economy, such as “Brexit”, the withdrawal of the United Kingdom from the European Union (EU), as well as changes due to global or coordinated sanctions activities. Impacts of Brexit are likely to be higher on companies with significant contacts with the United Kingdom, including companies in Europe. Non-US companies, whether in developed or emerging markets, may be more sensitive to these factors, which can increase volatility, reduce liquidity and negatively affect economic growth. The Fund’s ability to access foreign securities markets can be limited, which can affect availability, liquidity and pricing of foreign securities.

  - **Sensitivity to global events.** Non US securities may be more sensitive to changes in global economic activity, including interest rates as well as trading activity, including trade restrictions, tariffs, or threats of changes to restrictions or tariffs. These companies may be more sensitive to
global economic transitions and stresses, such as Brexit, central bank or government interventions (commonly involving interest rates but also stimulus and sanctions). Investing in non-US securities can also expose the Fund to risks associated with the potential imposition of economic or other sanctions against a particular country, or businesses or industries, including trade restrictions or tariffs (or threats thereof).

- **European Securities.** The Fund may invest in companies in Europe and the United Kingdom. Companies in countries in the European Union and the UK may be more sensitive to changes as a result of Brexit, the withdrawal of the United Kingdom from the European Union. These changes could include changes in how goods, technology or services are delivered or received between the European Union countries and the United Kingdom.

- **Legal, Accounting, Audit and Disclosure may vary.** Foreign countries have different legal, accounting, auditing and financial disclosure systems, which may make information about companies more difficult to understand, and less information may be available. Under foreign legal systems, different standards may apply for foreign governments to take over assets, restrict the ability to exchange currency or restrict the delivery of securities. Some foreign companies may be subject to special restrictions in U.S. markets due to non-compliance with U.S. audit inspection standards.

- **Securities of Companies in Asia.** The Fund may invest in securities of companies in Asia, including China and South Korea. Investments in securities of Chinese companies can be impacted by currency and exchange rate fluctuations, in addition to price volatility, illiquidity and changes in China’s regulatory, monetary and socioeconomic policies, and limitations on access to Chinese issuers.

  - Asia Pacific stock markets may experience volatility and instability, and these risks can apply to entire economies, particular sectors and particular securities. Asia Pacific stocks could rise or fall with changes in economic or political circumstances in specific countries, may fall out of favor with investors, and currencies of countries in the Asia Pacific region may decline in comparison to the U.S. dollar. Stocks economically tied to the Asia Pacific region may be more sensitive to economic, political, social or legal changes in countries in the Asia Pacific region, which could adversely affect the Fund’s investments.

  - **China.** China’s government exercises significant control over its capital markets and currency markets, including its securities markets. China is also an emerging market. The Fund’s investments may be affected by currency and exchange rate fluctuations, price volatility, illiquidity and trading restrictions, which can differ between China’s stock exchanges and stock exchanges that list securities of companies economically tied to China. Changes in the regulatory, monetary or socioeconomic policies in China, and limitations on access to China issuers (including limitations on access through variable interest entities (VIEs)), could adversely affect the Fund’s investments in China. Foreign investors, such as the Fund, may face different risks than domestic investors when investing in companies in China, especially with respect to lack of transparency, fraud, volatility, corporate incentives, macro-economic shocks, national security and changes in US-China policy. China’s policies can also impact securities of companies economically tied to Hong Kong and Taiwan. See “Risks of Investing in our Funds” for specific risks of investing in companies economically tied to China.

  - **South Korea Risks.** South Korea’s economy is sensitive to changes in international trade, and could be adversely affected if there is a downturn in export markets globally. Substantial political tensions exist between North Korea and South Korea. South Korea’s
economy and South Korean companies could be adversely affected by increases in tension between North Korea and South Korea.

- **Currency and Currency Exchange Risks.** The Fund’s currency is US Dollars, while some of its investments are denominated in foreign currencies. Foreign currencies may fluctuate against the US Dollar and some foreign currencies are more volatile, especially during times of economic stress, and foreign countries may limit trading or repatriation of currencies. The Fund’s NAV could be affected by a change in foreign currency exchange rates. The Fund may incur costs associated with exchanging dollars into foreign currencies, and vice versa, for investing in foreign securities. The value of Fund shares could decline if the foreign currency of a market in which the Fund invests declines against the US Dollar.

  - **China Currency Risk.** The Fund’s investments in Chinese issuers are subject to risks associated with China’s currency, which is subject to economic objectives of China’s government including devaluation. China has only comparatively recently moved from a pegged currency to a managed float. China’s currency, the Renminbi Yuan, is not completely freely tradable and may not at all times reflect economic fundamentals of China’s economy. The value of the Renminbi Yuan is subject to changes based on the economic objectives of the Chinese government, including devaluation in order to improve the competitiveness of Chinese goods in an effort to improve the Chinese balance of trade.

  - **Other Currency Risk.** Currencies of some countries in the Asia Pacific region are subject to greater volatility as compared to the US dollar. Currency volatility is relative and can be periodic. For some countries, their currency may not reflect entirely the fundamental components of a country’s economy. Some currencies, such as South Korea (Won), trade only in local markets and may be more volatile than other currencies. The Fund could pay more if it had to acquire a foreign currency when the amplitude of its volatility is high as measured against the US Dollar.

- **Foreign Securities Market Risks.** Foreign securities markets generally have lower trading volumes than U.S. markets, which means it may be more difficult for the Fund to buy or sell foreign securities. Additionally, trading on foreign securities markets may involve longer settlement periods and higher transaction costs. Some foreign securities markets are closed to trading for extended periods (foreseeable and unplanned), which could make the Fund’s holdings in those markets illiquid or hard to value. Government oversight of foreign stock exchanges and brokerage industries may be less stringent than in the United States. Some foreign securities markets restrict access by non-domestic investors. The Fund’s investments in securities traded on foreign markets could make this Fund more risky than a fund that only invests in securities traded on US exchanges.

- **Emerging Markets Risks.** The Fund may invest in companies in emerging markets, including China. Emerging market countries may generally have less established economies, smaller capital markets and greater social, economic, regulatory or political risks. These factors could contribute to increased volatility, liquidity risks and valuation risks. These risks apply to direct holdings in foreign companies and to holdings in depository receipts for foreign companies.

- **Expropriation Risk.** Investments in foreign countries are subject to expropriation risk, and the risk that foreign governments act to limit investment in foreign securities, through exchange controls, currency restrictions and taxation. There can be limits on the Fund’s ability to pursue and collect a legal judgment against a foreign government if an expropriation event occurs.
Other Principal Risks

- **Management Risk.** The Fund’s strategy may not achieve its investment objective; the portfolio managers’ qualitative judgments about portfolio companies or their securities may be incorrect or the Adviser might not properly implement the strategy.

- **Capitalization Risk.** The Fund invests in companies with a range of capitalizations, including small cap (under US$1 billion), medium cap (under US$5 billion) and large cap (US$10 billion or more). Small cap and medium cap companies may be more susceptible to financial downturns, have limited product lines, may be illiquid or experience volatility and may have limited financial resources. Large cap companies may have frequent price changes based on general economic conditions and may be adversely affected by declines among lines of business, and may be less agile in responding to market and product challenges. Investing in small-cap and medium-cap companies may make the Fund more risky than a fund that only invests in securities of larger capitalization companies.

- **Liquidity Risk.** The Fund invests in securities, which may become illiquid, and there is liquidity risk associated with the Fund’s own shares. Securities in which the Fund invests could become illiquid, which means that the securities cannot be sold within seven days under current market conditions without significantly affecting the price at which the investment is carried on the Fund’s books. Investments that become illiquid may be more difficult to value. The Fund’s performance will be more volatile. Investing in non-US securities may make the Fund more risky than a fund that only invests in securities of larger capitalization companies.

- **Fund Cybersecurity Risk.** Cybersecurity risk applies to the Fund, its service providers and the companies in which the Fund invests. Cybersecurity risk includes breaches, intentional or unintended, that may impact a company’s ability to operate, and could include data corruption, theft or loss, improper access to proprietary information, or interference with technology operations. Companies could suffer losses due to cybersecurity events, including fines, penalties, reputational injuries, as well as financial losses and legal and compliance expenses. Cybersecurity risks of the Fund include risks applicable to the Fund’s service providers. While the Fund and its service providers have established cybersecurity defenses, there is no guarantee that these defenses will be effective.

Risks of Investing in ETFs

- **Shares May Trade At Prices Other Than NAV.** “ETF Shares” are the Fund’s individual exchange-traded shares, which are listed for trading on the NYSE Arca. Shares are bought and sold in the secondary market at a market price. The Fund’s NAV is calculated once per day, at the end of the day. The market price of a share on the exchange could be higher than the NAV (premium), or lower than the NAV (discount).

  - **Market Price could vary from NAV.** The market price of an ETF Share on the exchange can change throughout the day and may differ from the Fund’s NAV per share, which is calculated only once per day, at the end of the day.

  - **Market Price could vary from NAV due to foreign holdings.** The Fund will hold shares of non-U.S. securities traded in local markets that close at a different time than the NYSE Arca. During the time when the NYSE Arca is open but after the applicable local market has closed, the price of a foreign security that is held by the Fund and included in the Fund’s NAV will be the most recent closing price in that security’s local market, updated for currency changes, until that local market opens again. In that case, the prices used in calculating the Fund’s NAV may be based on closing prices of securities traded in non-U.S. markets that have not been updated, except for currency changes.
When all or a portion of the Fund’s portfolio consists of securities traded in a market that is closed when the market for the Fund’s shares is open, there could be differences between the value of ETF shares and the value of the Fund’s underlying portfolio. This could lead to differences between the market price of the ETF Shares and the underlying value of the Fund shares. These differences can be magnified during times of significant market activity and could contribute to the ETF Shares trading at a premium or discount.

Costs of buying, selling or holding Fund Shares. Purchases and sales of ETF Shares on the exchange through a broker may incur a brokerage charge or commission, frequently a fixed amount; this may be a significant proportional cost for investors transacting in small numbers of shares. The difference between the price investors are willing to pay for ETF Shares (the “bid” price) and the price at which investors are willing to sell ETF Shares (the “ask” price) is called the “spread.” The spread with respect to ETF Shares varies over time based on the Fund’s trading volume and market liquidity, and is generally lower (or “narrower”) if the Fund has a lot of trading volume and market liquidity and higher (or “wider”) if the Fund has little trading volume and market liquidity. When the spread widens, or when premiums or discounts become larger than usual, particularly in times of market stress, investors may pay significantly more or receive significantly less than the underlying value of the Fund shares when they buy or sell ETF Shares in the secondary market. Because of the costs of buying and selling shares of the Fund, frequent trading may reduce investment returns. You could lose money if you sell your shares at a point when the market price is below the Fund’s NAV.

Cash Redemption Risk. The Fund may be required to sell portfolio securities if it is required to pay cash in redemption of Creation Units to Authorized Participants. Generally, the Fund will effectuate redemptions in kind. For some portfolio holdings traded in specific foreign markets that do not permit in-kind transfers, the Fund will need to sell securities and deliver cash to redeeming Authorized Participants. There is a risk that the Fund could lose money if it had to sell its securities in times of overall market turmoil or when the Fund’s portfolio securities have declined in value, or if the securities become illiquid. Selling securities could generate capital gains and cause the Fund to incur brokerage expenses and could result in tax consequences.

Redemption Risk. ETF Shares are not individually redeemable. The Fund only redeems ETF Shares in Creation Units, which are large blocks of shares, from Authorized Participants. If you want to liquidate some or all of your investment in shares of the Fund, you would have to sell them on the secondary market at prevailing market prices, which may be lower than NAV.

Absence of Active Trading Market Risk. Although ETF Shares will be listed on the NYSE Arca exchange, there is no guarantee that an active trading market for Fund shares will exist at all times. In times of market stress, markets can suffer erratic or unpredictable trading activity, extraordinary volatility or wide bid/ask spreads, which could cause some market makers and Authorized Participants to reduce their market activity or “step away” from making a market in ETF Shares, and market makers and Authorized Participants are not obligated to place or execute purchase and redemption orders. This could cause the Fund’s market price to deviate, materially, from the NAV, and reduce the effectiveness of the ETF arbitrage process (that is, arbitrage will be less effective at keeping the market price of ETF Shares aligned closely with the value of its underlying portfolio). Trading in ETF Shares on the NYSE Arca exchange may be halted if individual or market-wide “circuit breakers” are activated (circuit breakers halt trading for a specific period of time when the price of a particular security or overall market prices decline by a pre-determined percentage). Trading of the ETF Shares also could be halted if (1) the shares are delisted from the NYSE Arca exchange without first being listed on another exchange or (2) NYSE Arca exchange officials determine that halting is appropriate in the interest of a fair and orderly market or to protect investors. Any absence of an active trading market for ETF Shares could lead to a heightened risk that there will be a difference between the market price of an ETF Share and the underlying value of the ETF Share.
**Authorized Participant Risk.** Only a limited number of financial institutions that enter into an authorized participant agreement with the Fund may engage in creation or redemption transactions. If the Fund’s Authorized Participants decide not to create or redeem shares, shares may trade at a premium or discount to the Fund’s net asset value. This risk could be heightened because the Fund will invest in non-U.S. securities, which may be traded outside a collateralized settlement system. In such a case, Authorized Participants may be required to post collateral for some trades on an agency basis (that is, on behalf of other market participants), which only a limited number of Authorized Participants may be willing to do. This risk could also be heightened because the Fund uses a focused investment strategy. If Authorized Participants do not proceed with creation and redemption orders for shares, the Fund’s share price could trade at a discount to NAV and could face trading halts or de-listing.

For more information on the risks of investing in this Fund, please see the Principal Risks and Additional Risks of Investing in our Funds in the prospectus. You may also refer to the section Risk Factors and Special Considerations in the Statement of Additional Information.

**Performance**

The bar chart and table below provide some indication of the risks of investing in the SmartETFs Sustainable Energy II ETF by showing how the fund’s performance has varied from year to year and by showing how the average annual total returns of the Fund compare with the average annual total returns of a broad-based market index. Unlike the Fund’s returns, the index returns do not reflect any deductions for fees, expenses or taxes. For additional information on these indices, please see Index Descriptions in the prospectus. Updated performance information is available from the Fund’s website, www.smartetfs.com. Past performance does not necessarily indicate how the Fund will perform in future periods.

The annual returns bar chart demonstrates the risks of investing in the SmartETFs Sustainable Energy II ETF by showing how the Fund’s performance has varied from year to year. The table below also demonstrates these risks by showing how the Fund’s average annual returns compare with those of a broad-based securities market index. Unlike the Fund’s returns, the index returns do not reflect any deductions for fees, expenses or taxes. For additional information on these indices, please see Index Descriptions in the prospectus. Past performance, before or after taxes, is not indicative of future performance. Updated performance information is available on the Fund’s website www.smartetfs.com.

(1) After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In certain cases, the figure representing “Return After Taxes on Distributions and Sale of Fund Shares” may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor.

**Investment Adviser**

Guinness Atkinson™ Asset Management, Inc. serves as the Fund’s investment adviser. For more information on the Investment Adviser, please see Management of the Funds in the prospectus and the Investment Adviser in the Statement of Additional Information. All security analysis and selection is provided by the Investment Adviser.

**Investment Sub-Adviser**

Penserra Capital Management, LLC (“Penserra”). Penserra serves as a sub-adviser to provide limited services to the Investment Adviser as needed in connection with various functions related to portfolio management, including, but not limited to, investing cash inflows, implementing investment strategy, researching and reviewing investment strategy, and overseeing members of their portfolio management team with more limited responsibilities.

**Portfolio Managers**

Jonathan Waghorn and Will Riley, are the co-portfolio managers of the Fund. Mr. Waghorn has been with Guinness Atkinson since 2013, and Mr. Riley has been with Guinness Atkinson since 2007. Messrs. Waghorn and Riley are jointly and primarily responsible for the day-to-day management of the Fund’s portfolio.

Dustin Lewellyn, Ernesto Tong and Anand Desai are the portfolio managers of the sub-adviser responsible for the Fund. Mr. Lewellyn has been with Penserra since 2012, and Messrs. Tong and Desai have been with Penserra since 2015. Together, these individuals are jointly and primarily responsible for the day-to-day management of the Fund’s portfolio.

For additional information, please see Portfolio Management in the prospectus and Portfolio Manager in the Statement of Additional Information.
Purchase and Sale of Fund Shares

SmartETFs Sustainable Energy II ETF is traded on the NYSE Arca. Individual Fund shares may only be bought and sold in the secondary market (the exchange) through a broker or dealer at a market price. If you wish to purchase or sell Fund shares, you should contact your broker. You may incur a brokerage fee when purchasing or selling Fund shares. Because Fund shares trade on an exchange at a market price rather than at the net asset value, Fund shares may trade at a price greater than net asset value (premium) or less than net asset value (discount). You may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Fund shares (bid) and the lowest price a seller is willing to accept for Fund shares (ask) when buying or selling shares in the secondary market (the “bid-ask spread”).

Information about the Fund’s net asset value, market price, premiums and discounts, and bid-ask spreads are available on the Fund’s website at www.smartetfs.com.

Only certain large investors that have contractually agreed to be, and have been designated as, Authorized Participants are able to purchase and redeem large blocks of ETF Shares directly with the Fund. Purchase and redemption activity conducted by Authorized Participants directly with the Fund will be done in increments of 10,000 share Creation Units. A Transaction Fee of $450 per Creation Unit transaction is charged to Authorized Participants who create or redeem shares in Creation Units. The Fund will issue or redeem Creation Units in return for a basket of assets that the Fund specifies each day and are effected at the net asset value (“NAV”) next determined after the receipt of an order in proper form. The value of the minimum initial or subsequent investment by an Authorized Participant varies with the value of the basket of assets specified by the Fund each day. ETF Shares may only be purchased or redeemed in Creation Units by submitting an order to the Fund’s transfer agent. More information about the purchase and sale of ETF Shares in Creation Units can be found in the Fund’s Statement of Additional Information under “Purchase and Redemption of Shares in Creation Units”.

Tax Information

The Fund intends to make distributions that will be taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Withdrawals from such tax-deferred arrangements may be taxable at the time of withdrawal. For additional information, please see Distributions and Taxes in the prospectus and Tax Matters in the Statement of Additional Information.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Adviser and its related companies may pay the intermediary for services related to the sale of Fund shares, which include participation in activities designed to inform intermediaries about the Fund, as well as marketing, education and training initiatives concerning the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary or your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
MORE ABOUT EACH FUND’S INVESTMENT STRATEGIES AND RISKS

SmartETFs Advertising & Marketing Technology ETF

Investment Objective

SmartETFs Advertising & Marketing Technology ETF’s investment objective is long-term capital appreciation.

As described above in the summary portion, the Fund will invest in companies that develop, produce, or distribute advertising, and marketing products and services, especially in ways that are related to digital media or make advertising or marketing more tailored or efficient. The Adviser views Advertising and Marketing Technology as thematic concepts, not industry sectors.

The Fund is a thematic fund that looks for investment opportunities in a limited group of publicly traded companies that are involved in the development, production, adoption or deployment of products or services that are advertising or marketing technology related, or increase marketing, sales or customer support efficiency or enhance the customer experience (which is a form of marketing service). It will focus its investments on Advertising and Marketing Technology companies, and this can include companies that offer or operate the following types of businesses or services:

- Publishers that offer advertising with their content (whether print or digital), or generate advertising revenue
- Broadcasters
- Websites
- Networks
- Advertising agencies
- Public relations agencies
- Ad placement platforms or exchanges
- Creative development or production companies
- Customer relations management platforms
- Web-based marketing or email services

The Fund can also invest in companies that operate or manage new media platforms on which advertising is deployed or that are used by marketing technology companies. This could include companies that deliver advertising in connection through non-traditional media including gaming, entertainment or streaming services.

The Fund’s investment objective is non-fundamental and may be changed upon 60 days’ notice.

Principal Investment Strategies

The Fund is actively managed, meaning the Adviser will select the Fund’s holdings based on its own proprietary research, independent research and the Adviser’s own evaluation process. In determining whether to buy or sell a portfolio position, the Adviser identifies companies with favorable characteristics from the identifiable universe of companies it has compiled, and uses proprietary and independent research and applies traditional fundamental analysis to assess a company’s business and business prospects, its dividend history, the valuation of the company and its potential for growth. The Adviser also considers the business of the company and how this relates to advertising and marketing including their underlying technologies. In determining whether a company is an Advertising or Marketing Technology company, the Adviser considers the company’s revenues, assets, income, cash flows, and EBITDA as reported in its regulatory filings. The Adviser then monitors potential or actual investments for performance and risk perspectives, as well as to quantify drivers of return and assess company performance versus expectations.

The Fund’s investments in any particular sub-category of advertising or marketing companies, or in companies economically tied to any particular country, may vary depending on changing market conditions (including but not limited to, liquidity, volatility, and the number of companies meeting selection criteria).
The Fund invests in US and non-US companies. The Fund considers an issuer of securities to be a company economically tied to a particular country if it satisfies at least one of the following tests: (1) it is organized under the laws of a country, or has its headquarters in a country; (2) it derives a significant portion (i.e., 50% or more) of its total revenues, income or profits from business in a country but is listed elsewhere, or has a significant portion (i.e., 50% or more) of its assets in a country; or (3) its equity securities are traded principally on a stock exchange or in an over-the-counter market in a country. By applying these tests, it is possible that a particular issuer could be deemed to be from more than one country. The Fund’s currency is US Dollars, while some of its investments are denominated in foreign currencies.

Typically, the Fund will hold approximately 30 stocks of approximately equal weight. Under normal market conditions, the Fund may have as few as 25 holdings, or may hold securities in 75 or more companies. The Adviser will invest the Fund’s assets in securities of companies having a market capitalization of US$500 and above, and in companies domiciled in the U.S. and foreign countries, including, potentially, companies domiciled or traded in emerging markets. Outside the US, the Fund could invest in companies economically tied to countries in the Asia Pacific region, such as China and Japan, and potentially Hong Kong and Australia, as well as countries in Europe. The Fund will concentrate its investments in Advertising and Marketing Technology companies as defined by the Adviser, and these companies could be considered part of a range of industry groups including communications services, media and entertainment, information technology, software and services, and commercial and professional services. A downturn in these industry groups could have a larger impact on the Fund than on a fund that does not focus its investments in companies involved in a specific business segment such as Advertising or Marketing Technology.

Except as noted above, the Fund’s Board of Trustees (the “Board”) may change the Fund’s investment policies and strategies without prior notice to shareholders, but the Fund will give notice to shareholders at least 60 days in advance of such a change.

When current market, economic, political or other conditions are unstable and would impair the pursuit of the Fund’s investment objective, the Fund may temporarily invest up to 100% of its assets in cash, cash equivalents or high quality short-term money market instruments. When the Fund takes a temporary defensive position, the Fund may not achieve its investment objective. The Fund will not engage in market timing. The philosophy of the Fund is to remain fully invested.

Principal Risks of Investing in SmartETFs Advertising & Marketing Technology ETF

You can lose money by investing in this Fund. As discussed in the Summary Section and described further below, the SmartETFs Advertising & Marketing Technology ETF is subject to the risks associated with investing in equity securities, technology securities and foreign securities.

Investing in this Fund may be more risky than investing in a fund that does not apply a thematic strategy to invest in a particular set of companies, which are Advertising & Marketing Technology companies. The Fund will focus its investments in Advertising and Marketing Technology companies, many of which may be that invests only in U.S. securities due to the increased volatility of foreign markets. A downturn in this group of industries would have a larger impact on the Fund than on a fund that does not concentrate in Advertising and Marketing Technology companies.

In addition, investing in common stocks entails a number of risks. The stock markets in which the Fund invests may experience periods of volatility and instability. A variety of factors can negatively impact the value of common stocks. These factors include economic factors, such as changes in demand or supply, interest rates and inflation rates, as well as non-economic factors such as political events, including events specifically related to technology, technology access, data privacy and security, and global business interactions.

The Fund holds foreign securities, which may be traded on days and at times when the New York Stock Exchange (the “NYSE”) is closed, and the Fund’s NAV is not calculated. Accordingly, the NAV of the Fund may be affected
on days when shareholders are not able to buy or sell Fund shares. Investing in SmartETFs Advertising & Marketing Technology ETF may be more risky than investing in a fund that invests only in U.S. securities due to the increased volatility of foreign markets. Foreign securities experience more volatility than their domestic counterparts, in part because of higher political and economic risks, lack of reliable information, fluctuations in currency exchange rates and the risks that a foreign government may take over assets, restrict the ability to exchange currency or restrict the delivery of securities. All of the risks of investing in foreign securities are heightened by investing in emerging markets. Emerging markets have been more volatile than the markets of developed countries with more mature economies. For additional information on the calculation of the Fund’s NAVs, see “Pricing Fund Shares” later in this prospectus.

The Fund is subject to the risk that the earnings, dividends, and securities prices of companies in these businesses will be greatly affected by changes in the demand or supply for advertising and marketing activity. The Fund could also be adversely affected by domestic, foreign, federal, state or local state regulatory environments, especially with respect to information technology, data or privacy; tax policies; and the economic growth and political stability of the other countries.

See “Additional Risks of Investing in Our Funds” for a general discussion of the risks associated with investing in the Fund.

Additional Risks of Investing in our Funds

The risks of investing in the SmartETFs Advertising & Marketing Technology ETF are described below, and describe further the risks set forth in the Fund’s summary prospectus. More information about specific risks is also included in the Statement of Additional Information. Each risk factor described below could have a negative effect on the Fund’s performance and share price.

We cannot guarantee that the Fund will meet its investment objective or that the value of the Fund’s holdings will increase. If the Fund’s value declines, you could lose money. You should consider the risks described below before you decide to invest in this Fund.

Advertising & Marketing Technology Risks:

- **Advertising and Marketing Technology Risk.** While there are some well-established Advertising and Marketing Technology companies, the technology is advancing rapidly and participants are subject to intense competition, disruption and changing trends and tastes. The barriers to entry can be relatively low and smaller competitors in the field can disrupt advertising markets. Some technologies or software may be unproven or subject to cybersecurity or data privacy issues. These factors may mean rapid technological obsolescence, perhaps more so than traditional technology companies. Stocks of companies in the Fund’s portfolio may be volatile or subject to more than average market fluctuations. Some of the companies may experience rapid growth and trade at above average price to earnings multiples. These companies may be subject to greater market risk particularly if their earnings growth slows. These risks could adversely affect the value of companies in which the Fund invests.

- **Communications Services Sector Risk.** The Fund will invest in companies in the communications services sector, and these companies may be more vulnerable to product development cycles including obsolescence than other companies that are not as reliant upon digital and technological advancements and social media trends. Companies in the communication services sector can face rapid development and deployment of competitive innovations and products, some of which may be designed to “disrupt” established communication channels. Companies in this sector may also face competition, enhanced research and development costs (including platform access costs), risks of government regulation, as well as data security and privacy concerns. Domestic and international demand for advertising and marketing technology can change rapidly and without notice. These companies may also face increased risks of security breaches which may be aimed at enterprise data or customer/consumer data, the theft
of which could expose a company to business losses as well as fines or other monetary consequences. These risks apply to the sector as a whole and to individual companies within this sector.

- **Information Technology Sector Risk.** The Fund will invest in companies in the information technology sector, and these companies may be more sensitive to product development cycles, obsolescence, consumer tastes and trends and government interventions such as regulation and taxation. These companies may face obstacles in development and deployment of software, including limitations or threats of limitations by governments and regulators. Companies in the information technology sector face potential obsolescence due to rapid technology evolution, new product introductions, and changes in consumer tastes and trends, which can be impacted by social and political developments. Information technology companies could be adversely impacted if there is a loss of access to patented intellectual property necessary to operate their products. The Fund could lose money if a company in its portfolio is adversely affected by one of these risks.

- **Technology Risk.** The technologies used by marketing technology firms and their support systems, such as software, grids and networks, may be unproven, susceptible to obsolescence or subject to future regulation in countries or locations of deployment. Technologies may also lack scalability, are subject to competition and rapid changes in technology standards or development, and may be incompatible with future developments. Technologies also involve intellectual property components that are regulated or protected differently in various countries, and which is subject to risk of theft, misappropriation or vandalism. These technologies may also be at increased risk of failure or attack because they are designed to interact with other non-proprietary technologies and applications across one or more external networks. Companies producing technology or software upon which marketing technology or networks rely may decide to discontinue support for the technology or software or restrict its deployment into major markets. Software or technology involved including, networks, grids, infrastructure or services related to marketing technology could be adversely affected by network events or outages (local or global). These risks may cause the securities of companies making these products to be worth less than at the time of purchase. This risk applies to the sector as a whole and to individual securities within the sector.

- **Cybersecurity Risk.** Technologies created or deployed for marketing technology may be subject to greater cybersecurity risk than other companies. Technology programs and networks may be subject to an increased risk of attack or infiltration and may be more susceptible to “network” attacks or outages. Some of the companies in the industry are targets for hackers because they hold sensitive consumer information. These companies face increased cybersecurity risk costs and, if successfully hacked could experience a loss of revenue, reduced profits and reputational risk. These would likely mean a negative impact on their stock price.

- **Product Risk.** Companies creating products and technologies for marketing technology face considerable competition. There is no guarantee that companies that successfully create a product will obtain product adoption, or that a product will not become obsolete quickly. Companies in this area may have research and development expenses that are significantly higher than companies in other parts of the technology sector, which could make their securities less desirable.

- **Product Regulation Risk.** Marketing technology companies may be subject to multiple levels of regulation including local regulations and operating restrictions. They could be subject to domestic or foreign regulatory regimes governing consumer privacy, which have not yet been adopted. Limitations on applications for marketing technology could adversely affect the value of companies in which the Fund invests. Some of the companies in the marketing technology industry are already under scrutiny from US and other regulators concerned about consumer privacy. These companies could face fines and or negative impacts to their business depending on how these investigations are resolved. Further, many of the companies in the marketing technology industry may face similar investigations in the future.
SmartETFs Asia Pacific Dividend Builder ETF

Investment Objective

The Asia Pacific Dividend Builder ETF’s investment objective is to provide investors with dividend income and long-term capital growth.

Principal Investment Strategy

The Smart ETFS Asia Pacific Dividend Builder ETF invests at least 80% of its net assets (plus any borrowings for investment purposes) in publicly-traded dividend-producing equity securities of companies economically tied to countries in the Asia Pacific region. These equity securities include common stocks, preferred stocks, securities convertible into common stocks, rights and warrants. The Fund considers an issuer of securities to be a company economically tied to a country in the Asia Pacific region if it satisfies at least one of the following tests: (1) it is organized under the laws of a country in the Asia Pacific region or has its headquarters in a country in the Asia Pacific region; (2) it derives a significant portion (i.e., 50% or more) of its total revenues from business in a country in the Asia Pacific region but is listed elsewhere; or (3) its equity securities are traded principally on a stock exchange in a country in the Asia Pacific region or in an over-the-counter market in a country in the Asia Pacific region. By applying these tests, it is possible that a particular issuer could be deemed to be from more than one region or country. The Fund will not change this policy unless it gives shareholders at least 60 days’ notice. The Fund’s currency is US Dollars, while some of its investments are denominated in foreign currencies.

The Fund is actively managed, meaning the Adviser will select the Fund’s holdings based on its own proprietary research, independent research and the Adviser’s own evaluation process. The Adviser seeks to invest in companies that have returned a real cash flow (cash flow adjusted for inflation) on investment of at least 8% for each of the last 8 years, and, in the opinion of the Adviser, are likely to grow their dividend over time; however, this is one of several criteria used by the Adviser and it is possible that not all investments may meet this criterion. In determining whether to buy or sell a portfolio position, the Adviser identifies companies with favorable characteristics from the identifiable universe of companies it has compiled, and uses proprietary and independent research and applies traditional fundamental analysis to assess a company’s business and business prospects, its dividend history, the valuation of the company and its potential for consistent, real (after inflation) dividend growth while maintaining company value. The Adviser then monitors potential or actual investments for performance and risk perspectives, as well as to quantify drivers of return and assess company performance versus expectations.

In the Adviser’s view, investing in dividend-paying stocks permits investors to gain access to the more established companies in the Asia Pacific region. This strategy is designed to both reduce risk and provide some income. Under normal market conditions the Asia Pacific Dividend Builder ETF will invest in at least four different countries in the Asia Pacific region. Currently, the Adviser believes that the Fund’s investments will be in companies economically tied to the following countries:

- Australia
- Bangladesh
- China
- Hong Kong
- India
- Japan
- Indonesia
- Malaysia
- New Zealand
- Pakistan
- Philippines
- Singapore
- South Korea
- Sri Lanka
- Taiwan
- Thailand
- Vietnam
There is no guarantee that the Fund will be invested in companies in all of these countries at the same time. The Fund’s investments in companies in any particular country may vary depending on changing market conditions (including but not limited to, liquidity, volatility, and the number of companies meeting selection criteria). Typically the Fund will hold approximately 35 stocks of approximately equal weight. Under normal market conditions, the Fund may have as few as 25 holdings, or may hold securities in 75 or more companies. The Adviser will invest the Fund’s assets in securities of all market capitalization companies that are dividend-producing and in companies economically tied to countries in the Asia Pacific region, including, potentially, companies domiciled or traded in emerging markets. The Adviser may also consider investing in securities that it determines are likely to become income-producing.

Except as noted above, the Board may change the SmartETFs Asia Pacific Dividend Builder ETF’s investment policies and strategies without prior notice to shareholders.

When current market, economic, political or other conditions are unstable and would impair the pursuit of the Fund’s investment objective, the Fund may temporarily invest up to 100% of its assets in cash, cash equivalents or high quality short-term money market instruments. When the Fund takes a temporary defensive position, it may not achieve its investment objective. The Fund will not engage in market timing. The philosophy of the Fund is to remain invested.

**Additional Risks of Investing in our Funds**

The risks of investing in the SmartETFs Asia Pacific Dividend Builder ETF are described below, and describe further the risks set forth in the Fund’s summary prospectus. More information about specific risks is also included in the Statement of Additional Information. Each risk factor described below could have a negative effect on the Fund’s performance and share price.

Investing in this Fund may be more risky than investing in a fund that does not apply a thematic strategy to invest in a particular set of companies, in this case, companies that pay dividends.

- **Dividend Paying Securities Risk.** The Fund invests in securities that pay dividends. There is no guarantee that issuers of the stocks held by the Fund will declare dividends in the future or that, if declared, such dividends will remain at current levels or increase. Changes in dividend policies of companies held by a Fund, or in capital resources for such companies, could adversely affect the Fund. Dividend paying securities, as a group, may fall out of favor with the market and could underperform the overall equity market or stocks of companies that do not pay dividends.

We cannot guarantee that the Fund will meet its investment objective or that the value of the Fund’s holdings will increase. If the Fund’s value declines, you could lose money. You should consider the risks described below before you decide to invest in this Fund.
SmartETFs Dividend Builder ETF

Investment Objective

The SmartETFs Dividend Builder ETF seeks a moderate level of current income and consistent dividend growth at a rate that exceeds inflation.

Principal Investment Strategies

The SmartETFs Dividend Builder ETF will invest at least 80% of its net assets (plus any borrowings for investment purposes) in publicly-traded, equity securities in dividend-paying companies that the Adviser believes have the ability to consistently increase their dividend payments over the medium term. The Adviser uses fundamental analysis to assess a company’s ability to maintain consistent, real (after inflation) dividend growth. One key measure of a company’s ability to achieve consistent, real dividend growth is its consistency in generating returns on capital, which is a measure of income produced by a company when compared to capital invested in the company’s operations. The Adviser seeks to invest in companies that have returned a real cash flow (cash flow adjusted for inflation) on investment of at least 10% for each of the last 10 years and, in the opinion of the Adviser, is likely to grow its dividend over time; however, this is one of several criteria used by the Adviser and it is possible that not all investments may meet this criterion. The Fund will not change this policy unless it gives shareholders at least 60 days’ notice. Equity Securities may include common stocks, preferred stocks, securities convertible into common stocks, rights and warrants.

The Fund considers an issuer of securities to be a company economically tied to foreign country if it satisfies at least one of the following tests: (1) it is organized under the laws of a foreign country or has its headquarters in a foreign country; (2) it derives a significant portion (i.e., 50% or more) of its total revenues from business in a foreign country but is listed elsewhere; or (3) its equity securities are traded principally on a stock exchange in a foreign country or in an over-the-counter market in a foreign country. By applying these tests, it is possible that a particular issuer could be deemed to be from more than one country. The Fund’s currency is US Dollars, while some of its investments are denominated in foreign currencies.

Except as noted above, the Board may change the investment policies and strategies of the SmartETFs Dividend Builder ETF without prior notice to shareholders.

When current market, economic, political or other conditions are unsuitable and would impair the Fund’s pursuit of its investment objective, the Fund may temporarily invest up to 100% of its assets in cash, cash equivalents or high quality short-term money market instruments. When the Fund takes a temporary defensive position, it may not achieve its investment objective. The Fund will not engage in market timing. The philosophy of the Fund is to remain invested.

Principal Risks of Investing in Our Funds

The risks of investing in the SmartETFs are described below, and describe further the risks set forth in each Fund’s summary prospectus. More information about specific risks is also included in the Statement of Additional Information. Each risk factor described below could have a negative effect on a Fund’s performance and share price.

Investing in this Fund may be more risky than investing in a fund that does not apply a thematic strategy to invest in a particular set of companies, in this case, companies that pay dividends.

- **Dividend Paying Securities Risk.** The Fund invests in securities that pay dividends. There is no guarantee that issuers of the stocks held by the Fund will declare dividends in the future or that, if declared, such dividends will remain at current levels or increase. Changes in dividend policies of companies held by a Fund, or in capital resources for such companies, could adversely affect the Fund. Dividend paying securities, as a group, may fall out
of favor with the market and could underperform the overall equity market or stocks of companies that do not pay dividends.

The following risks apply to all of the SmartETFs. We cannot guarantee that a Fund will meet its investment objective or that the value of a Fund’s holdings will increase. If a Fund’s value declines, you could lose money. You should consider the risks described below before you decide to invest in our Funds. Except as noted each of these risks applies to each Fund.
**SmartETFs Smart Transportation & Technology ETF**

**Investment Objective**

SmartETFs Smart Transportation & Technology ETF’s investment objective is long-term capital appreciation.

SmartETFs Smart Transportation & Technology ETF seeks long term capital appreciation by investing in companies that are involved in developing transportation solutions and innovations that result in safer, cleaner or connected transportation, and smart transportation “as a service” and in Technology companies, including Technology companies whose products or services are used in transportation.

The Fund’s investment objective is non-fundamental and may be changed upon 60 days’ notice.

**Principal Investment Strategies**

The Fund invests primarily in publicly-traded equity securities of domestic or foreign companies across multiple sectors that are involved in the development and production of products or services for Smart Transportation, including products such as autonomous and/or electric vehicles, hybrid vehicles, and their components, smart transportation as a service companies and their networks, and Technology companies, including Technology companies whose products or services are used in transportation. This includes companies involved in the development of products and services that support Smart Transportation and Smart Transportation networks.

The Fund will normally hold 35 positions of approximately equal weight. The Fund will be actively managed, meaning the Adviser will select the Fund’s holdings based on its own proprietary research, independent research, and the Adviser’s own evaluation process. The Fund invests on a global basis, meaning there will likely be companies in the Fund that are domiciled and traded in the United States and in a variety of developed markets, including companies in foreign countries including but not limited to the UK, France, Germany, Italy, the Netherlands, Canada, Sweden, and Australia, and emerging markets including South Korea, Taiwan and China (including Hong Kong).

In identifying investments that the Fund will buy or sell, the Adviser identifies companies with favorable characteristics from the identifiable universe of companies it has compiled, and uses proprietary and independent research and applies traditional fundamental analysis to assess a company’s business and business prospects, the valuation of the company and its potential for share price appreciation or return. The Adviser then monitors potential or actual investments for performance and risk perspectives, as well as to quantify drivers of return and assess company performance versus expectations.

Also see Additional Investment Strategies and Risks in the Statement of Additional Information.

Except as noted above, the Board may change the investment policies and strategies of the SmartETFs Smart Transportation & Technology ETF; the Fund will give notice to shareholders at least 60 days in advance of such a change.

**Principal Risks of Investing in SmartETFs Smart Transportation & Technology ETF**

You can lose money investing in the Fund. The Fund is subject to the risks common to all funds that invest in equity securities and foreign securities. Investing in the Fund may be more risky than investing in a fund that invests only in U.S. securities due to the increased volatility of foreign markets.

We cannot guarantee that the Fund will meet its investment objective. You should consider the risks described below before you decide to invest in the Fund.
The SmartETFs Smart Transportation & Technology ETF is subject to the following risks, which could affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return or the Fund’s ability to meet its investment objectives, as well as other risks that are described in the “Principal Risks” and “Risks of Investing in Our Fund” sections of this prospectus and in the Fund’s Statement of Additional Information.

**Risks of Investing in Funds Investing in the Autonomous Vehicle and Electric Vehicle Sector**

The following risks apply to investments in autonomous and/or electric vehicles and companies that support these technologies and products:

- **Autonomous/Electric Vehicle Risk.** Autonomous and/or electric vehicles are a relatively new. These products might fail to be widely adopted by consumers or commercial users, and could suffer technical problems, supply or demand shortfalls (including due to import restrictions or as a result of tariffs on material imports), or be supplanted by other technologies. Autonomous and/or electric vehicles or their components, hardware, software or services, could become obsolete before they are fully embraced or deployed. Vehicles and their networks may rely on technologies, systems and software that are unproven, defective, malfunctioning, and are subject to cybersecurity threats; which could cause them to become obsolete more rapidly than traditional technologies and software. Vehicles may rely on fuel sources that are more sensitive to commodities market activity than traditional vehicle fuels and could be adversely affected by underlying commodity market activity. Some autonomous or electric vehicles may rely on batteries or fuel cells for which material inputs may be expensive or restricted. Some autonomous and/or electric vehicle projects may rely on government subsidies, frequently in alternative energy markets; and those subsidies could be reduced or eliminated, which would make the technology application less desirable. Software or technology involved in autonomous and/or electric vehicles, networks, grids, infrastructure or services related to autonomous and/or electric vehicles could also be adversely affected by general network events or outages (local or global), as well as specific events or outages. These risks could adversely affect the value of companies in which the Fund invests.

- **Technology Risk.** Autonomous and electric vehicles and their support systems, such as software, grids, networks, fuel and batteries, may be unproven, more susceptible to obsolescence or subject to future regulation in countries or locations of manufacture or deployment. Technologies may also lack scalability, are subject to competition and rapid changes in technology standards or development, and may be incompatible with future developments. Technologies also involve intellectual property components that are regulated or protected differently in various countries, and which is subject to risk of theft, misappropriation or vandalism. Companies producing these technologies may also be subject to greater cybersecurity risk than other companies, because the technologies are designed to interact with other non-proprietary technologies, software and applications across one or more external networks, which could make them more susceptible to attack or increase a potential risk of failure. Companies producing technology or software upon which autonomous and/or electric vehicles rely may decide to discontinue support for the technology or software or restrict its deployment into major markets. These risks may cause the securities of companies making these products to be worth less than at the time of purchase. This risk applies to the sector as a whole and to individual securities within the sector.

- **Cybersecurity Risk.** Technologies created or deployed for Smart Transportation products and services, including for vehicles or drive systems as well as for networks and intelligent roadways, may be subject to greater cybersecurity risk than other companies, because they include components designed to interact with or collect data from consumers. Technology programs and networks may be subject to an increased risk of attack or infiltration, including actions designed to obtain or control data or information that is intended to be maintained as confidential. This increased risk may be due to connectivity or interaction of multiple technologies having different sources as well as because Smart
Transportation networks need a variety of hardware and software components for full adoption. Smart transportation products and networks, and the associated technologies, could be adversely affected by local or global outages or cyber attacks, and could be targets of theft. A Smart Transportation network could be subjected to cyberactivity designed to obtain information about users or “data” that is designed to be confidential. A cyber event in a technology or program could be amplified across Smart Transportation networks or products.

- **Product Risk.** Companies creating products, technologies and services for autonomous or electric transportation, for passenger, commercial or freight usage, face considerable competition. The range of applications being considered, and products being developed, is open-ended and changes frequently. There is no guarantee that companies that successfully create a product will obtain product adoption, or that a product will not become obsolete quickly. Companies in this area may have research and development expenses that are significantly higher than companies in other parts of the transportation or technology industries.

- **Product Regulation Risk.** Autonomous vehicles and their technologies or networks may be subject to multiple levels of regulation including local regulations and operating restrictions, and these regulations could be inconsistent. In addition to regulations that apply to vehicles and transportation generally, they could be subject to domestic or foreign regulatory regimes governing “artificial intelligence”, which have not yet been adopted. It is possible that transportation networks will develop that will include significant barriers to entry or usage, or impose restrictions on usage that make them commercially undesirable. Limitations on the use of autonomous or electric vehicles could adversely affect the value of companies in which the Fund invests.

**Additional Risks of Investing in Our Funds**

The risks of investing in the SmartETFs are described below, and describe further the risks set forth in each Fund’s summary prospectus. The following risks apply to all of the SmartETFs. More information about specific risks is also included in the Statement of Additional Information. Each risk factor described below could have a negative effect on a Fund’s performance and share price.

Each Fund holds foreign securities. Foreign securities experience more volatility than their domestic counterparts, in part because of higher political and economic risks, lack of reliable information, fluctuations in currency exchange rates and the risks that a foreign government may take over assets, restrict the ability to exchange currency or restrict the delivery of securities. Investing in funds holding foreign securities or securities trading on foreign markets may be more risky than investing in a fund that invests only in U.S. securities due to the increased volatility of foreign markets. All of the risks of investing in foreign securities are heightened by investing in emerging markets. Emerging markets have been more volatile than the markets of developed countries with more mature economies.

Foreign securities may be traded on non-US exchanges, and may be traded on days and at times when the New York Stock Exchange (the “NYSE”) is closed, and the NAV of a Fund is not calculated. Accordingly, the NAV of a Fund may be affected on days when shareholders are not able to buy or sell ETF Shares. For additional information on the calculation of the Funds’ NAVs, see “Pricing Fund Shares” later in this Prospectus.

There is no guarantee that a Fund will meet its investment objective or that the value of a Fund’s holdings will increase. If a Fund’s value declines, you could lose money. You should consider the risks described below before you decide to invest in our Funds. Except as noted each of these risks applies to each Fund.

- **Equity Securities Risk.** The Fund invests in publicly-traded equity securities, and their value may fluctuate, sometimes rapidly and unpredictably, which means a security may be worth more or less than when it was purchased. These fluctuations can be based on a variety of factors including a company’s...
financial condition as well as macro-economic factors such as interest rates, inflation rates, global market conditions, and non-economic factors such as market perceptions and social or political events.

- **Market Risk.** The Fund invests in publicly-traded equity securities, which are subject to market risk. The market value of a security may go up or down, sometimes rapidly and unpredictably. These fluctuations may cause a security to be worth more or less than it was at the time of purchase. Market risk applies to individual securities, a particular sector or the entire economy. Recently, global financial markets have experienced a period of extreme stress which has resulted in unusual and extreme volatility in the equity markets and in the prices of individual securities. In some cases, the prices of securities issued by individual companies have been negatively impacted even though there may be little or no apparent degradation in the financial conditions or prospects of that company. Global financial markets can be affected by a variety of stresses due to a number of factors, including inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters or events, terrorism, regulatory events and government controls. The global financial markets and interest rate management could cause a decline in the value of equity securities generally if fixed income securities become more favorable. These market conditions add significantly to the risk of short term volatility of the Fund. The Fund’s NAV and price may fluctuate significantly over short and long periods.

- **Global Risks.** The Fund invests in companies in multiple countries and regions. Countries and regions may experience security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters, acts of God, infectious diseases and pandemics, recessions, and/or systemic market dislocations (including due to events outside of such countries or regions, including supply chain events), including interruptions in supply chains, shipping and transportation and resource allocations, all of which can adversely impact share prices of the Fund’s portfolio holdings. The global interconnectivity of companies and markets, especially with respects to goods, can be negatively impacted by events occurring in areas that are geographically removed from a company’s principal location. These events have resulted in, and in the future may lead, to increased short-term market volatility and could have adverse long-term effects, on specific companies, on a particular region’s economy or markets, or on the U.S. and world economies and markets generally, each of which may negatively impact the Fund’s investments. The value of a Fund’s portfolio holdings could decline generally or underperform other investments at any time. Global financial markets can also be affected by a variety of stresses, including inflation (or expectations for inflation), interest rates and interest rate management, global demand for particular products or resources, regulatory events and banking or government controls, any of which could cause a decline in the value of a security, and a decline in the value of equity securities generally if fixed income securities become more favorable. These market conditions add significantly to the risk of short term volatility of the Fund. The Fund’s NAV and price may fluctuate significantly over short and long periods.

- **Pandemic Risk.** Beginning in 2020, markets globally were impacted by the Covid-19 pandemic, which is ongoing and has adversely impacted a range of industries as well as general financial conditions, and can result in changing market conditions for securities, including trading closures, as well as trading costs and reduced liquidity. This pandemic has also affected working and trade conditions, resulting in mandated business closings, supply chain interruptions, and limitations on travel and transportation, as well as reduced or stressed working conditions. The current Covid-19 pandemic has damaged, and likely will continue to damage, the global economy. There is no certainty concerning how long the pandemic will last, the extent or efficacy of vaccines, or the impacts of government interventions to mitigate or remediate the effects of the pandemic. The extent of the damage to the individual or global economies is unknown. The Covid-19 pandemic may...
adversely affect companies in the Fund’s portfolio, including their ability and willingness to pay dividends, which could negatively impact their stock prices.

- **Capital Controls and Sanctions Risk.** In 2022, a number of countries imposed capital controls and economic and other sanctions in response to Russia’s invasion of Ukraine. The range of sanctions and their impact continues to evolve but has included asset seizures, restrictions on the transfer or exchange of currency, restrictions on asset transfers, exclusions from international banking systems, export limitations and limitations on listing shares of companies that are economically tied to Russia and Belarus, including depositary receipts on shares of affected companies. Sanctions programs have been imposed by individual countries, but also on a coordinated basis. The duration of sanctions programs and capital controls in response to the invasion of Ukraine cannot be predicted with any certainty. Capital controls and/or sanctions could adversely impact a Fund’s ability to buy, sell or otherwise transfer securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for Fund shares, and otherwise cause the Fund to decline in value.

- **Management Risk.** There is a risk that the investment strategy could be improperly implemented or fails to achieve the Fund’s objective. The Fund is actively managed, and the Fund’s investments are not selected to replicate an index. The Adviser’s portfolio managers exercise judgment in selecting portfolio securities for the Fund, especially in thematic investing; the portfolio managers’ judgment could be incorrect and the portfolio selections might not produce the desired results.

- **Capitalization Risk.** The Fund invests in companies with a range of capitalizations including small cap (under US$1 billion), mid cap (under US$5 billion) and large cap companies (US$10 billion or more). The Fund may also invest in micro-cap companies (less than US$500 million). Small-, medium- and micro-cap companies may be more susceptible to financial setbacks or downturns, may have limited production lines, may be illiquid or experience substantial volatility, and may have limited financial resources, any of which could cause their securities to decline in value. Micro-cap stocks may be susceptible to increased volatility, illiquidity and fraud risks, and there may be less information available about these companies. Some micro-cap stocks are not listed on exchanges and therefore have not had to meet exchange listing standards. Large capitalization companies may suffer more frequent price changes based on general economic conditions and market conditions, and may be less agile in responding quickly to market and product challenges and may be adversely affected by declines among lines of business. Investing in small-, medium- and micro-cap companies may make a Fund more risky than a fund that only invests in securities or large capitalization companies.

- **Liquidity Risk.** The Fund invests in securities, which may become illiquid. Illiquid, for this purpose, means that the security cannot be sold under current market conditions within seven days without significantly changing the price from the price at which the Fund carries the investment on its books. Investments that are illiquid could become difficult to value. A lack of liquidity in an investment could cause the Fund to decline in value, if the Fund cannot sell the holding at the desired time and price. An investment can become illiquid at any time for a number of reasons, including due to a lack of an active market for the security, a lack of market interest for the security, or an excess of sellers of the security which contributes to downward pricing pressure. If the Fund is forced to sell a security, to meet a redemption requests or for other reasons when the security is illiquid, the Fund could incur a loss. Liquidity risk is magnified in times of market stress. The Fund may be more sensitive to this risk because it invests in non-US securities. The Fund invests in securities issued by companies in China and Japan; for these securities, markets in China and Japan may close for an extended number of days for national holidays. Companies that are listed in or operating primarily
in emerging markets may face increased liquidity risks as compared to companies in developed markets. During periods of market stress, liquidity of the Fund’s shares may be adversely impacted if any of the Fund’s underlying portfolio securities faces liquidity issues, which could cause the Fund’s shares to trade at a premium or discount to the Fund’s NAV. The Fund has adopted a liquidity risk management program to manage liquidity risk of its underlying portfolio.

- **Fund Cybersecurity Risk.** The Fund, its service providers, and companies in which the Fund invests are subject to varying degrees of cybersecurity risk. Cybersecurity risk is the risk that unauthorized access can be made to information technology systems resulting in loss, and can include intentional or accidental events. Cybersecurity events can include unauthorized access to technology systems (such as through “hacking” or via malicious software), and may seek to remove or alter information or assets (including data), or otherwise disrupt operations. Cybersecurity events may also include external events such as “denial of service” attacks that render websites unavailable. A cybersecurity event affecting the Adviser, distributor, financial intermediaries (such as brokers) and other service providers (including, but not limited to, custodians, transfer agents, and administrators), market makers, authorized participants or the issuers of securities in which the Fund invests could disrupt Fund operations and adversely affect the Fund. Cybersecurity events can result in financial losses, the inability to process trades or transactions or calculate the Fund’s NAV, disclosure of confidential information, interference with trading activity, hampering the ability of the Fund and/or its service providers to conduct business, violations of privacy and other laws, regulatory fines, penalties, reputational damage, and/or additional legal, compliance and remediation costs. Cybersecurity events could also render fund records and information inaccessible, inaccurate or incomplete. Substantial costs may be incurred by the Fund and its service providers in order to resolve or prevent cyber incidents in the future. Although the Fund and the Adviser have implemented programs to deter or mitigate the risks of cybersecurity events, there is no guarantee that such plans are sufficient or that they address all foreseeable risks, particularly because neither the Fund nor the Adviser can control cybersecurity defenses of service providers, counterparties, intermediaries or the companies in which the Fund invests.

### Risks of Investing in Foreign Securities

- **Foreign Securities Risks.** Investments in foreign securities and foreign issuers (such as through depository receipts) have additional risks. These can include other market risks such as illiquidity, higher volatility and potential controls on foreign investments as well as political risks, economic risks (which may be tied to political risks), civil conflict, war, expropriation of assets, import or export controls. Investments in foreign securities are also subject to legal, regulatory, economic, political and social risks in their home countries. The Fund expects to make investments in foreign companies located in the United Kingdom and Europe, Australia and countries in Asia.

- **Legal System and Regulation Risks.** Foreign countries have different legal systems and different regulations and standards concerning financial disclosure, accounting, and auditing. Corporate financial information that would be disclosed under US law may not be available for companies domiciled in foreign countries, and less information may be available about a company’s operations than would be available about a US issuer. Foreign accounting and auditing standards may render a foreign corporate balance sheet more difficult to understand and interpret than one subject to U.S. law and standards. Additionally, government oversight of foreign stock exchanges and brokerage industries may be less stringent than in the United States. Investing in foreign securities can also expose a Fund to political, social and economic risks that differ from risks faced by US companies, including risks associated with the potential imposition of economic or other sanctions against a particular country, or businesses or industries, including trade restrictions or tariffs. For example, in 2020, the US imposed restrictions on
ownership of certain companies deemed to be closely connected with a foreign sovereign or its military. The Fund may not have the same rights as an investor in a company in a foreign country as accorded to investors in domestic companies.

- In 2020, the US enacted the Holding Foreign Companies Accountable Act (“HFCAA”), which requires foreign issuers with securities listed on US exchanges to be de-listed from US exchanges if those companies are audited by an auditor in a foreign country that does not permit inspection by the US Public Company Accounting Oversight Board. Currently, listed foreign issuers are required to disclose whether they are owned or controlled by foreign government entities or officials, and whether foreign government entities or officials assert control over the financial audit process or prohibit the PCAOB inspection of a company’s audit firm including the company’s audit. Regulations implementing the HFCAA were finalized in 2021. Under those regulations, a foreign company could not list shares on a U.S. stock exchange if the company does not permit oversight of the company’s audit by the PCAOB for three consecutive years. The full impact of the HFCAA cannot be predicted. In 2022, China regulators entered into an agreement with the PCAOB to facilitate access to the documents required for inspection of audit firms and audit documents with respect to Chinese issuers listed on US exchanges.

- **Currency and Currency Exchange Risk.** Most foreign stocks are denominated in the currency of the country where they are traded. The Fund’s currency is U.S. dollars, while some of its investments may be denominated in foreign currencies. Accordingly, some investments by the Fund may be subject to currency fluctuations because the Fund’s NAV, calculated in U.S. dollars, could be affected by a change in exchange rates. Some foreign currencies are more volatile in trading against the U.S. dollar, especially in times of economic stress, and some foreign countries impose limits on trading or repatriation of currency. The Fund’s NAV may decline if the foreign currency in a market in which the Fund invests declines as measured against the U.S. dollar. The Fund may also incur transaction costs associated with exchanging U.S. dollars into foreign currencies and vice-versa.

  - **China currency risk.** The Fund invests in securities of issuers in China. China has only comparatively recently moved from a pegged currency to a managed float and at times, China’s management of its currency may be considered aggressive. The Renminbi Yuan is not completely freely traded and its value at any given point in time may not reflect economic fundamentals. The value of the Renminbi Yuan is subject to changes based on the economic objectives of the Chinese government, including devaluation in order to improve the competitiveness of Chinese goods in an effort to improve the Chinese balance of trade.

  - **Currency rate volatility.** Some Asian currencies, such as the Won, the currency of South Korea, trade only in local markets and may be more volatile than other currencies and their value may not properly reflect the underlying economic fundamentals of their respective economies.

- **Foreign Securities Market Risks.** Foreign securities markets generally have less trading volume than U.S. markets, which means it may be more difficult for a Fund to buy or sell foreign securities, which increases the volatility of share prices on such markets. Additionally, trading on foreign securities markets may involve longer settlement periods and higher transaction costs. Many foreign securities markets are more concentrated than the US securities market as a smaller number of companies make up a larger percentage of the market. Therefore, the performance of a single company or group of companies could have a much greater impact on a foreign securities market than a single company or group of companies would on the US securities markets. Some foreign securities markets are closed to trading for extended periods, such as for scheduled holidays, which could make the Fund’s holdings in
those markets illiquid. The Fund’s investments in foreign issuers and depository receipts could make these holdings riskier than holdings in domestic companies.

Foreign securities experience more volatility than their domestic counterparts, in part because of higher political and economic risks, lack of reliable information, differences in accounting, audit or reporting standards, fluctuations in currency exchange rates and the risks that a foreign government may take over assets, restrict the ability to exchange currency or restrict the delivery of securities.

**Brexit Risk.** Companies in which the Fund invests could be affected by “Brexit”, the withdrawal of the United Kingdom from the European Union (the “EU”), which occurred in 2020. Although some elements of trading relationships between the UK and the EU have been finalized, there remains general uncertainty about other relationships, regulations, impacts on specific industries and enforcement effects. Investments (in any country, but potentially more significantly, in countries outside the U.S.) may be impacted by Brexit. The precise impacts of Brexit are not known, but Brexit could impact the value of UK currency, general economic conditions, interest rates and exchange rates and/or create general economic, political, or regulatory uncertainty, within the EU and globally. This uncertainty could impact investments due to trade barriers or restrictions, changes in data protection or privacy regulation, patent or trademark protections, and the potential that companies may be unable to perform commercial contracts as originally intended. The Fund could be adversely affected by Brexit if the companies in which the Fund invests are adversely affected by Brexit.

- **Emerging Market Risks.** The Fund may invest in companies in emerging markets, including China. Emerging market countries may have less established economies and may face greater social, economic, regulatory and political risks, and may have smaller or more limited capital markets, which could contribute to increased volatility or more difficulty in determining the value or liquidity of holdings. Securities issued by companies in emerging markets are subject to a greater risk of market interventions, inflationary or deflationary forces, and potentially more monetary policy influences which can affect a security’s value. Some emerging markets such as Taiwan and Hong Kong may face more risks due to changes in policies or political positions of China.

Economies of developing or emerging market countries may be more dependent on relatively few industries and may be more responsive to local and global changes. Governments of developing and emerging market countries may be more unstable as compared to more developed countries. Developing and emerging market countries may have less developed securities markets or exchanges, and legal and accounting systems. It may be more difficult to sell securities at acceptable prices and security prices may be more volatile than in countries with more mature markets. Currency values may fluctuate more in developing or emerging markets. Developing or emerging market countries may be more likely to impose government restrictions, including confiscatory taxation, expropriation or nationalization of a company’s assets, restrictions on foreign ownership of local companies and restrictions on withdrawing assets from the country. Investments in companies in developing or emerging market countries may be considered speculative.

- **Expropriation Risk.** Foreign governments may expropriate the Fund’s investments either directly by restricting the Fund’s ability to sell a security, or by imposing exchange controls that restrict the sale of a currency, or indirectly by taxing the Fund’s investments at such high levels as to constitute confiscation of the security. There may be limitations on the Fund’s ability to pursue and collect a legal judgment against a foreign government if an expropriation event were to occur.

**Risks Associated with Investments in Asia**

The Fund may invest in securities of companies in Asia, which are subject to special risks, some of them historical. Asian economies tend to be very export-oriented and may be adversely affected by trade and export limitations,
Risks of Investing in China. Investing in China is subject to risks of investing in emerging markets generally, and subject to risks specific to China:

- **China Risk.** Investing in securities of Chinese companies involves special risks, including fluctuations in the rate of exchange between China’s currency, the Renminbi Yuan, and the U.S. dollar, greater price volatility, illiquid markets, investment and repatriation controls, less developed corporate disclosure and governance standards, and market concerns about China’s desire or ability to develop and sustain credible legal, regulatory, monetary,
and socioeconomic systems. China’s policies may also impact investments in companies economically tied to Hong Kong and Taiwan, as part of China’s “one country, two systems” policies.

- Starting in 1978, China’s government has implemented economic reforms that focus on decentralization and evolution of China’s economy from a centrally planned economy dominated by government owned businesses to a more traditional market oriented economy. These reforms included de-centralizing elements of China’s internal economy and recognizing private entities and ownership.

- Economic reforms in China have generally been implemented in stages and have been modified by the central government over time. Many of the economic reform measures are experimental or unprecedented and may be changed at any time. In recent years China’s central government has modified and reversed some of the economic and financial liberalization reforms implemented during the 1980s and 1990s. Any significant change in China’s political, social or economic policies may have a negative impact on investments in companies economically tied to China.

- The regulatory, legal and accounting systems that apply to capital markets and companies in China may not be as well developed as those of developed countries. Accounting standards and practices may deviate significantly from international financial reporting standards, international accounting standards and generally accepted accounting standards. Settlement and clearing systems for securities markets and exchanges in China are newly developed, may have built-in preferences for domestic investors, and may not be well tested and are subject to increased risks of error or inefficiency, including due to technology.

Companies in China or economically tied to China may be subject to changes in regulations and tax policies going forward. The Fund’s investments in Chinese issuers may be subject to large fluctuations over short periods of time, and governmental involvement in and influence on the private sector may also impact the Fund as the Chinese government continues to evolve its economy and regulatory systems, especially with respect to securities. Tariffs, trade barriers or an economic downturn domestically, in China or globally, could adversely impact the value of securities issued by Chinese companies. The Fund’s holdings could be adversely affected if the government of China imposes export restrictions or trade barriers on the export of goods or services.

Companies in China or economically tied to China may also be subject to changes in regulations and policies imposed by other countries.

- In 2020, the US issued an executive order prohibiting US persons, including institutional investors like the Funds, from transacting in specific securities identified as “Communist Chinese military” companies. The order requires investors to divest from specific issuers by November 2021 and the identified companies were de-listed from US exchanges. The executive order can be expanded to cover more companies at any time.

- In 2020, the US enacted the Holding Foreign Companies Accountable Act (“HFCAA”), which requires foreign issuers with securities listed on US exchanges to be de-listed from US exchanges if those companies file audited financial statements but do not permit inspection or oversight by a US audit oversight authority of the auditing of their financial information. Currently, listed foreign issuers are required to disclose whether they are owned or controlled by foreign government entities or officials, and the assertion of control of foreign government entities or officials over the financial audit process or prohibit the PCAOB inspection of a company’s audit firm including the company’s audit. Regulations implementing the HFCAA were finalized in 2021. Under those regulations, a foreign company could not list shares on a U.S. stock exchange if the company does not permit oversight of the company’s audit by the PCAOB for three consecutive years. The full impact of the HFCAA cannot be predicted. In 2022, China regulators entered into an agreement with the PCAOB to facilitate access to
the documents required for inspection of audit firms and audit documents with respect to Chinese issuers listed on US exchanges.

• **Foreign Exchange Controls and Foreign Currency Considerations.** Chinese law requires that all domestic transactions be settled in Chinese currency, the Renminbi Yuan, and places significant restrictions on the remittance of foreign currency and strictly regulates currency exchange from Renminbi Yuan. Foreign investors may exchange foreign currencies only at specially authorized banks after complying with documentation requirements. The government of China controls currency conversion and exchange rates, and this could adversely affect operations and financial results of Chinese companies or companies economically tied to China and exposed to China currency risk. The government of China could devalue the RMB or impose restrictions that could have negative consequences for investment funds holding positions in companies based in or doing business in China.

  o **CNY/CNH.** China’s currency is traded both onshore (as “CNY”) and offshore (as “CNH”). Although these are the same currency, they are traded in different and separate markets and may not trade at the same rates, and they may move against the US dollar in different directions. Although more Renminbi are held outside of China, CNH cannot be freely transferred into or out of China. The Fund will incur costs associated with converting US dollars to CNY or CNH and for transacting between CNY and CNH. Divergence between CNH and CNY could adversely impact the Fund.

  o **Renminbi-denominated investments.** When the Fund invests into a Renminbi-denominated investment, the value of the investment could change based on changes in the exchange rate between the Renminbi and the US dollar. The supply of Renminbi, the ability to convert Renminbi, and currency exchange rates, are all subject to control by China’s government. This control could result in liquidity issues for the Renminbi, which could adversely affect the Fund’s investments in companies in China.

• **China Tax Risk.** Foreign investors in China could face tax liabilities. The Fund may have to comply with China tax withholding regulations, and may incur and pay tax liabilities that cannot be reclaimed. The Fund may establish a reserve for Chinese tax liabilities. If there is a shortfall in such a reserve, the Fund’s NAV may go down because the Fund will ultimately have to pay the additional tax liabilities. Tax and withholding regulations may be affected by trade wars.

• **China Market Risks.** The markets in China that are open to foreign investors are at a developing stage and the market capitalization and trading volume may be lower than those in more developed financial markets. Market volatility and potential lack of liquidity due to low trading volumes in China’s securities markets may result in prices of securities traded on such markets fluctuating significantly, and this could result in substantial volatility in the Fund’s share price.

  o **Market Restrictions.** China’s securities markets that are open for foreign investment impose restrictions on the type and amount of foreign ownership of securities. These restrictions may favor domestic investors in China over foreign investors. China’s government and regulators may also intervene in financial markets, by imposing restrictions on particular market activity (for example, “naked” short selling), and limiting how companies access capital in offshore markets. Market interventions can negatively affect the China securities markets generally and specific issuers, and the Fund’s investments could be adversely affected.

□ **Market Risks of Chinese Issuers and Issuers economically tied to China.** Foreign investors, such as the Fund, may face different risks than domestic investors when investing in companies in China. As compared to US companies, transparency into operations and accounting of companies in China may be
lacking. Foreign investments in Chinese issuers may be subject to increased risks of volatility and macro-economic shocks. Some Chinese companies (domestic or otherwise) may be subject to a greater risk of fraud, due to frequent government interventions, limits on credible standards in corporate governance, risks of insider dealing or market manipulations, and these risks may be enhanced if corporate incentives are implemented. Changes in US trade policy with China and national security concerns (of both the US and China) may also adversely affect investments in Chinese issuers and other issuers economically tied to China.

- **Variable Interest Entities.** Some Funds may invest in companies economically tied to China by investing in “Variable Interest Entities”, commonly referred to as VIEs. VIEs are a corporate legal and governance structure used by operating companies in China. In some sectors of China’s economy, foreign individuals and entities (including funds) are not permitted to own shares of Chinese companies. Instead, the companies create VIEs to facilitate foreign capital investment. In a VIE, a China-based operating company creates a shell company in another jurisdiction, and the shell company then enters into service and other contracts with the China-based operating company, including contracts that transfer to the VIE certain governance rights with respect to the Chinese company. The shares of the shell company are typically listed for trading on an exchange, such as the New York Stock Exchange. Typically, the VIE does not itself own an equity interest in the Chinese company, but the VIE reflects the payment streams due to service contract arrangements with the Chinese company. In this structure, the non-Chinese investor does not hold an equity interest in the Chinese company. As a result of the VIE, however, non-Chinese investors can obtain investment exposure to the Chinese company by holding stock in the shell company rather than in the Chinese company.

Although VIEs have been a long-standing industry practice to gain efficient, tradeable shares that are economically tied to operating companies in China that do not permit direct investment for foreign investors, China has never formally recognized the VIE structure. The government of China could determine, at any time and without notice, that the VIE structure does not comply with Chinese law. This could cause the contracts between the VIE and the Chinese operating company to become voidable or unenforceable, or otherwise limit the rights of the VIE and its investors to enforce the contracts.

Recently, the government of China proposed draft regulations that would apply to China-based companies raising capital offshore, including through VIE structures. These regulations have not been adopted, but would impose filing and disclosure obligations upon covered companies. Investors face uncertainty about future actions by the government of China that could significantly affect an operating company’s financial performance and the enforceability of the shell company’s contractual arrangements. It is uncertain whether Chinese officials or regulators will withdraw their implicit acceptance of the VIE structure, or whether any new laws, rules or regulations relating to VIE structures will be adopted or, if adopted, what impact they would have on the interests of foreign shareholders.

Although unlikely, China could prohibit VIEs or severely limit the ability of operating companies to transfer economic value to VIEs, or otherwise limit the ability of VIEs to exercise governance rights with respect to the Chinese operating company through contractual arrangements. If any of these adverse outcomes occur, the value of a Fund’s investment in a VIE would likely be materially and adversely affected, and if the impact is permanent, it could result in the loss of the Fund’s investment in the VIE, which could impact the Fund’s return.

- **Stock Connect Schemes.** The Funds may invest in domestic China securities (China A shares) listed on either of the Shanghai or Shenzhen Stock Exchanges via the Shanghai Hong Kong Stock Connect scheme or the Shenzhen Hong Kong Stock Connect scheme. These Stock Connect schemes are designed to deliver mutual stock market access between markets in mainland China and Hong Kong to permit
foreign investors to trade specific listed China “A” shares through a “Northbound Trading Link”. Each Stock Connect scheme imposes trading limitations and daily quotas on market participants, and once a daily quota is reached, further purchase orders are restricted. Not all domestic China securities are available through Stock Connect schemes, and securities acquired through Stock Connect schemes are held in nominee name by the clearing company. Stock Connect schemes are still developing and have risks of illiquidity, trading suspensions, quota limitations and market suspensions, clearing, settlement and custody risks that differ from such risk associated with Chinese securities that trade in other markets and from securities trading in other securities markets generally. The Fund’s access to securities and ability to buy or sell securities through a Stock Connect scheme could be adversely affected at any time by regulatory actions that apply to the Stock Connect scheme. If such an event occurs, the Fund’s ability to value its holdings purchased through a Stock Connect scheme could be limited and the value of the Fund shares could decline.
Risks of Investing in ETFs

- **Shares May Trade At Prices Other Than NAV.** ETF Shares are exchanged-traded shares, and are listed for trading on the NYSE Arca, and ETF Shares are bought and sold in the secondary market at market prices. The Fund’s NAV is calculated once per day, at the end of the day. The market price of a share on the exchange could be higher than the NAV (premium) or lower than the NAV (discount).

*Variation between market price and NAV.* The market price of an ETF Share on the exchange may differ from the NAV for many reasons, including due to significant market activity, a lack of trading activity for the shares, factors affecting companies in which the Fund is invested, such as liquidity, or for other reasons. The Fund will hold shares of non-U.S. securities traded in local markets that close at a different time than the NYSE Arca. During the time when the NYSE Arca is open but after the applicable local market has closed, the price of a foreign security that is included in the Fund’s portfolio (and the Fund’s NAV) will be the closing price on that security’s local market, updated for currency changes, until that local market opens again. As a result, the Fund’s NAV may be calculated using “stale” prices of foreign securities; the bid/ask spread and resulting premium/discount to the Fund’s NAV may widen because local market prices will not change until local markets re-open. In that case, the prices used in calculating the Fund’s NAV could be based on closing prices of securities traded in non-U.S. markets that have not been updated, except for currency changes. This may contribute to a Fund’s NAV varying more widely from its market price.

**Costs of buying/selling ETF Shares.** Purchases and sales of Shares on the exchange through a broker may incur a brokerage charge or commission, frequently a fixed amount; this may be a significant proportional cost for investors transacting in small numbers of shares. The difference between the price that investors are willing to pay for Fund Shares (the “bid” price) and the price at which investors are willing to sell Fund Shares (the “ask” price) is called the “spread.” The spread with respect to the Fund’s shares varies over time based on the Fund’s trading volume and market liquidity, and is generally lower (or “narrower”) if the Fund has a lot of trading volume and market liquidity and higher (or “wider”) if the Fund has little trading volume and market liquidity. Because of the costs of buying and selling ETF shares, frequent trading may reduce investment returns. You could lose money if you sell your shares at a point when the market price is below the Fund’s NAV.

**Information about a Fund's spread.** The SmartETF’s website contains information about each Fund’s per share NAV, closing market price, premiums and discounts, and the median bid/ask spread. If a Fund’s premium or discount exceeds 2% for more than 7 consecutive trading days, the website will also disclose the factors that the investment adviser reasonably believes materially contribute to this trading premium or discount.

Because Fund shares are exchanged-traded shares, and are listed for trading on the NYSE Arca, they may be bought and sold at market prices which may vary from the Fund’s most recently calculated NAV, which is calculated at the end of the business day. There may be times when the market price of a share on the exchange is higher than the NAV (premium), or lower than the NAV (discount). The market price may differ from the NAV for many reasons, including due to significant market activity, a lack of trading activity for the shares, factors affecting companies in which the Fund is invested, such as liquidity, or for other reasons. Because authorized participant can create and redeem shares in Creation Units, the Adviser believes that discounts or premiums will not be sustainable. High market volatility, disruptions to the process for creations and redemptions, and adverse impacts that affect authorized participants can result in longer term variations between the Fund’s share price and NAV.
• **Cash Redemption Risk.** A Fund may be required to sell portfolio securities if it is required to pay cash in redemption of Creation Units to Authorized Participants. Generally the Fund will effectuate redemptions in kind, meaning that when an Authorized Participant submits an order to redeem a creation unit, the Fund will deliver stock to the redeeming Authorized Participant. In some instances, however, the Fund will need to sell some securities and deliver cash instead of securities to effect a redemption with respect to a portion of the Fund’s portfolio. Certain foreign securities markets do not permit in kind transfers and in these cases, the Fund will sell the affected securities and deliver the proceeds of those sales in cash as part of the Fund’s settlement of a redemption order from an Authorized Participant. There may be other instances where a cash settlement of certain securities will be required. There is a risk that the Fund could lose money if it had to sell its securities in times of overall market turmoil or when the Fund’s portfolio securities have declined in value, or if the securities become illiquid. Selling securities could generate capital gains, which could be taxable, and could cause the Fund to incur brokerage costs, which could decrease its return unless offset by a Transaction Fee.

• **Redemption Risk.** ETF shares are not individually redeemable. Each Fund only redeems Fund shares in Creation Units, which are large blocks of shares, from Authorized Participants. If you want to liquidate some or all of your investment in Fund shares, you would have to sell them on the secondary market at prevailing market prices, which may be lower than NAV.

• **Absence of Active Trading Market Risk.** Although Fund shares are listed on the NYSE Arca exchange, there is no guarantee that an active trading market for Fund shares will exist at all times. In times of market stress, markets can suffer erratic or unpredictable trading activity, extraordinary volatility or wide bid/ask spreads, which could cause some market makers and Authorized Participants to reduce their market activity or “step away” from making a market in Fund shares, and market makers and Authorized Participants are not obligated to place or execute purchase and redemption orders. This could cause a Fund’s market price to deviate, materially, from the NAV, and reduce the effectiveness of the ETF arbitrage process (that is, arbitrage will be less effective at keeping the market price of a Fund aligned closely with the value of its underlying portfolio). Trading of the shares on the NYSE Arca exchange may be halted if individual or market-wide “circuit breakers” are activated (circuit breakers halt trading for a specific period of time when the price of a particular security or overall market prices decline by a pre-determined percentage). Trading of the shares also could be halted if (1) the shares are delisted from the NYSE Arca exchange without first being listed on another exchange or (2) NYSE Arca exchange officials determine that halting is appropriate in the interest of a fair and orderly market or to protect investors.

• **Authorized Participant Concentration Risk.** Only a limited number of financial institutions that enter into an authorized participant arrangement with the Fund may engage in creation or redemption transactions. If the Fund’s Authorized Participants decide not to create or redeem shares, shares may trade at a premium or discount to the Fund’s net asset value. This risk could be heightened because the Funds will invest in non-U.S. securities, which may be traded outside a collateralized settlement system. In such a case, Authorized Participants may be required to post collateral for some trades on an agency basis (that is, on behalf of other market participants), which only a limited number of Authorized Participants may be willing to do. If authorized participants do not proceed with creation and redemption orders for shares, a Fund’s shares could trade at a discount to NAV and could face trading halts or de-listing.

*Portfolio Holding Disclosure Policy.* The SmartETFs operate in a transparent fashion with respect to Fund holdings. Each Fund’s portfolio holdings are disclosed each business day on the website at www.smartefts.com. For each Fund, prior to the opening of trading on a Fund’s primary listing exchange, which is normally at 9:30 a.m. Eastern
Standard Time, the Adviser will publish the list of securities (by name and quantity) that constitute a Creation Basket, as well as the estimated “balancing amount”. This disclosure occurs on the Fund’s website and is also disseminated through the National Securities Clearing Corporation (NSCC) and/or other fee-based subscription service to NSCC members and/or subscribers. When a change is made to the portfolio, the change will generally be announced at or after the market close, although changes could be made, and publicly announced, during market hours. This could allow investors the opportunity to “front-run” a Fund, meaning other market participants could engage in a practice wherein they purchase holdings in the Fund with the expectation that the Fund would shortly need to purchase the same securities and, in doing so, cause the prices of these holdings to increase. However, because the Funds plan on creating shares primarily in exchange for the Fund’s holdings (in-kind purchases), the Adviser does not believe that existing investors would be harmed by the real time disclosure of a Fund’s holdings.

Additionally, each Fund will disclose its complete portfolio holdings as of the end of its fiscal year and second fiscal quarter in its annual and semi-annual report to shareholders. Each Fund also discloses its complete portfolio holdings at the end of its first and third fiscal quarters in its Form N-Q, filed with the SEC no later than 60 days after the end of the fiscal period.

**Website Disclosures.** The following information about each Fund is available on the SmartETFs website, www.smartetfs.com, which is publicly available and free of charge:

- Complete portfolio holdings, including for each security, the ticker symbol, CUSIP, description and the quantity and weight of each security in the Fund;
- The names and quantities of securities that constitute the Fund’s Creation Basket and estimated balancing amount (which will be posted before the commencement of the trading day);
- The current NAV per share, market price, and premium/discount, each as of the end of the prior business day;
- A table showing the number of days that the Fund shares traded at a premium or discount during the most recently completed fiscal year and quarter (or for the life of the fund for new Funds);
- A line graph showing the Fund’s premiums or discounts for the most recently completed calendar year and calendar quarter (or for the life of the fund for new funds);
- The median bid/ask spread for the Fund on a rolling 30-day basis; and
- If the premium or discount is greater than 2% for more than seven consecutive trading days, a statement that the premium/discount was greater than 2% and a discussion of the factors that are reasonably believed to have materially contributed to this premium/discount.

For information on the Fund’s current holdings please visit www.smartetfs.com.
SmartETFs Sustainable Energy II ETF

SmartETFs Sustainable Energy II ETF’s investment objective is long-term capital appreciation.

Principal Investment Strategies

The Sustainable Energy II Fund invests at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities of Energy companies (both U.S. and non-U.S.). The Fund will focus on a particular group of Energy companies that the Adviser considers to be “Sustainable Energy” companies, which are companies that, in the Adviser’s view, generate or provide alternative or renewable sources of energy (as compared to more traditional sources of energy that can be environmentally depletive), or that produce, generate, transport, or deliver energy or energy applications in a way that makes alternative or renewable energy more efficient or accessible. The Fund expects to invest in energy companies that generate power through solar, wind, hydroelectric, tidal wave, geothermal, biomass or biofuels and in companies that provide the equipment and technologies that enable these sources to be tapped, used, stored or transported, including companies that create, facilitate or improve technologies that conserve or enable more efficient use of energy. The Fund will not change this policy unless it gives shareholders at least 60 days’ notice. Equity securities may include common stocks, preferred stocks, securities convertible into common stocks, rights and warrants.

The Fund seeks to invest in companies that are positioned to benefit from many of the long-term themes associated with the transition towards a lower carbon economy and sustainable energy generation. Currently, the Adviser considers portfolio companies’ alignment with four of the United Nations Sustainable Development Goals: Goal 7: Affordable and Clean Energy; Goal 9: Industry, Innovation and Infrastructure; Goal 11: Sustainable Cities and Communities; and Goal 13: Climate Action. The Adviser may change these considerations at any time without notice to shareholders.

The Fund is actively managed, meaning the Adviser will select the Fund’s holdings based on its own proprietary research, independent research and the Adviser’s own evaluation process. In determining whether to buy or sell a portfolio position, the Adviser identifies companies with favorable characteristics from the identifiable universe of companies it has compiled, and uses proprietary and independent research and applies traditional fundamental analysis to assess a company’s business and business prospects, its dividend history, the valuation of the company and its potential for growth. The Adviser also considers the business of the company and how this relates to alternative or renewable energy or energy efficiency. The Adviser then monitors potential or actual investments for performance and risk perspectives, as well as to quantify drivers of return and assess company performance versus expectations.

The Fund’s investments in any particular sub-category of Sustainable Energy companies, or in companies in any particular country, may vary depending on changing market conditions (including but not limited to, liquidity, volatility, and the number of companies meeting selection criteria). The Fund’s currency is US Dollars, while some of its investments are denominated in foreign currencies.

Typically, the Fund will hold approximately 35 stocks of approximately equal weight. Under normal market conditions, the Fund may have as few as 25 holdings, or may hold securities in 75 or more companies. The Adviser will invest the Fund’s assets in securities of all market capitalization companies and in companies economically tied to the U.S. and foreign countries, including, potentially, companies domiciled or traded in emerging markets.

The Fund invests in US and non-US companies. The Fund considers an issuer of securities to be a company economically tied to a particular country if it satisfies at least one of the following tests: (1) it is organized under the laws of a country, or has its headquarters in a country; (2) it derives a significant portion (i.e., 50% or more) of its total revenues, income or profits from business in a country but is listed elsewhere, or has a significant portion (i.e., 50% or more) of its assets in a country; or (3) its equity securities are traded principally on a stock exchange or in an over-the-counter market in a country. By applying these tests, it is possible that a particular issuer could be deemed to be from more than one country.
Except as noted above, the Fund’s Board of Trustees (the “Board”) may change the Sustainable Energy II ETF’s investment policies and strategies without prior notice to shareholders; the Fund will give notice to shareholders at least 60 days in advance of such a change.

When current market, economic, political or other conditions are unstable and would impair the pursuit of the Fund’s investment objective, the Fund may temporarily invest up to 100% of its assets in cash, cash equivalents or high quality short-term money market instruments. When the Fund takes a temporary defensive position, the Fund may not achieve its investment objective. The Fund will not engage in market timing. The philosophy of the Fund is to remain fully invested.

**Principal Risks of Investing in SmartETFs Sustainable Energy II ETF**

The principal risks of investing in the SmartETFs Sustainable Energy II ETF are described below, and describe further the risks set forth in summary prospectus. More information about specific risks is also included in the Statement of Additional Information. Each risk factor described below could have a negative effect on the Fund’s performance and share price.

Investing in this Fund may be more risky than investing in a Fund that does not apply a thematic strategy (Sustainable Energy) to invest in a particular set of companies. The Fund will focus its investments in Sustainable Energy companies, many of which may be in the energy sector, and specifically by investing in companies that generate, produce or distribute energy from alternative sources: solar energy, wind energy, biofuels, hydrogen, geothermal energy, energy efficiency, and hydroelectricity. A downturn in this group of industries would have a larger impact on the Fund than on a fund that does not concentrate in these industries. The Adviser determines an issuer’s industry classification based on the Adviser’s evaluation of the issuer’s operations.

The Fund is subject to the risk that the earnings, dividends, and securities prices of energy companies will be greatly affected by changes in the prices and supplies of oil and other energy fuels. Prices and supplies of energy may fluctuate significantly over any time period due to many factors, including international economic or political developments; production and distribution policies of the Organization of Petroleum Exporting Countries (OPEC) and other oil-producing countries; relationships among OPEC members and other oil-producing countries and between these countries and oil-importing nations; changes in energy demand or supply; energy conservation; foreign, federal and state regulatory environments; tax policies; and the economic growth and political stability of the key energy-consuming and energy-producing countries.

We cannot guarantee that the Fund will meet its investment objective or that the value of the Fund’s holdings will increase. If the Fund’s value declines, you could lose money. You should consider the risks described below before you decide to invest in this Fund.
MANAGEMENT OF THE FUNDS

Investment Adviser

Guinness Atkinson™ Asset Management, Inc. is the investment adviser for the SmartETFs Advertising & Marketing Technology ETF, SmartETFs Asia Pacific Dividend Builder ETF, SmartETFs Dividend Builder ETF, SmartETFs Smart Transportation & Technology ETF, and SmartETFs Sustainable Energy II ETF. Guinness Atkinson™ supervises all aspects of each Fund’s operations and advises the Funds, subject to oversight by the Board. Guinness Atkinson™ is solely responsible for investment strategy and security selection. For providing these services, the Funds will pay Guinness Atkinson™ the annual advisory fee shown below.

Under the agreement between Guinness Atkinson™ and each Fund, each Fund pays the Adviser a fee for the services and facilities it provides on a monthly basis. Each Fund is responsible for other expenses not assumed by the Adviser, including brokerage expenses in connection with portfolio transactions or creation/redemption transactions, legal fees, compensation and expenses of the Board of Trustees, extraordinary expenses, distribution fees and expenses, interest, taxes and the advisory fee. Expenses not specifically payable by the Adviser are payable by the Fund.

In addition to the advisory fees discussed above, each Fund incurs other expenses such as custodian, transfer agency, administration and accounting and other customary Fund expenses. Expenses that are attributable to a fund are charged against the Fund’s income in determining net income for dividend purposes. The Adviser has contractually agreed with each Fund to waive fees and/or reimburse expenses to the extent the total annual fund operating expenses (excluding acquired fund fees and expenses, interest, taxes, dividends on short positions and extraordinary expenses) in order to limit Total Annual Fund Operating Expenses for the Funds to the amounts (“Expense Caps”) shown below of the respective Fund’s average net assets. This expense limitation is in place through June 30, 2026 and may be renewed annually by the Board.

Guinness Atkinson™ is a Delaware corporation with offices in the United States and London. The U.S. offices are located at 251 South Lake Avenue, Suite 800, Pasadena, California 91101. Guinness Atkinson™’s London offices are located at 18 Smith Square, Westminster, London, SW1P 3HZ, United Kingdom. Founded in November 2002 by then-current and former senior executives of Investec Asset Management U.S. Limited (“Investec”), Guinness Atkinson™ managed approximately $273 million in mutual fund and exchange-traded fund assets as of December 31, 2022. Guinness Atkinson™ is under common control with Guinness Asset Management Limited and Guinness Capital Management Limited, also located at 18 Smith Square, Westminster, London, SW1P 3HZ, United Kingdom. These three entities share offices and other resources.
A discussion regarding the basis for the Board of Trustees’ approval of the Fund’s investment advisory agreement will appear in the first annual or semi-annual report to shareholders following commencement of the Funds’ operations.

Sub-adviser

Penserra Capital Management LLC serves as a sub-adviser to the SmartETFs Smart Advertising & Technology ETF, SmartETFs Smart Transportation & Technology ETF, and SmartETFs Sustainable Energy II ETF. Penserra provides a range of services directly to the Adviser, including functions related to portfolio management, such as investing cash inflows, implementing investment strategy, and researching and reviewing investment strategy. Penserra is compensated by the Adviser and does not receive payment from the Funds.

Penserra Capital Management LLC is a New York limited liability company located at 4 Orinda Way, Suite 100A, Orinda, California 94563. The Sub-Adviser is controlled by George Madrigal, by virtue of his indirect ownership of greater than 25%, and Dustin Lewellyn, by virtue of his direct ownership of greater than 25%.

A discussion regarding the basis for the Board of Trustees’ approval of the Investment Advisory Agreement and Sub-Advisory Agreement for the SmartETFs Smart Transportation & Technology ETF and SmartETFs Advertising & Marketing Technology ETF is available in these Funds’ Semi-Annual Report to shareholders dated June 30, 2022.

Portfolio Management. The Funds’ portfolios are managed by experienced portfolio managers who are jointly and primarily responsible for the day to day management of the portfolios, as described below. The SAI provides additional information about the portfolio managers’ method of compensation, other accounts managed by the portfolio managers and the portfolio managers’ ownership of the Funds’ shares.

The Funds are actively managed, meaning that the Adviser will select each Fund’s holdings based on its own research and evaluation process. In identifying investments that a Fund will buy or sell, the Adviser uses proprietary and independent research to identify companies with favorable characteristics from the identifiable universe of companies it has compiled, and performs research and fundamental analysis to understand each company’s business model and prospects, valuation and potential for share price appreciation, income or return. The Adviser then monitors potential or actual investments for performance and risk perspectives as well as to quantify drivers of return and assess a company’s performance versus expectations. For each Fund, portfolio managers use internal proprietary models to categorize companies for purposes of evaluating investment potential. The SAI provides additional information about the portfolio managers’ method of compensation, other accounts managed by the portfolio managers and the portfolio managers’ ownership of the Fund’s shares.

**Fund Expenses**

In addition to the advisory fees discussed above, the Funds incur other expenses such as custodian, transfer agency, interest, Acquired Fund Fees and Expenses and other customary Fund expenses. The Adviser has contractually agreed to reduce its fees and/or pay Fund expenses (excluding Acquired Fund Fees and Expenses, interest, taxes, dividends on short positions and extraordinary expenses) in order to limit Total Annual Fund Operating Expenses for the Funds to the amounts (“Expense Caps”) shown below of the respective Fund’s average net assets:

**Distribution Plan & Payments to Dealers**

**Distribution Plan.** The Funds have adopted a Distribution Plan pursuant to Rule 12b-1 of the 1940 Act which permits the Fund to pay Rule 12b-1 fees not to exceed 0.10% per year of the Fund’s average daily net assets. No such fee is currently paid, and the Board of Trustees of the Funds have not approved the commencement of payments under the Rule 12b-1 Distribution Plan. The Funds do not plan to make payments under the Rule 12b-1 Plan currently, and each Fund will provide 60 days’ notice to shareholders before making payments under the Rule 12b-1 Plan.

**Additional Payments to Dealers.** The Adviser (and their affiliates) may make payments to dealers or other financial intermediaries and service providers for distribution and/or servicing activities, out of their own resources, including the profits from the advisory fees the Adviser receives from the Funds. Some of these distribution-related payments may be made to dealers or financial intermediaries for marketing, promotional or related expenses; these payments are often referred to as “revenue sharing.” In some circumstances, those types of payments may create an incentive for a dealer or financial intermediary or its representatives to recommend or offer shares of the Funds to its customers. You should ask your dealer or financial intermediary for more details about any such payments it receives.

**SHAREHOLDER INFORMATION**

**How to Purchase, Exchange, and Sell Shares**

Shares of the SmartETFs trade on the NYSE Arca exchange during the trading day. Fund shares can be bought and sold throughout the trading day like other shares of publicly traded securities. There is no minimum investment for purchases made on the listing exchange. When buying or selling Fund shares through a broker, you may incur customary brokerage commissions and charges. In addition, you will incur the cost of the “spread,” which is the difference between what investors are willing to pay for shares (the “Bid” price) and the price at which they are willing to sell the shares (the “Ask” price). When charged, the commission is frequently a fixed amount and may be a significant proportional cost for investors seeking to buy or sell small amounts of shares. The spread with respect to a Fund’s shares varies over time based on the Fund’s trading volume and market liquidity, and is generally lower (or “narrow”) if the Fund has a lot of trading volume and market liquidity and higher (or “wider”) if the Fund has little trading volume and market liquidity. When the spread widens, particularly in times of market stress, you
may pay significantly more or receive significantly less than the underlying value of the Fund shares when they buy or sell ETF Shares in the secondary market. Because of the costs of buying and selling ETF shares, frequent trading may reduce investment returns.

Fund shares are bought and sold at a market price, rather than the net asset value, and shares may trade at a price greater or less than the net asset value. Generally, the Funds will only issue or redeem ETF shares that have been aggregated into blocks of 10,000 shares or multiples thereof (“Creation Units”) to authorized participants who have entered into agreements with the Fund’s distributor, as discussed in the Purchase and Issuance of Creation Units section of the Statement of Additional Information. The Funds will issue or redeem Creation Units in return for a basket of assets that the Fund specifies each day. In limited circumstances, Fund shares may be individually issued outside of Creation Units, such as to participants in a dividend reinvestment program offered by a broker or in connection with a merger transaction.

Each Fund’s shares are listed on the NYSE Arca exchange. The listing exchange is open for trading Monday through Friday and is closed on weekends and the following holidays, as observed: New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

**Book Entry**

Fund Shares are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding SmartETFs ETF shares and is recognized as the owner of all ETF shares for all purposes. The Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding SmartETFs ETF shares and is recognized as the owner of all ETF shares for all purposes.

Investors owning Fund shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Fund shares. Participants include DTC, securities brokers, and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Fund shares, you are not entitled to receive physical delivery of stock certificates or to have Fund shares registered in your name, and you are not considered a registered owner of Fund shares. Therefore, to exercise any rights as an owner of Fund shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any securities that you hold in book entry or “street name” form.

**Frequent Trading**

Unlike frequent trading of shares of a traditional open-end mutual fund, (i.e., not exchange-traded shares), frequent trading of Fund shares on the secondary market does not disrupt portfolio management, increase the Fund’s trading costs, lead to realization of capital gains, or otherwise harm Fund shareholders. A few institutional investors are authorized to purchase and redeem shares directly with the Fund. When these trades are effected in-kind (i.e., for securities and not cash), they do not cause any of the potentially harmful effects (noted above) that may result from frequent cash trades. Moreover, the Fund imposes a Transaction Fee on in-kind purchases and redemptions of the Fund to cover the custodial and other costs incurred by the Funds in effecting in-kind trades, such as when an investor substitutes cash in part or in whole for securities, reflecting the fact that the Fund’s trading costs increase in those circumstances. For these reasons, the Board of Trustees has determined that it is not necessary to adopt policies and procedures to detect and deter frequent trading and market-timing in Fund shares.
Pricing Fund Shares

Market Price. Each SmartETFs ETF shares trade in the secondary market at market prices, which may differ from the NAV per share.

Net Asset Value. The NAV of each of the Funds is determined at the close of business of the NYSE (generally 4:00 p.m. Eastern Time).

Each Fund’s NAV is calculated by (1) subtracting the Fund’s liabilities from its assets and then (2) dividing that number by the total number of outstanding shares. This procedure is in accordance with Generally Accepted Accounting Principles. The Funds’ securities are valued based upon readily available price quotations from the principal exchange or market on which the securities are traded, and are generally valued at their official closing price or the last reported sale price. Securities without a readily available price quotation will be priced at fair value, as determined in good faith by, or under the supervision of, the Fund’s officers under methods authorized by the Board.

Fair Value Pricing. If market quotations do not accurately reflect fair value for a security, or if such valuations do not reflect current market values, that security may be valued by another method that the Board believes accurately reflects fair value. The Board has developed fair valuation procedures to be used when any assets for which reliable market quotations are not readily available or when the valuation, in the judgment of the Adviser, does not represent its accurate value. The Funds also may fair value a security if the Fund or the Adviser believes that the market price is stale. Under the Funds’ fair valuation process, when a fair valuation event occurs, a committee that includes representatives from the Adviser, the Custodian, and the Funds’ Chief Compliance Officer, convenes to review pricing information and determine the fair value of the security in question.

There can be no assurance that the Funds could purchase or sell a portfolio security at the price used to calculate the Fund’s NAV. In the case of fair valued portfolio securities, lack of information and uncertainty as to the significance of information may lead to a conclusion that a prior valuation is the best indication of a portfolio security’s current value. Fair valuations generally remain unchanged until new information becomes available. Consequently, changes in the fair valuation of portfolio securities may be less frequent and of greater magnitude than changes in the price of portfolio securities valued by an independent pricing service or based on market quotations.

Premium/Discount Information

Information regarding how often the Funds traded on the listing exchange at a price above (i.e., at a premium) or below (i.e., at a discount) the net asset value of the Fund during the past four calendar quarters will be available at www.smartetfs.com.

Distributions and Taxes

Dividends and Capital Gains Distributions. The Funds will distribute all or most of its net investment income and net capital gains to shareholders. Dividends (investment income), if any, will normally be declared and paid at least annually. Some of the Funds’ investment income may be subject to withholding tax. Net realized capital gains, if any, will be distributed at least annually, and normally in December. When calculating the amount of capital gain, the Funds can offset any capital gain with net capital loss (which may be carried forward from a previous year).

Buying Before a Dividend. If you purchase shares of the Funds on or before the record date, you will receive a dividend or capital gains distribution. The distribution will lower a Fund’s NAV on that date and represents, in substance, a return of basis (your cost); however, you will be subject to federal income taxes on this distribution.

Dividend Reinvestment. No dividend reinvestment service is currently provided by the Funds. Broker dealers may make available a dividend reinvestment service for use by beneficial owners of the Funds for reinvestment of their
dividend distributions. Beneficial owners interested in such a service should contact their broker for availability and other necessary details. Brokers may require beneficial owners to adhere to specific procedures and timetables to participate. If a dividend reinvestment service offered by a broker is used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole shares of the Fund purchased in the secondary market.

**Tax Issues.** The following tax information is based on U.S. federal tax laws and regulations in effect on the date of this prospectus. These laws and regulations are subject to change, possibly with retroactive effect. Shareholders should consult a tax professional for the federal tax consequences of investing in the Fund as well as for information on foreign, state and local taxes which may apply. A statement that provides the U.S. federal income tax status of the Fund’s distributions will be sent to shareholders promptly after the end of each year. Additional tax information appears in the Funds’ Statement of Additional Information.

**Distributions to Shareholders.** Qualified dividends received from the Funds by non-corporate shareholders will be taxed at long-term capital gain rates to the extent attributable to qualified dividends received by the Funds. Nonqualified dividends, dividends received by corporate shareholders and dividends from the Funds’ short-term capital gains are taxable as ordinary income. Dividends from the Funds’ long-term capital gains are taxable as long-term capital gains. You have to pay taxes on distributions even though you have them automatically reinvested. On some occasions a distribution made in January will be treated for tax purposes as having been distributed on December 31 of the prior year.

Dividends and distributions from a Fund, and gains from the sale of shares of a Fund, will be included in determining a shareholder’s “net investment income” for purposes of the Medicare contribution tax that applies to certain individuals, estates and trusts.

Generally, the Funds and financial intermediaries are obligated to withhold and remit to the US Treasury a percentage of taxable distributions and sale or redemption proceeds paid to a shareholder who fails to furnish a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify that it is exempt from withholding.

**Gain or Loss on Sale of Fund Shares.** You may recognize either a gain or loss when you sell Fund shares. The gain or loss is the difference between the proceeds of the sale (the market price per share on the date of sale times the number of Fund shares sold reduced by the expenses of the sale) and your adjusted basis in those Fund shares. Any loss realized on a taxable sale of shares held for six months or less will be treated as a long-term capital loss, to the extent of the amount of capital gain dividends received on such shares. If you sell Fund shares at a loss and purchase shares of the same Fund within 30 days before or after the sale (a wash sale), a deduction for the loss is generally disallowed. Shares acquired through a dividend reinvestment service offered by a broker may cause a “wash sale”.

**Withholding Taxes.** The Funds may be required to withhold U.S. federal income tax at the fourth lowest rate for taxpayers filing as unmarried individuals (currently 24%) for all taxable distributions payable to shareholders who fail to provide the Fund with their correct taxpayer identification numbers or to make required certifications, or who have been notified by the Internal Revenue Service (the “IRS”) that they are subject to backup withholding. Backup withholding is not an additional tax; rather, it is a way in which the IRS ensures it will collect taxes otherwise due. Any amounts withheld may be credited against a shareholder’s U.S. federal income tax liability.

**Foreign Source Income and Withholding Taxes.** Some of the Funds’ investment income may be subject to foreign income taxes that are withheld at the source. If the Funds meets certain requirements, it may elect to “pass-through” these foreign taxes to shareholders. If the Funds so elects, you would be required to include in gross income, even though not actually received, your pro rata share of such foreign taxes and would therefore be allowed to claim a foreign tax credit or a deduction for your share of foreign taxes paid, subject to applicable limitations.
**Cost Basis Reporting.** Federal law requires that investment companies report their shareholders’ cost basis, gain/loss and holding period to the IRS on the Funds’ shareholders’ Consolidated Form 1099s when “covered” securities are sold. Covered securities are any regulated investment company and/or dividend reinvestment plan shares acquired on or after January 1, 2012. The Guinness Atkinson Funds have chosen Average Cost as their default tax lot identification method for all shareholders. A tax lot identification method is the way that Funds will determine which specific shares are deemed to be sold when there are multiple purchases on different dates at differing net asset values, and the entire position is not sold at one time. The funds’ standing tax lot identification method is the method covered shares will be reported on your Consolidated Form 1099 if you do not select a specific tax lot identification method. You may choose a method different than the Fund’s standing method and will be able to do so at the time of your purchase or upon the sale of covered shares.

For those securities defined as “covered” under current IRS cost basis tax reporting regulations, each series of the Guinness Atkinson Fund is responsible for maintaining accurate cost basis and tax lot information for tax reporting purposes. The funds are not responsible for the reliability or accuracy of the information for those securities that are not “covered.” Guinness Atkinson Funds and its service providers do not provide tax advice. You should consult independent sources, which may include a tax professional, with respect to any decisions you may make with respect to choosing a tax lot identification method.

**Taxes on Creation or Redemption by Authorized Participants.**

Authorized Participants who exchange securities for Creation Units generally will recognize gain or loss equal to the difference between (i) the sum of the market value of the Creation Units at the time of the exchange and any cash received by the Authorized Participant in the exchange, and (ii) the sum of the Authorized Participant’s aggregate basis in the securities surrendered and cash paid for Creation Units. Authorized Participants who redeem Creation Units generally will recognize gain or loss equal to the difference between their basis in the Creation Units and the sum of the aggregate market value of securities received and any cash received for such Creation Units. The IRS may take a position that an exchange does not give rise to a loss, including as a result of the “wash sale” rules. Authorized Participants must consult their tax advisors with respect to whether or not such a loss may be deductible.

Capital gain or loss realized upon the redemption (or creation) of Creation Units generally will be treated as long-term capital gain or loss if the shares (or securities surrendered) have been held for more than one year, and as short term capital gain or loss if the shares (or securities surrendered) have been held for one year or less.

**Possible Tax Law Changes.** Various administrative and legislative changes to the US federal tax laws have been suggested or are under consideration, but it is not possible at this time to determine whether any of these changes will be adopted, what the changes might entail, and whether changes could affect taxation with respect to your investment in the Fund. Similar administrative and tax considerations may apply in foreign countries in which the Fund holds investments. It is not possible at this time to determine whether administrative or legislative changes could affect taxation with respect to the Fund’s investments.
FINANCIAL HIGHLIGHTS

These financial highlights tables are intended to help you understand the SmartETFs Advertising & Marketing Technology ETF’s financial performance for the past five years. Certain information reflects financial results for a single share of the Fund. The information in the table was audited by Tait, Weller & Baker LLP, whose report, along with the Fund’s financial statements, is included in the Fund’s Annual Report, which is available upon request by calling 1-866-307-5990.

FINANCIAL HIGHLIGHTS

These financial highlights tables are intended to help you understand the SmartETFs Asia Pacific Dividend Builder ETF’s and SmartETFs Dividend Builder ETF’s financial performance for the past five years. Each of the SmartETFs Asia Pacific Divided Builder ETF and the SmartETFs Dividend Builder ETF have adopted the performance history of their predecessor funds, which were operated as mutual funds. The financial information shown below is for the predecessor mutual funds for the periods prior to the conversion of the Funds into exchange traded funds on March 26, 2021. Each Fund’s total net operating expense ratio is lower than the net operating expense ratio of its predecessor Fund. The information in the tables below for the predecessor funds has not been adjusted.

Some information reflects financial results for a single share of the predecessor mutual funds. The total returns in the table represent the rate that an investor would have earned or lost on an investment in the mutual funds, which the Adviser believes is an accurate representation of how the Funds would have performed., assuming reinvestment of all dividends and distributions. The information in the table was audited by Tait, Weller & Baker LLP, whose report, along with the Funds’ financial statements is included in the Funds’ annual report, which is available by calling 866 307-5990.

NOTICE

SmartETFs shares are not sponsored, endorsed, sold or promoted by the NYSE Arca Exchange. NYSE Arca makes no representation or warranty, express or implied, to the Fund’s shareholders or any member of the public regarding the advisability of investing in securities generally or in the Funds in particular, or with respect to any ETF’s ability to achieve its investment objective.

The Listing Exchange is not responsible for, nor has it participated in, the timing of, prices of, or quantities of the shares of the Funds to be issued, nor in the determination or calculation of the equation by which the shares are redeemable. The Listing Exchange has no obligation or liability to owners of the shares of the Funds in connection with the administration, marketing, or trading of the shares of the Funds.

• **Statement of Additional Information.** The SAI provides a more complete discussion about the Funds and is incorporated by reference into this prospectus, which means that it is considered a part of this prospectus.

• **Annual and Semi-Annual Reports.** The annual and semi-annual reports to shareholders contain additional information about the Funds’ investments. The Funds will issue an annual report after the fiscal period ends, which will contain a discussion of the market conditions and principal investment strategies that significantly affected the Funds’ performance during the fiscal period.

As of January 1, 2021, paper copies of the Funds’ shareholder reports are no longer sent by mail. Instead, the reports are made available on the Funds’ website (www.smartetfs.com), and you will be notified and provided with a link each time a report is posted to the website. You may request to receive paper reports from SmartETFs or from your financial intermediary, free of charge, at any time.

**To Review or Obtain this Information:** The SAI and annual and semi-annual reports are available without charge upon your request by sending an e-mail request to mail@smartetfs.com, by calling 866 307-5990 (toll free in the United States), visiting the Funds’ website, www.smartetfs.com, or by calling or writing a broker-dealer or other financial intermediary. To request other information about the Funds and to make shareholder inquiries, please call 866 307-5990. Reports and other information about the Funds are available on the EDGAR Database on the SEC’s internet site at [http://www.sec.gov](http://www.sec.gov) and copies of this information may be obtained, after paying a duplicating fee, by electronic request at the following e-mail address: publicinfo@sec.gov.
